There Is a Big Difference in Hybrids

The characteristics of a Hybrid corn variety depend entirely on the inbreds that are used to produce it. There are hundreds of inbreds and many hundreds of possible combinations. Some combinations produce exceptionally fine Hybrid Corn. Some other combinations are fair and some are definitely inferior. There is a great difference in the productiveness and quality of different Hybrids. Just because corn is a Hybrid does not mean it is better than your own open pollinated corn. Some are much better, some are much poorer.

Buy State or U. S. Govt. Originated Hybrids

Private producers may sell Hybrids they have developed before their value is fully determined. Thus they can get their profits. State and U. S. Experiment stations develop many Hybrids but they only release to the general public those they consider definitely superior. These stations are not concerned with profit. All they are after is better corn for farmers to plant. When you plant State or U. S. originated Hybrids and buy only State Certified seed you know definitely that you are getting such varieties, properly prepared and that there will be no substitutions.

State Certified Seed

Our State Certified seed which sells at \$1.00 per bushel less than Multi-Perfected (see page 4) is for all practical purposes about equal to Multi-Perfected State Certified. However, this straight State Certified may come from different growers than those producing the Multi-Perfected. Insofar as genuineness of variety, it is fully up to the strict standards set up for State Certification and equal or superior to any state certified seed.

Grades, Varieties and Prices

The grades of Hybrid seed corn that we have are described on page 4. The prices are also given there. You will observe we have a limited supply of 1938 crop. That is available in all but U. S. 13 and Indiana 432. The small round grains are cheaper per bushel and a bushel will plant more acres. They will produce the same kind of corn that the larger flat grains will produce and apparently they yield just as well.

Standard Multi-Perfected Hybrids

This seed stock comes from growers who have a reputation as growers of quality Hybrid seed corn. The growing and processing of Hybrid corn has a bearing on its yielding ability. The same variety produced by different growers may vary from 3 to 8 bushel per acre on the same variety. Multi-Perfected gives you what we consider Hybrids at their best. The following 10 points indicate the high character of this seed.

1. The Variety is State or U. S. Government Originated.
2. The seed stock for making the Hybrid is approved by the State. It is produced by expert Inbred growers.
3. The isolation of the seed field has State inspection.
4. The vitally important work of detasseling is checked and okayed by the State. State specifications are surpassed.
5. The variety is proven superior in yield and stalk strength.
6. It is dried to 14% moisture. Freezing cannot injure germination.
7. The seed germinates 90% strong or better. Often 98%.
8. The seed is State Certified.
9. The seed is carefully graded and processed.
10. The crop is properly and expertly grown.

STATE CERTIFIED

IOWA 931

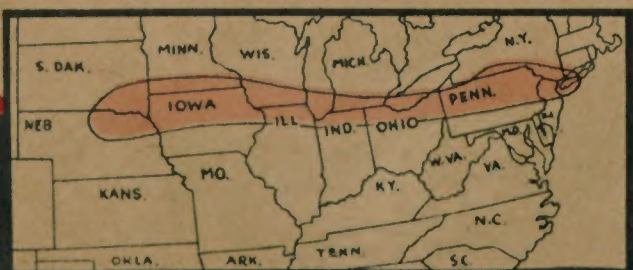

Highest Producer, 6 year average—Northern Iowa

This is our earliest maturing Hybrid. It was developed by the Iowa Experiment Station for conditions in northern Iowa. We, therefore, suggest planting it where similar seasonal conditions prevail.

In State yield contests in the northern part of Iowa this Hybrid has proven to be 16.4 percent better than average ordinary corn over a period of 8 years. The bushel increase in yield has been as high as 17.62 bu. per acre over ordinary. The acre yield has been recorded up to 95.5 bushel per acre. In percentages it has outyielded ordinary corn by as much as 24.4 percent.

Iowa 931 is not a new and untried variety. It has now been in production for nine years and is truly a time tested Hybrid. In considering tests one should remember that in some favorable year a Hybrid of later maturity might show a little better record, but the same variety the next year might be way down because of improper maturity. The long proven record on 931 proves its adaptability year in and year out to Northern Iowa and similar conditions.

This variety is not as flinty as many of the earlier maturing varieties. The kernels are medium rough and have distinctive reddish cast on the side similar to the Iowa 939. It is important to bear in mind that a corn which is less flinty will be eaten much more readily than extremely hard corn. Flinty corn may also be discounted on the market. When you get a variety that combines heavy yields and good eating quality you really have a money maker.

STATE CERTIFIED

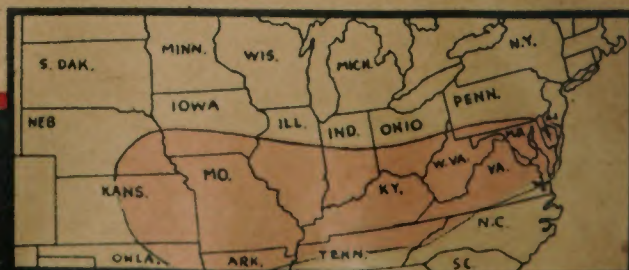

IOWA 13

Heaviest Producer, 6 year average—Southern Iowa

This variety is especially adapted to climatic conditions such as prevail in the southern half of Iowa and northern Missouri. It should do well in all sections having similar conditions. Iowa 13 has shown that it is an exceptional resister against drought conditions. Over a period of seven years it has in the southern Iowa corn yield contest an advantage of 30.3 percent in yield and in the South Central section 28.9 percent superiority. That is a remarkable rating to extend over a seven year period. Its outstanding performance was in the drought year of 1936 when it outyielded other Hybrids by 26.9 percent and the average open pollinated 79%. It took the banner trophy in the southern Iowa district. Iowa 13 has recorded yields of 118.99 bushels per acre.

Like 931, Iowa 13 is a time tested Hybrid, 1939 being its 9th year in state yield contests. The examination of its records when judged over a term of years shows its high rating. Not only is its record good in Iowa. It has shown well in other states. In 1935 it yielded 109.7 in North Central Illinois. In 1936 it shared top honors in the south central portion with Illinois 960. In 1937 it made a yield of 105.4 bushels at Maryville, Missouri, which is in the northern part of that state.

Iowa 13 shows high yields, with adaptability and also is not so hard and flinty. That is important from a feeding standpoint. We have never had a complaint from our customers on excess hardness and consider that a most desirable factor. Any who have grown the very hardy flinty kinds will appreciate this.

The Outstanding Hybrid for Yield STATE CERTIFIED ILLINOIS 960

**Highest Yield
3 Year Average 1936-37-38**

AS LOW AS
\$3.75
BU.
SEE PAGE 4

The development of Hybrid varieties seems to have been more of the earlier types. Kinds suitable to Central Iowa conditions and north. While Iowa 13 is good for the south this Illinois 960 shows a number of improvements. A wider adaptability and a superior quality. Here is a hybrid with an imposing record of production. We give it our recommendation for all sections having conditions similar to north central Illinois, south central Iowa and from there way down south into Mo., Okla., Ky.

Some Yield Reports

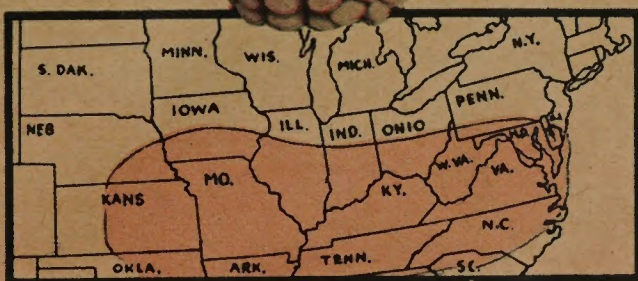

The following information is gathered from state yield records and letters and bulletins received from State Experiment Stations. In **Illinois** over three year average it was heaviest producing corn in north central, central and south central sections of the state, and for a two year average the heaviest producing in the southeastern section. In another Illinois soil adaptability test it was the heaviest yielder on soils of high, medium and low fertility. Remember that some hybrids require rich soil while 960 has given top performance on a wide variation in soil.

In southern **Iowa**, Illinois 960 was tested in Mills, Wayne, Henry and Johnson counties. The average of these tests showed 960 the heaviest producer of all Hybrids and outyielding ordinary corn by about 19 bushel per acre. The average yield of 960 in the four tests was 90¼ bu. per acre with a top production of 108.49 bu.

In northern **Missouri** in test with 65 other Hybrids, Illinois 960 was the top of all commercial varieties with a yield of 112.2 bushel per acre.

Other State Reports on 960

It was top in eastern **Nebraska**. In **Kentucky** it classifies as a medium early variety and on the Experiment Station farm at Lexington was among the highest yield-

Where we suggest planting Illinois 960

Record Holder West & East Central Illinois

ers. At Ridgely, **Maryland**, it yielded 72.4 bu. per acre and lacked only a fraction of a bushel in being tops in yield.

Ohio reports they consider Illinois 960 a good Hybrid for the southern portion of the state, and they are entering it in the certification list. It was one of the 3 best with an average yield of 4 tests in the southern section of 78.6 bu. per acre. The **Indiana** experiment station reports it did very well in several tests in the Central part of the state and that it should be a satisfactory variety. The fact that it also was one of the best in Kentucky would indicate its adaptability to southern Indiana also.

Description of 960

It is a pure yellow corn with a very good depth of grain. The kernels are not as broad and shallow as some but narrower and longer. It is more like a smooth type of Reid's Dent. The grains and rows are closely spaced making a good solid ear. Kernels are not flinty.

The stalk growth is a little taller than the average hybrid. It is a very strong rooted corn. The ears of 960 remain better protected by the husks than many Hybrids. It does not have the tendency to protrude its ears while the grain is still soft.

On thin stands the Illinois 960 has a strong tendency to form two nice sized ears per stalk. Therefore even with thin stands it yields well and on different soil types maintains excellent performance.

By actual tests it has proven itself an outstanding Hybrid and we urge its planting because we believe it to be one of the best. We consider it suitable to approximate territory shown in the shaded area on the map in the center.

FREE CIRCULAR

Write for our Free Hybrid corn Circular giving more detailed information on all of these varieties as well as general information on State Certification and Hybrid corn qualities.

STATE CERTIFIED

IOWA 939

Best Yielder—5 Year Average—North Central Iowa

A development of the Iowa Experiment Station that has spread from Central Nebraska to the eastern coast and proven a very remarkable Hybrid. It is earlier in maturity than 960 going North up to the two northern tiers of counties in Iowa and going south into northern Missouri with very enthusiastic reports from farmers in that section. This indicates its wide adaptability.

Iowa 939 has made some wonderful yield records in state tests. In Iowa it has averaged 20% increase in yield over o.p. corn going as high as 40% increase. In one test it outyielded all other Hybrids. In Nebraska it was the top yielding Hybrid over a 5 year average outyielding ordinary corn by 23% or an increase of 10 bushel per acre. It is a "time-tested" variety.

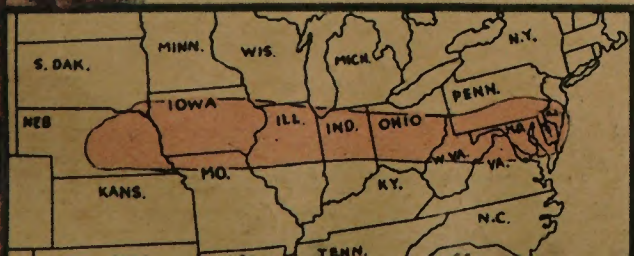

Illinois gives 939 recorded yields of 107.3 and 103.8 bushel per acre. In an Ohio report it topped all of the early Hybrids with a yield of 98.1 bushel per acre. This variety has been widely grown in West Virginia tests and it has shown up very well indeed and is suggested for elevations up to 2000 feet or where a medium early variety is desired. It is a very popular Hybrid with Indiana farmers and is grown extensively in Penna. Also in New York. It is widely adapted.

Description of Iowa 939

It is a variety of medium early maturity. It forms more uniform ears than many Hybrids, looking more like ordinary corn yet outyielding it materially. The kernels are of a medium rough type. Kernels are fairly broad and of good depth. The sides have a distinctive reddish tinge. They are not as hard and flinty as those of many hybrids and are readily eaten by cattle and hogs.

It has strong roots and stalks. The husks give the ears good protection yet when ripe is a very easy corn to husk. Nearly every farmer that we know of who have grown Iowa 939 speaks very highly of it and want to continue growing it.

We believe this variety to be adapted to the shaded area shown on the map below.

AS LOW AS
\$3.75
BU.
SEE PAGE 4

TWO TOP RATERS

INDIANA 432

U.S.-13

**Highest Yields
Northern Half of Iowa
Two Year Average**

In the northern and north central sections of Iowa for the average of two years 1937 and 38 Indiana 432 was the highest producer in state yield tests. Figures for 1939 are not available as this is being written. In the northern section there were 33 other entries and in the north central 31 entries. Indiana 432 outyielded them all. Remember that is not just for one year but for the average of two years that it was in the state yield contest.

Since it did so well in the entire northern half of Iowa you can determine its adaptability to your own section. In the two sections it averaged 15 bushel per acre better than the average open pollinated. In one of the 1938 tests it was 25 bu. per acre better than average o.p. corn. This Hybrid can be grown further south than Iowa 931 and still show a wonderful record.

Indiana 432 is a good feeding corn. You should find it a top yielder in a medium to early maturing corn. Its Indiana origin, its performance in the northern half of Iowa indicates its wide adaptability.

This variety is available only in 1939 crop, Multi-Perfected and State Certified as priced below.

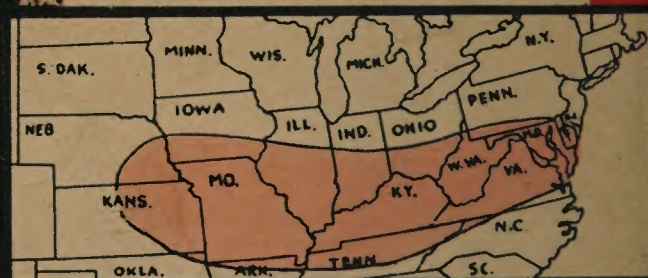

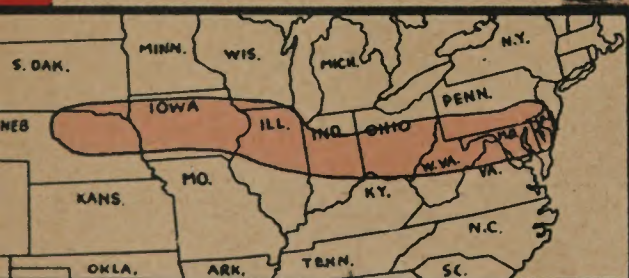

**A Big—Single Ear Hybrid
Deep Grained—Moderately
Rough Heavy Producer**

In all the years we have handled Hybrid seed corn never have we had a variety that attracted such wide attention. Farmers drove for miles to see our seed field near Clarinda. Not only the seed field but also a crop field grown from U. S. 13 seed created enthusiastic interest.

Experienced, hard headed, skeptical farmers came to examine it and they did a thorough job. The height of the stalk and ears. The size of the ears. Did they hang on well? How did the corn stand up? How about disease? They looked for everything and they came away thoroughly convinced it was the finest Hybrid they had ever seen. They came in wanting to place orders and did. We do not believe we will have enough to fill the demand this year.

U. S. 13 ears are large and deep grained, rich yellow colored grain. Large germs. Looks like open pollinated but far outyields it. One check in the seed field showed over 110 bu. per acre and on the crop field 90 bushel when corn around it was making 55 to 65. Has given wonderful results in southern

Ohio tests. Comparatively new. Has not been in many tests, 1939 figures are not available at time of this writing but it will unquestionably prove a winner. This corn should be a winner for all sections having conditions similar to those from Central Iowa south into Missouri and other Southern States. Especially good on rich land. Yields well but does not have as nice ears on thin land. Order early if you want U. S. 13. It is available only in Multi-Perfected stock. See below.

**PRICES
ON
HYBRID
CORN**

We sell Hybrids in Multi-Perfected and straight State Certified. With Multi-Perfected Hybrids greater care is taken than is required for State Certification. The seed stock comes from expert inbred growers and that influences yields. The detasseling is even more rigid than required for State Certification. That influences yields. In other words we endeavor to have Multi-Perfected stand for State Certified Hybrids at their best. That may mean 3 to 8 bu. per acre more corn at harvest time.

Our straight State Certified may come from other growers but is high quality seed stock. All shipments guaranteed to satisfy you.

**State Certified
1939 Crop**

Flat Grain—Edge Drop, \$5.00 Bu.

Three grades of flat. Large, medium and small. Available in all varieties described in this book except U. S. 13 which we have only in Multi-Perfected.

**\$5⁰⁰
BU.**

**State Certified
1939 Crop**

Round Grain—Hill Drop

Two grades of round, large and small. Small size plants most acres. Available in all varieties except U. S. 13. Very economical.

J. F. SINN
President
Berry Seed Company

A farmer by birth and early training. A man who has had 35 years of experience in the seed business. Recognized as one of the foremost men in the farm seed trade. He strives to give our customers better seed values.

He is always at your service and glad to help you with your seed problems.

SAVE MONEY on QUALITY SEEDS EVERY POUND GUARANTEED TO PLEASE

Dear Friends:

Jan. 10, 1940.

The past year has been one of the best for agriculture, the farmers income being greater than any year since 1929. The bumper corn crop in Iowa, largely due to Hybrids, has brought much new wealth to the farmer and has increased his buying power very materially. The new program of reducing corn acreage owing to the present surplus means more acres to be seeded to grass and legumes.

Owing to the low prices now prevailing and the need of less corn acreage vast quantities of grass seeds should be used. The question arises, is the supply equal to this increased demand. The answer is no, for most seed crops are much shorter than a year ago. The Clover seed crop is 27% less—Timothy not nearly as large—Alsike about $\frac{3}{4}$ as large, Lespedeza 40% less. Sweet Clover slightly larger, also an increase of about 24% on Alfalfa production. When you analyze these figures it is plain to see that shortages are bound to show up. This can only mean one thing, higher prices.

You will be surprised to find no war prices on seed, some lower than last year, while most commodities are higher. We have made our prices unusually low, owing to early purchases and ample capital to provide immense stocks so as to protect our low quotations. These prices are good so long as present supplies or markets permit handling without asking for more money. You will get the best quality and values by ordering promptly. My advice to our prospective customers is to buy your seed early.

We have improved our Catalog with new color pages and better display and have tried to make every page of real interest to the buyer of seeds. Study each page and take advantage of our money saving offers. Also take advantage of the premium coupon and secure these lovely premiums at half price.

Note our low prices on Garden Seed and Nursery Stock. I do not believe anyone can give you as much value for your money. See the low prices on the many special offers and judge for yourself. You will find the book chock full of genuine bargains. We want to save you money and ask for your order on this basis. Everything you order is covered by our Guarantee, see page 8.

I want every customer to be back with an order, also bring a friend along. Every customer is guaranteed satisfaction or money will be refunded. I will be looking forward to receiving your order.

Yours respectfully, J. F. Sinn

Greens Fork, Ind.
Dear Sirs: Have bought several thousand dollars worth of seed from you. Have always found them prompt and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination.
D. W. HARRIS

Springville, Iowa
Gentlemen: The Marvellous Mixture of grass seed that I have been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.

Yours truly,
C. F. BUTLER

Mount Clare, W. Va.
Dear Sirs: I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service lead me to recommend you to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed.
Truly yours, G. W. CONLEY

New Berlin, Ill.
Gentlemen: I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farmer friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy.
J. W. GERHARDT

Hummelstown, Pa.
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Honest John Alfalfa has given me wonderful results. I sent you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you.

Yours truly,
DANIEL BEHRENS

Lovely New 53-Pc. Dinner Set Charming Doily Petit Point Design

Here is one of the very latest and most beautiful patterns in Dinnerware we would find anywhere in the country. It is a complete service for 8, consisting of 8 cups, 8 saucers, 8 dinner plates—9 inch size, 8 bread and butter plates—6 inch size, 8 coupe soups—7 inch, 8 fruits, 1 covered sugar (2 pieces), 1 cream pitcher and one 11 inch meat platter.

The Doily Petit Point pattern is a dainty reproduction of old-fashioned needlework, adapted to dinnerware design. Placed on your table, it will provide a colorful setting that fairly charms the eye—not too brilliant, but with a pleasing pastel effect that is so much appreciated by the guests and hostess alike.

This complete 53-Pc. Set sent with order for \$50.00 or more together with **Cash Value Coupon** and \$5.00. Shipped by freight, prepaid to your nearest railway point.

Ask for Premium No. 1. Enclose **Coupon** and \$5.00 for Premium. Our regular retail price (without seed order) \$11.00.

Premium No. 2

25-Pc. Breakfast Set

Same ware and pattern as above. Service for 4. Sent with orders of \$35.00 to \$49.99, together with **Cash Value Coupon** (above) and \$3.00. Our regular retail price \$6.00.

Ask for Premium No. 2.

PICK The PREMIUM You WANT

Premium No. 3

Dutch Oven with Trivet. Chromium plated. Heavy 18 gauge bottom. Dome shaped, vapor sealed cover, self basting. Sent with orders of \$20.00 to \$34.99 together with **Cash Value Coupon** (page 6) and \$1.05. Our retail price (without seed order) postpaid \$2.25.

Premium No. 4

Chicken Fryer. Deep style, chromium plated. Heavy 18 gauge bottom. Self basting, vapor seal cover. Composition knob. Sure grip handle. Handy all purpose fryer. Sent with orders of \$20.00 to \$34.99 with **coupon** and \$1.05. Our retail price (without seed order) \$2.25 postpaid. Ask for Premium No. 4.

Premium No. 5

Brown Betty Special Casserole. A genuine old fashioned ovenproof earthen casserole $1\frac{3}{4}$ quart capacity. Chrome base and cover. Handles to match color of dish. This is an eye opener. Sent with orders of \$10.00 to \$19.99 together with **Cash Value Coupon** (page 6) and 95c. Our retail price \$2.00 postpaid.

Premium No. 6

Heavy Steel Skillet. Sparkling polished chromium exterior. $10\frac{1}{2}$ in. top diameter. Extra heavy 14 gauge bottom. Never needs scouring. Wash in soap and water like glass. Cool non-twisting handle. Sent with orders of \$10.00 to \$19.99 together with **Coupon** and 95c. Our retail price \$2.00 postpaid.

Premium No. 7

Heavy Steel Griddle. Chromium plated $11\frac{1}{2}$ in. top diameter. Extra heavy 14 gauge bottom. Comfortable cool handle. Modern slanting edge. Ideal for flap-jacks, steaks, etc. You will really prize this kitchen aid. Very useful and durable. Sent with orders of \$5.00 to \$9.99 together with **Cash Value Coupon** (page 6) and 75c. Our retail price (without seed order) \$1.60 postpaid. Ask for No. 7.

Premium No. 9

Aluminum Round Double Roaster. Cap. 4 lb. fowl, 6 lb. roast. Overall diam. $11\frac{1}{2}$ in.; height $5\frac{3}{8}$ in. Polish finish. Easy to clean. Top handy for gravy, cakes, puddings, etc. Lower pan cap. 4 qts., upper 2 qts. Sent with orders of \$3.00 to \$4.99 together with **Cash Value Coupon** (page 6) and 55c. Our retail price (without seed order) \$1.20 postpaid. Ask for No. 9.

Premium No. 10

Aluminum Strainer Pan. Graduated on side. Clamp locks on lid. Has a special feature strainer top. Cover fits recess to help prevent boiling over. Very handy. 3 qt. capacity. Sent with orders of \$3.00 to \$4.99 together with **coupon** and 55c. Our retail price \$1.20 postpaid.

Premium No. 8

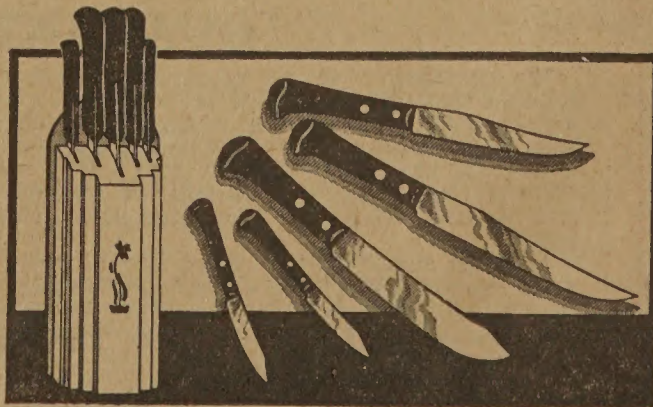

Clamp Seal Cooker. Polish finish aluminum, 6 quart size equipped with locking cover, steam escape valve. Cook a whole meal in this. Pudding pan capacity $1\frac{1}{2}$ quarts, $9\frac{1}{8}$ in. diameter bottom. Saves fuel and flavor. You can't appreciate its wide usefulness and value until you actually use this fine cooker. Sent with orders for \$5.00 to \$9.99 together with **Cash Value Coupon** (page 6) and 85c. Our retail price \$1.75. Ask for No. 8.

Premium No. 11

Aluminum Handy Pan. Has sani-form handle, sani-tile rim. Graduated on side—Heavy 20 gauge aluminum. 1 quart size. Sent with orders of \$1.00 to \$2.00 together with **Cash Value Coupon** and 25c. Our retail price 50c postpaid.

Premium No. 12

Kitchen Knife Set. Stainless steel blades, Cocobolo handles. Consists of Slicer, Butcher, Bread and 2 Kitchen Knives. Complete in colorful wooden wall rack. Sent with order of \$10.00 to \$19.99 together with **coupon** and 95c. Our regular retail price \$2.00.

TESTED QUALITY

Mr. L. C. Jorgenson is our analyst and has had twenty years of experience. He secured his training through U. S. Government at Washington, D. C.

New Federal Seed Law Gives Added Protection to Mail Order Buyers

A new Federal seed law requires that all seed shipments in interstate commerce be tagged in accordance with the laws of the state into which it is shipped in respect to any noxious weed seeds. In addition the purity and germination tests are to be given. Thus shipments of seed ordered by mail are required to give you truthful information and correct tests on all interstate shipments.

Prompt Service—Safe Arrival

We maintain shipping points at Clarinda and Chicago although correspondence and orders are all handled through Clarinda. We are organized to give you prompt service. Improved freight service gets seed to destination promptly. If on arrival of your shipment there is any sign of loss or damage just have your agent mark it on the freight bill. Send it to us and we will make prompt adjustment. Address all letters to Clarinda, Iowa. We have no office in Chicago.

If you want a receipted invoice ask for it on your order.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Cleaned Seed

The seed we sell our trade is not as it comes from the grower. It is cleaned and graded either by ourselves or direct through our buying connections. Seed cleaning and grading requires experience and equipment. Often it is necessary to run seed over different kinds of cleaners to get the desired results. Careful adjustments and expert operation are needed to do the best work. This applies also to grading for not all grades are of equal quality. The size and weight of berries as well as color enter into making grades. Our aim in cleaning or in buying cleaned seed is always to give the customer the greatest possible seed value at the price he wants to pay.

GUARANTEE

We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge. Our guarantee protects the buyer and is lived up to, so it means just what it says.

BERRY SEED CO.,
Clarinda, Iowa.

The test tags attached to shipments of seed show the results of the purity and germination tests of a composite sample of the lot of seed from which shipment is made. This sample is obtained by taking small quantities of seed from different portions of the lot. These are mixed thoroughly so as to make the composite sample as representative as possible of the entire lot of seed. A portion of this sample is taken to make the purity and germination test. That is the general method of testing seed and is followed by ourselves. In most cases the analysis is our own but occasionally we use the analysis furnished by the party selling us the seed. It is our aim to attach such test tags to all shipments made. Sometimes a tag will be missed or lost from the shipment but in such case a test tag may be had upon request. Individual bags may vary from the lot test.

PLANT the BEST QUALITY SEED for BIGGEST CROPS and PROFITS

DIRECT BUYING

The Sensible
Thing to Do

More Farmers are Doing It

Our business is nation wide and farmers from every state send their orders to Berry's. We are proud to number among our customers many of the best farmers in their communities. Thousands have bought from us for many years. They come back year after year because they have been satisfied with our seeds and convinced that they have saved money.

The tendency of some farmers is to judge quality by the prices asked for seed. This is not always a good basis to go by. The extra expense of some dealers, larger profit demanded and higher prices paid for supplies may all result in higher prices to the farmer on seed of similiar quality.

You can return any shipment that does not please you as to quality or value and your money plus freight will be refunded.

IS THE
PRACTICE of
THOUSANDS

FARMERS

OUR CUSTOMERS REPORT
SAVINGS up to 40%

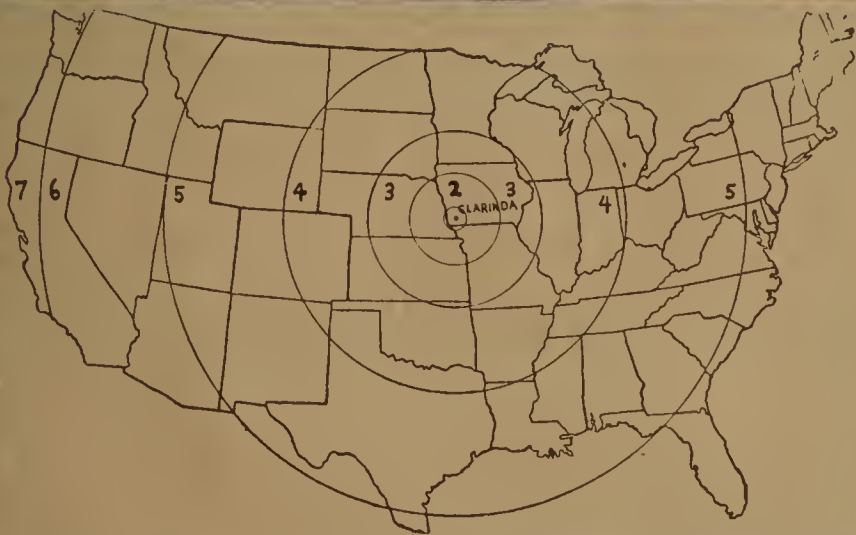

EARLY BUYING ADVISED

Our strong financial position enables us to take advantage of favorable markets and lay in large stocks of seed for spring use. The stocks that we have at the start of the season are quite large and should take care of all early buyers.

The prices in this catalog will be protected so long as supplies last or until market advances make duplication impossible. There are a number of factors present that may advance prices sharply. Shortage of some stocks, stimulated demand caused by the AAA program and the possibility of a war boom period.

We believe we are giving you sound advice when we urge you to order your seed early this year. Not only should you find prices lower now but early buying will give you ample time to receive your seeds and have them retested if you wish. It is not our desire to scare you into buying early. It is simply our sincere belief that you will benefit yourself by buying early this year.

If conditions compel you to delay buying we can assure you that we shall at all times give you the best possible service and the greatest possible values.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted post-paid be sure to remit to cover postage. First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	8c	1c
Zone 2	8c	1c
Zone 3	9c	2c
Zone 4	10c	3½c
Zone 5	11c	5½c
Zone 6	12c	7c

For example, a 10-lb. package to the 3rd zone costs 9c for the first pound and 2c a pound for the next nine pounds. 9 + 18 = 27c total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

BERRY'S SEED GRADES

In several lines our seeds are graded according to color, size of berries and general appearance. Thus in our better grades you get a finer quality than from the dealer who mixes all kinds together.

World Brand

This is our Extra Fancy grade. It is our purest and highest testing stock. For years it has been the choice of our most exacting and critical trade. We recommend this quality to those who demand the best and invite comparisons to any highest quality grade sold by any dealer.

Dealers Fancy

A high quality. Not quite as fine as the World Brand. It is still a very desirable grade and will pass for the best in many cases.

Planet Brand

This extra choice grade satisfies many customers. Not quite so bright and uniform but they report good seeding at low cost.

Square Brand

Our lowest priced grade. Smaller berried. A little lower germination but more seeds per pound, so it can perform well.

Special Lots

Some seed does not exactly fit into a regular grade or is secured for special prices. These are listed by name such as Lot Leader Red Clover, Honest John Alfalfa, etc.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or pareel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list. If you want farm seeds shipped from Chicago remit Chicago prices as shown in catalog or price list.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank dratt or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have no office at Chicago. Write to Clarinda only. If you want an A.A.A. receipt, ask for it on your order.

COMPARING ATLAS GROWTH WITH HEGARI

ATLAS - 12 Foot

ATLAS SORGO

\$2⁷⁵
100 LBS. BU. 50 LBS. \$5⁵⁰
25 LBS. \$1⁵⁰
NOT SEALED IN LESS THAN 50 LB. BAGS

THE HEAVIEST PRODUCING SWEET SORGO

This is one of the most sensational forage crops ever developed. An enormous producer. Yielded up to 18.7 tons per acre, where corn yielded half as much. In dry seasons out produced corn 3 to 1. Nebraska and other states report it the heaviest forage producer.

A matchless drought resister. Corn if it is severely injured by drought will stop growing. Atlas will start again. In sections where drought completely dried up corn, Atlas remained green. Where grasshoppers almost completely wiped out a corn field an adjoining field of Sorgo was practically untouched.

Atlas makes a highly palatable and very nutritious feed. The juice is sweet and live stock, especially cattle, will leave most any kind of feed to get it. They thrive on it. In dry seasons farmers have brought their livestock through with nothing but this feed and had them fat and sleek in the spring. Makes wonderful ensilage.

State Certified Atlas the Best

There are many varieties of sweet sorgo but we consider Atlas the most profitable to grow. Compare the growth Atlas with Hegari as shown in the pictures on this page. All pictures were taken near Clarinda on the same day. The Hegari was on second bottom the Atlas on upland. Why grow a crop that grows 5 to 6 feet when you can get 10 to 12 feet. Atlas makes a leafy, sturdy growth. Very resistant against lodging. The white seed is very palatable.

We handle only State Certified seed because it is so difficult to distinguish Atlas seed from others. State Certified stock comes from approved seed and fields are inspected. Certified Stock is best and safest to buy.

Atlas must have a warm seed bed. Drill it in with seeds 4 to 6 inches apart, 8 to 12 lbs. per acre are used for single row planting. Cut in fall a little before severe frost. Shock to cure.

BILLION DOLLAR GRASS

A QUICK GROWER AND HEAVY PRODUCER

We have for years been receiving reports from our customers on the big production of this Grass which is also called Japanese Millet. We have heard of its performance on good soil with plenty of moisture, making yields of 26,000 to 50,000 lbs. of green feed per acre and seed yields of 1,000 to 2,000 lbs. In 1937 we were further astonished at its production. It was pretty dry in this section that year but how it did come across. The picture below is of a field of Billion Dollar grass grown by one of our customers here in southern Iowa. Was that farmer pleased. And there were others writing in about their Billion Dollar Grass. Down in Missouri, up in Wisconsin, over in Ohio, they all like it.

A Fast Grower

Makes a hay crop in 6 to 8 weeks. May be sown during May, June or July. We recommend 20 lbs. per acre although some sow less. Grows up to 6 and even 8 feet high. Valuable feed for dairy and young cattle and sheep. Does not become poisonous due to drouth or frost. Generally makes its heaviest growth on fairly fertile moist land.

The seed we have for you is our re-cleaned. Our price on this seed is low. Costs only around 80c an acre for seed.

**NEW CROP
SEED**

GROW IT THIS YEAR

A Most Profitable Crop

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow.

Priced Very Low

Our price on Sudan Grass seed is again very low this year. This crop is subject to sudden price variation and often makes sensational advances about seeding time. We advise laying in your supplies early as we contracted our present stocks on the basis of low markets. Considering quality you should find a big savings in our present quotation.

Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

A Saving Guaranteed

The true basis of value at a bargain price is the quality you receive. We will sell you this seed subject to any test you care to put it to. You can have up to 60 days to satisfy yourself that you have secured a quality lot at a bargain price. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in any way let us know and prompt adjustment will be made in conformance with our guarantee.

It is easy to grow Sudan Grass when you use seed of such fine character. We urge you for the sake of better farm profits to grow some of it this year. It produces enormous quantities of feed in a short time. It keeps right on the job when heat and drought are damaging other crops severely. You get good bargains by buying now.

MIXED MILLET

Serviceable Seed at Low Cost

Here is really a bargain in Millet for a hay crop. It is practically all German type Millet but contains a little percentage of other millets that make it unsuitable to use for seed production. For a hay crop, however, it makes a wonderful seeding and should produce a yield equal to a straight German type. This lot varies a little from bag to bag but is mainly German type stock.

These taller growing, heavy producing, hay millets are in big demand. You can buy this Mixed Millet at a very substantial reduction in price. It will give you a great big practical bargain. This seed is new crop seed of good germination. It is nice bright plump seed. The seed has been recleaned for the removal of impurities and our analysis shows it free of bad weed seeds.

It is not often that we have such a value to offer. The seed was grown with this mixture in it and being purchased at a discount, we can pass it on at a bargain to those who do not care about a pure seed crop but would like to get heavy hay production at low cost.

**10 bu. for
\$13⁰⁰**

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,
S. G. FOWLIE.

SOY BEANS

A Fine Cash Crop

Soybeans are taking their place as one of the important grain crops. They are bought and sold like other grains in many markets. There is no longer much question as to a market for your crop. You can cash in on them like wheat or corn if you do not wish to use them on the farm.

Many farmers do not harvest for beans but rather prefer to take the crop in the form of hay. They produce heavy yields and the hay is of high value being practically equal to Alfalfa in feeding value. No need to be without plenty of rich hay if your clover or alfalfa fails. Sow soybeans. They stand heat and drought and deliver the goods.

Good Profit in Beans

Soybeans are widely used instead of small grain crops and are generally found more profitable yielding up to 25 to 30 bushel per acre. On account of their heavy growth they are not suitable as a nurse crop for grass or clover seedings. Soybeans are legumes. They gather nitrogen from the air for their growth. They have a dense root system and make soils mellow.

The seed we have is cleaned and much more satisfactory and economical than stock containing a lot of split beans. Send us your order for beans. The quality and savings must please you or you can have your money back. See Guarantee Page 8.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows 1½ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Inoculate Your Seed

Inoculate Soybean and Cowpea seed. That helps to secure a more vigorous growth, heavier yields and higher value. Cost is low. Easy to apply. Full directions furnished.

Postpaid prices on Berry's Nodule Germ Inoculator for Beans and Peas: 1 bu. size 30c; 2 bu. 50c; 5 bu. 90c; 10 bu. size \$1.50 and a 25 bu. size \$2.75. Also see page 41.

Types of Soy Beans

Dunfield Type. Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 105 days. Medium sized leaves and stems. An extra good all purpose variety.

Manchu Type. An old standby. Widely grown both for hay and seed crop. Color light yellow with dark seed scar. Stands up well. Adapted to a wide range of conditions. Fine for hogging down. 105 days.

Illini Type. Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

Kingway Type. A Black Soybean of outstanding merit and quality. According to all customers reports it is greatly preferred to Wilson Black or Black Ebony both for hay and seed production. Especially valuable as a hay variety. Heavy producer and excellent quality hay.

Virginia Type. Hay bean. Makes large growth with enormous yields of hay. One of the best for poor land. Seed brownish and smaller than the average. Requires less seed per acre. Prices on Pages 40-41

COWPEAS

This is a money making legume. A soil building and hay crop that is widely used.

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. Our seed stock is good. See quotations page 41. Write for prices on large amounts. State quantity desired. Can ship southern orders from St. Louis.

Cowpea Types

Whippoorwill Type. Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color.

New Era Type. If you wish the earliest of all varieties select this one. Good for northern states or where late planting is necessary. May be planted after small grain for plowing under. Good soil builder. Smaller seeded than Whippoorwill. Use 1½ bu. per acre for broadcast seeding.

Mixed Cowpeas. Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All recleaned stock. We have a big call for mixed cowpeas.

FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to 1¼ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do.

Shipment is guaranteed to please you in every way. Crop limited but our prices low. See page 41. If you are going to be short on feed next spring we recommend this crop very highly.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased. Yours truly,

H. C. STRASEN.

CROPS of SPECIAL VALUE MILLETS

BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Peas, Vetch, Rape, Rye, Barley, Oats. Sow 40 to 50 lbs. per acre early in spring. This is a great pasture combination at low cost. See price list, page 41.

GERMAN OR GOLDEN TYPE

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. Our seed is secured from good sources and we guarantee shipment to please you. See page 41 for prices.

WHITE WONDER TYPE

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white. Makes excellent hay if cut just when seed heads are beginning to form.

Millets make an excellent "catch crop" or to give an extra crop after an early maturing one has been taken from the land.

SIBERIAN OR EARLY RUSSIAN TYPE

Two to three weeks earlier than German. Can be sown later but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Seeds reddish brown. Sow 35 to 50 lbs. per acre.

PROSO-TYPE MILLET

Also Known as Hog Millet—Broom Corn Millet and Russian Wheat.

This Millet is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Order as early as possible.

DWARF ESSEX RAPE

**Reduces Pork Production Costs
Enormous Producer—Grows Quick
Economical—Every Hog and Sheep
grower should have plenty of Rape
pasture**

Sow this liberally and cut pork production costs. Lower pork costs are desirable. That means better profits. Lower your production costs and make still more money. Every hog grower can produce pork at lower costs if he has a good rape pasture.

Rape is exceedingly rich in protein, analyzing as high as 37%. Think what this means when yields run as high as 24,000 pounds of green feed per acre. Young pigs especially need lots of protein if they are to make the most rapid and economical gains. It is far cheaper to grow protein in the form of rape pasture than to buy it in the form of tankage or other feeds.

The seed is cheap, see price list. It only requires 6 to 8 lbs. per acre. It can be pastured in six to eight weeks after seeding. Sow any time from oat seeding until early in July.

Experiment stations recommend Rape highly. It builds big, strong body frames. Cuts down on grain consumption. Gets stock ready for market earlier. Used chiefly for hogs and sheep, but is good for all kinds of young stock. 5 lbs., postpaid, \$1.00. See price list for quantity prices. See page 41 for larger lot prices.

Friends, if you really know the money-making features of this crop you would never be without it. We urge you to try at least a small patch of it.

VETCHES

SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

Scotia,
Nebr.

Dear Sirs:

My father started buying seeds from you in 1898 and I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,
CHAS. KEOWN.

SAND OR HAIRY

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See Pages 40-41.

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber Type. The kind most generally grown and of great value because of its splendid growing qualities.

Early Orange Type. Heavier stalks, more abundant leaves. Head more compact. Heavier yielder but a little coarser.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Sorghum Amber Type. Secured by us for Molasses purposes. Makes excellent sorghum of fine flavor and color. Very juicy. We recommend it highly. We are sure you will be pleased with it.

Red or Orange Type. More after the orange type. Makes delicious mild, clear, light colored molasses. Ranks very high in favor with sorghum makers.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 11c per lb.; 50 lbs. or more, 10c per lb.

GROHOMA

Grohoma Type Sweet Sorgo

Greatest drought resister. Very heavy producer. Cattle like it. Wonderful feed. Grows strong and erect. Most popular forage of recent introduction. Excellent pasture. Drill, double rowed using 18 to 20 lbs. per acre.

Price, postpaid, 1 lb., 25c; 5 lbs., 75c. See page 41 for prices in larger quantities.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

Our Kaffir type grain sorghum is used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of livestock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks, then thresh. Our seed is well graded. Prices are very low on both Red and White Kaffir.

SEE
PAGE
41
for
SALE
PRICES

Feterita

Our Feterita Type Grain Sorghum is a great drought resisting crop. Earlier than Kaffir. Has a higher protein content. A very heavy producer. Grains flat in shape, bluish white in color. The crop is a free stooler. Adapted to a large territory because of its earliness. Makes good hay if seeded 75 to 100 lbs. per acre. For grain about 6 lbs.

Postpaid, Feterita or Kaffir
1 lb., 20c; 5 lbs., 75c

BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture.

One of the best crops for very poor soils. Responds to increased fertility. Does not like lime and should not be sown on very wet land. Can be grown most anywhere north of the cotton belt. Prefers cool weather, especially at blooming time, but is sensitive to frost. Prepare a good seed bed. Sow 3 to 4 pecks per acre. Yields up to 50 bu. per acre depending on conditions. See page 41 for price.

Postpaid, any of above five crops. 1 lb. 20c; 5 lbs., 75c.

HEGARI

Our Hegari Type sweet sorghum is somewhat similar to Atlas (page 10), but does not grow as tall. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 90 lbs. per acre. Postpaid 5 lbs. for 75c. See page 41 for quantity prices.

MILO MAIZE

Our Milo Maize type grain sorghum is similar to Kaffir. The stalks, somewhat more pithy, are considered one of the best drought resisters. The grain makes fine feed. White in color. Follow suggestions given for Kaffir in planting. Milo is a good yielder. Widely used for Chicken feed. It is grown in place of corn in sections of extreme drought. Farmers who have grown these grain sorghums generally want at least a few acres.

See page 41 for prices. Small lots postpaid 1 lb. 20c; 5 lbs. 75c.

BARGAIN PRICES SEED POTATOES

Better Seeds—Better Crops

Most experienced potato growers have learned that it pays them to plant new northern grown seed potatoes every year. The extra yield and finer quality generally makes it profitable to get new northern grown seed each year. It pays to plant better seed. The difference in cost is not a big item. The satisfaction of heavier yields and better quality makes the investment a wise one.

NORTHERN GROWN SEED DESIRABLE

Our experience has been that our customers are best satisfied with northern grown seed stock. Practically all of our seed comes from Minnesota and is a type of seed that we can guarantee to show up to your satisfaction. If you are not thoroughly pleased with your shipment, write us for shipping instructions and a refund. Our potatoes are all secured for seed purposes only. We endeavor to obtain the finest quality to sell at the low price we make.

WARBA—AN EXTRA EARLY POTATO An Extra Heavy Yielder

It is a creamy white potato yet earlier than the earliest red variety grown in Minnesota at the time of this writing. It is roughly about eight days earlier than the early Ohio. Warbas are fine for earliest market or for home gardens.

The Warba is a blocky type of potato similar to the Irish Cobbler. The Creamy skin is suffused with pink around the eyes. Eyes somewhat deep. The foliage is very resistant to disease such as mild and crinkle mosaic. This potato has a wide adaptability, producing its finest texture and quality on soils that are not extremely heavy.

This variety has certainly come up fast in popular favor because of its earliness, yield, color and quality. If you want something extra early be sure to order some of our Warbas.

EARLY RED RIVER OHIO

This is a standard early potato. We know of no early potato in bigger demand as a table variety. They have a fine quality and an enormous producing ability. Early Ohios are well suited to heavy gumbo soils as well as to sandy areas. Its wide adaptability makes it a great favorite.

The color of the skin is pink to light red. Flesh white. The tubers are oval in shape and slightly flattened. Eyes are moderately shallow. Very little waste in peeling. They are easy to dig. Northern grown seed generally matures earlier which is another reason for getting such seed stock. As an all around early, heavy yielding fine quality potato you will find early Red River Ohios hard to beat.

IRISH COBBLER

Also an early potato although about a week later than the Ohios. It is a great potato and the results our customers have secured from our seed has brought us most enthusiastic letters. They report enormous yields and fine flavored quality.

Both skin and flesh are white. It is a blocky type, roundish and slightly flattened. Eyes are relatively deep. Plants are sturdy. An excellent potato for clayey type soils.

The Cobbler cooks dry and mealy. Tubers grow to good size and are good keepers. It is truly a fine potato. You may have grown Irish Cobblers before but we urge you to plant some of our Cobblers this year. Our prices are low and we believe you will harvest a crop that you can really brag about.

GREEN MOUNTAIN

A medium late variety of exceptional quality and fine flavor. Produces heavy crops and is a good keeper. It has a creamy white skin that is slightly netted which is a general indication of fine quality. The tubers are round to oblong and slightly flattened. Eyes are few and shallow. The plant is a very vigorous grower and produces well on both heavy and lighter soils.

The flesh is white and fine grained. Cooks dry and mealy. Retains its fine quality during the winter. It certainly is a dandy main crop variety. For big quantity and fine quality production it is hard to excel.

RUSSET BURBANK

We classify this with the Green Mountain as a medium late variety. Also a quality potato and one of the very best for baking. A moderately long potato slightly flattened with rounded ends. Color of skin is yellowish or golden brown. The eyes are shallow. Flesh is pure white and solid. It is a stronger grower and we consider it better than the average in disease resistance. The Russet Burbank is a heavy yielder. It keeps well and is a very fine medium late potato.

RURAL NEW YORKERS

This is a late potato. One of the best keepers. Has white skin and flesh. The tubers are round to round oval and somewhat flattened. Eyes are shallow. Stems and foliage are dark green.

This variety is exceptionally drought resistant. It is a great yielder and is our choice as the best of the late varieties. It has a wide adaption. We recommend our Rural New Yorker to those wanting a good all around late potato for market or home garden. It combines big yields with fine quality and excellent keeping characteristics. They're good till new crop comes on in the spring.

Small lots, any variety. Postpaid to 4th Zone: 1 lb., 20c; 5 lbs., 65c; 10 lbs., \$1.00.

POTATO TREATMENT

Corona P. D. 7
Costs only 2½¢ bu.

The modern method of checking disease on potatoes. No soaking necessary. Just mix, dip, drain and dry and your potatoes are ready to plant. Controls such costly diseases as scab, rhizoctonia and black leg. Increases yield 15 to 25%. One pound treats 30 to 35 bushels.

Prices: Prepaid, 4 oz. size, 25c; 1 lb., 75c.

Twinbrook
Farm,
Emaus,
Penna.

Dear Sirs:

I have been using your seeds for thirteen years which in itself means quite a lot. I have found your seeds satisfactory and always saved money by buying from your Company. My Sudan was wonderful and your Dakota No. 12 Alfalfa was the only field in the neighborhood that did not show bare spots after the first winter.

Yours,

P. G. Lichtenwalner.

LOWEST PRICES

SEED CORN

OPEN POLLINATED VARIETIES

See pages 2 to 4
for Hybrid Corn

The Open Pollinated corn described on pages 56 and 57 is stock that we secure from reliable parties. It is all well dried, carefully graded stock of high germination. They are early, medium and later kinds. No definite maturity date can be guaranteed as that depends upon soil and seasonal conditions. Our guarantee of satisfactory shipment is given above.

The varieties of Open Pollinated corn listed in our catalog are secured by us under the names given herein. They are not represented as having all the nationally or regionally recognized characteristics for varieties having the same name. It is all corn that we believe will give our customers very satisfactory crops.

GRADES

Our O.P. Corn comes only in one grade which is the Edge Drop or flat grained type. The Hybrids come in the Edge Drop and the small Hill Drop which contains the small rounder kernels. The Large Hill drop contains the larger rounder kernels. All grades have equal yielding ability. Edge Drop is most popular.

ECONOMY OF BETTER SEEDS

Nearly every experienced farmer knows that the seed he plants has an influence on the yield he obtains. Our open pollinated corn costs you only a little over 25c an acre for seed. Such a small expenditure may readily bring you 5 to 10 bushels more corn per acre. Our Hybrids cost only about 75c an acre and has increased yields 10 to 25 bushels per acre. Better seed corn is a profitable investment.

PRIDE OF IOWA

This corn should mature a little earlier than New Perfection and run it a close second for yield. It is a rougher type than our Reids Dent. In size of ear it should average somewhat larger than Reids but not quite as big as the Perfection. It is not a flinty corn. Easily chewed by hogs. We classify it as about a 110 day variety.

This corn should please the average grower who wants corn of medium maturity, that is moderately rough in type. It is a kind of corn that has long been popular with our trade and is a very satisfactory variety of open pollinated corn.

NEW PERFECTION

This is shipped from Clarinda only

This is a large eared yellow corn. It has big ears. The kernels are broad and thick. They are moderately rough. Runs 16 to 18 rows of kernels per ear. Some customers like this big eared type corn better than Hybrid. It is a vigorous grower. The grain has a beautiful yellow color. It is a heavy yielding open pollinated corn. We know of none better. Maturity in this section classified as 110 to 115 day. You can save seed from New Perfection for replanting. We consider this superior to our old Big Perfection. Our seed is Iowa grown. If you want a big open pollinated corn that is not very late we believe you will like this extra well. A very heavy producer. Price 1 bu., \$2.50; ½ bu., \$1.30; ¼ bu., 70c. Postpaid 1 lb., 25c; 5 lbs., \$1.00.

Merko

Corn Treatment
only 3c per acre

Apply as a dust any time before planting. Controls seedling blight and root and stalk rots. Increases germination. Permits earlier planting. One pound treats 8 bushels. Directions furnished.

Postpaid: 4-oz. tin, 50c; 1 lb., \$1.25.

REIDS DENT

There are a number of strains of Reids Dent. They are not all equal in production or quality. We would like to have you plant some of our Reids Dent next to any of your own or anyone else's variety that goes by the same name. Keep careful record of yield and see what you gained by investing around 25c an acre for our seed. That's all it costs you this year.

We select this corn toward a smoother type than the Pride of Iowa. The average maturity is around 105 to 110 days. This corn bears solid compact ears ranging up to 9 to 10 inches long. The grains are quite deep and close set. They have a fine golden color indicating excellent feeding value.

The choice between this and Pride of Iowa depends largely on whether you like your corn toward the smooth or the rough type. Both kinds are extensively used by our trade and both give big production and fine quality corn.

See page 40 for quantity prices.

Small lots postpaid any variety Open Pollinated.

1 lb., 20c; 5 lbs., 90c.

LARGER YIELDS MAKE BERRY'S SEED CORN A WISE INVESTMENT

RED WHITE CAP DENT

This year we have just a limited supply of this famous Red White Cap. It is a cherry red corn with a light colored cap on the tip of each kernel. It is an early maturing variety being generally classified as a 90-day corn. It is highly popular with feeders. Many consider it by far the best early feeding corn they can raise. It is an exceptional producer. Good length ears, medium depth and fairly broad kernels. Gives corn to feed ahead of most any other. We certainly can recommend this distinct, early maturing and heavy yielding corn.

GOLDEN GLOW

A heavy producing early yellow corn. Stalks somewhat taller than the average corn of this early maturity. Very popular with northern growers and those wishing an excellent early feeding corn.

Fine yellow color. Kernels of medium depth. Good, solid, well filled ears, medium size. Prolific yielder. Maturity around 95 days. If you want a good early maturing yellow corn we feel sure you will like our Golden Glow.

See page 40 for prices.

SILVER KING

A very early white, also known as Wisconsin No. 7. Resembles Silver Mine, but the ears, of course, are somewhat smaller and grains not quite so deep. Matures at least ten days earlier. Although earlier, it is a very good yielder and ranks foremost among the early white types. Will outyield yellow on poor soil. It's just the kind of corn many farmers are needing.

FLINTS

Extra early maturing corn. Eight rowed broad kernels. Can be planted close. In demand for early feed or late planting.

Longfellow—A prolific yellow flint. Large wide kernels.

Silver Triumph—A fine white flint quite long eared.

1 lb. any variety on this page 25c; 5 lbs. 75c post-paid.

GOLDEN DENT

We endeavor to secure for our trade in different maturity classes types of corn that will give them big yields of good quality. Better corn than is generally planted. Corn that will make you more money. We do not know of any corn of similar maturity that is better than what we sell as our Golden Dent. We want to please you with our products. See page 41 for prices.

A similar kind of corn is also sold as Early Yellow Dent. It is a little smaller type of yellow dent corn of the Reid Dent Type. May be classed as a 100 day corn. The ears are good average medium size. Kernels are toward the smooth side but it is definitely not a flinty corn. This kind of corn is our biggest seller in the earlier strain. Comes between the Reids and Golden Glow for maturity.

WHITE WONDER

This kind of corn is also sold as Boone County White by some dealers. It is a large eared white corn with a white cob. The ears are sometimes 12 inches long and are large in circumference. It is good solid corn but not flinty. The grains are quite deep and somewhat rough. It produces prolifically. We have no white corn that will outyield it with the possible exception of St. Charles White. It is however grown more extensively for ensilage.

This corn should be classified as a 115 to 120 day. A little later as a rule than the Silver Mine described below. White corn is generally considered best for poorer land. We have heard farmers contend that this kind of white corn is the most profitable open pollinated corn for any kind of land. As one man said, "It was a mortgage lifter for me and it will be for anyone."

Seed corn is a big money-crop. It costs so little to plant an acre. Less than a bushel increase in yield pays the extra cost of planting good seed. Let us supply you. See page 41.

KRUG'S DENT

We consider this corn to rank along with our Pride of Iowa for yield, perhaps somewhat better and still it should run around 5 days earlier in maturity. The original Krugs made a great record in Illinois, outyielding all other open pollinated. It was the best of 118 kinds in the test.

The ears may run a little smaller than Reids but there are lots of them. They are firm and solid. The grain has a rich yellow color. You should find in this corn a combination of relatively early maturity and heavy production. A little later than our Golden Dent, but we believe it will outyield it several bushels per acre on the average. We do not claim it equal to our Hybrids described on pages 2 to 4, but we do consider it a very good open pollinated corn.

SILVER MINE

The most popular white variety in the corn belt. A splendid yielder. Does well on all soils. Best variety for thin land. Maturity about 110 days. Will stand thick planting. Many stalks produce two ears. Pure white grain and cob. Medium rough type. Good shelling percentage. Makes good solid corn. For all around merit it is hard to excel. One of the best varieties for general use in the corn belt. A safe and profitable kind to grow. It makes friends everywhere it goes.

ST. CHARLES WHITE

The Famous Red Cobbed Ensilage Corn

This is an enormous producer having tall leafy stalks and large white ears. The grains are clear white, deep and large in size. Medium rough type. Leaves are broad and succulent. It is used extensively for ensilage in the Northern states. Yields up to 40 to 50 tons of green feed per acre. Grown as a main crop variety in this locality and south. Makes a good milling corn on account of its clear color. Customers tell us it is the most sensational producer they have ever grown or seen. We have some very nice graded and tested seed.

LOW PRICES ON SELECTED, TESTED

SEED OATS

GROW OUR

VICTORY

TYPE

Let us send you a sample of these splendid heavy oats. You can see for yourself that it is one of the biggest grained, heaviest testing oats grown. Big, plump bright kernels. Often weighs 40 to 42 lbs. per bu. If you want to sow something that is really extra nice in appearance you'll get it in this stock. The grains are almost twice as big and heavy as some of the early smaller berried stock. That indicates more meat and a smaller percentage of hulls.

You can order them with the distinct understanding that you will receive one of the finest and most beautiful shipments of oats you ever had on your farm. If they disappoint you just write us for shipping instructions and a prompt refund of your money plus freight charges.

Northwestern Seed Stock

These oats command a premium on the market. There is a heavy freight rate on the seed from the Northwestern territory where they are produced. Many farmers want new heavier seed and you certainly can't find it

Hall, W. Va.
Dear Sirs: I have been buying seeds from you for a number of years for my own use and for the Boulder Farm Club. The seeds have always given entire satisfaction, and we have saved over one hundred dollars by ordering from you.
Very truly yours,
Ira L. Dadisman

BIGGER YIELDS

LOW PRICES ON
PAGE 41

heavier than these. The records of production that this variety has made are most impressive and it has taken many prizes at grain shows. First prize International Livestock show in 1938.

Variation in seasonal conditions will naturally effect production and quality. With a relatively cool growing season it certainly has gone to town. They are not an early variety. The straw is of good length yet has strength to resist lodging. The heads are sprangled and when heavily laden with these oversize grains it is certainly a profitable harvest to gather.

In Big Demand

This Victory Type Oat has been a big seller with us. The seed sells itself through its appearance. Naturally the cost is somewhat higher than of the earlier kinds more commonly grown. Extra production may readily absorb this and give you extra profit besides. We are sure that once you see what these oats are like you will not be satisfied until you have secured some of the seed. Let us send you a sample. See for yourself. See page 41 for prices.

GOPHER^{TYPE} OATS

Here is an early oat we are sure you will like. They are the choice of many farmers and deserve wide popularity. Gopher oats were developed by the Minnesota Experiment station. It is a selection from the sixty day oat. It is a white kernel oat and of an early strain. Gophers were developed to provide a good early variety for the northern edge of the corn-belt. It is suited especially to southern Minnesota and experiments by the Illinois station prove them to be a fine early oat for the northern half of Illinois. It ranked first in a four year average at Urbana with a yield of 70 bu. per acre. This would indicate its adaptability to much of Iowa, southern Wisconsin and Michigan. Also northern Indiana, Ohio and sections having similar seasonal conditions.

Its characteristics are earliness, stiff straw and high yield. Produces somewhat plumper kernels than some other early strains and its white kernels make it a favorite over other early ones with many farmers. We believe you will like our Gopher Type oats and that you will find them a productive oat of high quality.

Suggestions for Getting Better Oat Yields

A double disking before seeding will generally result in better yields than just disking in oats. Drilling is preferable to broadcast seeding. It gives the seed more uniform covering and requires less seed per acre. Drilled oats are more satisfactory for a nurse crop than a broadcast seeding. An early seeding is desirable as it provides the oats with a longer period of cool growing weather. Fertilizers for oats alone may not be profitable but usually pays when grass or clover seeds are sown with it. Seed treatment is profitable. See Ceresan on next page.

SEE PAGES 6 AND 7 FOR ATTRACTIVE PREMIUM OFFERS

BETTER SEED OATS LARGER YIELDS

COLUMBIA

Every farmer we know of who has grown our Columbia Type oat is a booster for them. They are a development of the Fulghum but often superior to them in that they may be sown as much as three weeks later and still be a leader in yield. The increase in production has ranged from 5% to 25% depending on season. Some years other oats do well but the Columbia nearly always ranks a leader.

Columbia oats are also similar to Burt oats but plants are taller, heads longer and more erect, and the straw much stronger. The kernels have light stripes on the back and are usually awnless. It is always one of the earliest oats to mature. Its wide range of seedling dates, its resistance to unfavorable conditions and early maturity make it one of the surest heavy yielding varieties. We recommend this variety strongly because of the satisfaction it has given our customers.

Our seed is cleaned and is priced low. See page 41

CERESAN

Disinfects small grain for two cents a bushel

A dry treatment. Easy to apply. Controls stinking smut of Wheat, covered smut and stripe of Barley and loose and covered smut of Oats. Does not cause seed to lodge in drill. Measuring spoon in each can. Half ounce treats a bushel. Makes for better stands and larger yields.

Many Agricultural authorities advocate its use. We recommend it highly.

**Prepaid 1 lb. enough for 32 bushel only
75c; 5 lbs. for \$3.00.**

FULGHUM

Our Fulghum Type oats are of a quality guaranteed to please you. We consider the Fulghum oat as one of the heaviest producing of the early varieties, especially when sown early. It outyielded other varieties by 12% to 17% in a seven-year test. Kernels are medium size. Golden yellow color. Straw relatively short. One of the best to stand up on rich land and to outyield on thin land as well.

Fulghums are especially resistant against smut. Where Khersons showed 25 to 40% hardly a trace could be found in the Fulghums in the same test. These oats are hardier than most oats. They are sown in the south as a winter oat. Best results in the north come from very early seeding. For later seeding use Columbia or Iowar. We recommend our Fulghum Type oats highly.

SWEDISH TYPE

Our Swedish Select type oats are large heavy grained kernels. Plump, meaty white oats. The stiff straw is fairly long. The grain is borne on spreading heads. Somewhat later than Iowar and Columbia. It is indeed a beautiful sight to see these large heads drooping with a load of these fine heavy grains. And that brings added profits too for oats such as this type has yielded over 100 bushel per acre. With proper weather it is amazing how these oats can produce.

Our northern grown seed stock is well cleaned seed and we guarantee to ship you seed that will please you. If you do not consider it one of the finest lots of oats you ever saw, write us for shipping instructions and refund. We pay good prices to get such seed. Our price is low for this quality. Sow better, bigger, cleaner northern grown seed. It takes good seed to get more profitable oat production.

HULLESS OATS

Big Yields—No Waste—Fine Feed

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grains similar to rye but softer and lighter in color. They are also excellent producers in several cases, having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hulless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported his Hulless oat smut free while common oats were badly affected. In order to help prevent smut we treat all our Hulless oats with copper carbonate to destroy smut spores. This treatment is effective only on Hulless.

Our seed is fine quality, carefully cleaned, and graded. It is a real seed stock. We have attractive prices on these oats this year.

IOWAR

Another dandy early oat. Dependable and very satisfactory. We have a very nice stock of Iowar Type oats. The Iowar variety was originated at the Iowa Experiment Station from a 60 day variety. It is a very fine early white oat. It outyields both the old Iowa 105 and 103. Grows a longer straw than most of the older early varieties. The grains are of medium size and have a thin hull. A fine feeding oat. Has a small black awn on each kernel. This type of oats because of its earliness is grown over a wide area. It is used in southern Iowa and northern Missouri and is a fine selection for sections having conditions similar to Iowa and somewhat further south. It is perhaps the most widely grown type in Iowa and surrounding states. Farmers in eastern states wanting a good early variety should like them very much. It is a real good oat. Our seed is reasonably priced and shipment is guaranteed to please you. See page 41 for prices.

SPELTZ

ALSO CALLED EMMER

NORTHERN GROWN

Great Drouth Resister. Practically Rust and Smut Proof. A Good Producer. Dandy Feeding Grain

This grain is one of the oldest grains known to mankind. It was apparently grown in prehistoric times. German-Russian immigrants introduced it to the United States.

It is a remarkable spring grain crop. Really a type of wheat. Shucks cling to the grain. Generally two grains in a shuck and somewhat softer than wheat. Makes a nutritious feed. The kernels with the hulls removed have about the same composition as wheat. Best as ground feed. Highly resistant against rust and seldom injured by smut. Also an excellent drought resistant grain. A good producer and under drought or rust conditions it is especially a desirable crop. Matures early. Makes a good nurse crop. Grown from Canada to Texas, Iowa, Minnesota, Wisconsin, Michigan and other states are growing it as well as Western States where drought conditions generally prevail.

Grow some speltz this year and show your neighbors what this drought and disease resistant grain can do. Sow in the spring. It is an ideal nurse crop. Sow $2\frac{1}{2}$ bu. per acre. Set drill for oats. Sow early as possible. Cut before dead ripe. Thresh as for oats but not too close. It is a remarkable grain crop. Its nice heavy grains will delight you. Splendid for all kinds of stock.

**PRICES
ON ALL
SEED GRAINS
SLASHED**

SPRING WHEAT

NORTHERN GROWN

THATCHER TYPE

Exceptionally Rust Resistant

Thatcher is a beardless rust resistant spring wheat first released to growers in 1934. Developed by the Minnesota Experiment Station. Has given sensational performance especially in years when stem rust was damaging. Reports during the bad rust years of 1935 and 1937 show yields of Thatcher 250% of New Marquis and over 350% of Red Fife. Think of $2\frac{1}{2}$ to $3\frac{1}{2}$ times as much wheat per acre grown side by side with the other varieties. If you live in a section having rains, morning dews and relatively high humidity by all means grow Thatcher wheat.

Thatcher has a very strong straw. Not as tall as some varieties. Excellent for rich land. Makes a wonderful nurse crop. Matures 2 to 4 days earlier than New Marquis. Heads are short and compact. An excellent milling wheat. It is also quite resistant to bunt and loose smut. This is by all odds the most profitable spring wheat for sections susceptible to stem rust damage.

Our seed is northern grown, recleaned and very nice. Supply limited.

WILT RESISTANT FLAX

Can be grown where ordinary flax fails. Yields 10 to 15 bu. per acre. Crop is in big demand. Sow early 24 to 35 lbs. per acre. Ideal nurse crop.

Thresh like ordinary grain crop. This wilt-resistant is a heavy producer and a good yield of flax seed makes a big paying spring grain crop. Our seed stock is recleaned stock.

Northern Grown SPRING RYE

This is a distinct variety. Strictly a spring grain crop. It is grown for grain, pasture, and hay. No doubt this triple usage is why the crop is so popular. The grain is practically the same as winter rye. It is a good yielder of grain. Good length straw. Sometimes used with Canada Field Peas for hay. Wonderful producer on good land and the best small grain for thin soil. Early seeding gives best result but may be sown later than most grains if necessary. Sow around 2 bushels per acre.

Rye makes a very fine feed as pasture and grain although growth not as heavy as winter Rye. Helps out on the early spring feed problem. We try to figure out the seed demand so we will have enough for our trade without any to carry over. Nearly every year we underestimate the demand so we ask you to order your spring rye early. It is a crop that we believe will please you. It is a money maker and our prices on this northern grown quality seed are very reasonable. See page 41.

Winter Wheat

We have some extraordinary varieties of winter wheat for fall seeding. Some of them are guaranteed to outyield your own stock. Along in July we publish a smaller bargain catalog describing and pricing winter wheat and also Alfalfa and other seeds for fall sowing. If you fail to get a copy of it be sure to write us for it. It will save you money.

Palmyra, Mo.
Dear Sirs:

The two cars of Seed Wheat we bought of you last year to which you gave the Copper-Carbonate treatment, proved very satisfactory and we had a wonderful yield from same. We were specially pleased with your usual prompt service. Having used your seeds for past 15 years makes me feel very kindly to the Berry Seed Co.

Yours very truly,
W. A. Rinehart.

USE CERESAN TREATMENT ON GRAIN. SEE PAGE 19.

BARLEY

SPARTAN

Our Spartan Type Barley of Very Nice Quality

A two-row, smooth awned spring barley. Beards without barbs. One of the strongest strawed barleys grown. Bears large uniform kernels. A fine variety for pearling. Not acceptable as a malting variety. Its unusual strength of straw makes it an ideal kind to sow on rich land. Easy to harvest and because of its smooth awns or beards it is very satisfactory to harvest and thresh. Heavy yields are recorded. It has greater value than some who, although yielding well, are discounted on the market or whose weak straw causes trouble. Spartan Barley is a profitable variety.

Small lots, any variety, postpaid, 1 lb., 20c; 5 lbs., 75c.

LOGLOSS

A Very Fine Type Extra Heavy Yielder

We Are Sure You Will Like Our Iogloss Type Barley

A smooth awned, stiff strawed and high yielding strain of spring barley. It is a malting type. Ripens about the same time as the Velvet. In tests extending from 1930 to 1937 it showed a superiority over both Velvet and Wisconsin 38 in lodging strength. It outyielded all varieties in the test by a very substantial percentage. It produced 7 to 9 bushels per acre more on the average than other widely grown varieties. When you consider that this was the average of a seven-year test its significance is most important. No barbs, strong straw, big yield make Iogloss an exceptionally fine barley.

VELVET

The KIND With SILKY BEARDS

Our Velvet Type Barley Is Cleaned, Graded Stock

Velvet is a smooth awned or barbless spring barley. The awns or beards give the grain some protection yet these beards have no barbs on them. They are as smooth as straw making the crop more pleasant to handle.

Velvet is a malting type barley that is in such big demand. It appears to withstand unfavorable conditions very well. It has a good stiff straw being close to Iogloss in that respect. Its quality and productiveness have made it one of the most popular varieties in the state of Iowa. It is now being grown over a wide area.

In many sections farmers are switching from oats to barley. These improved smooth awned kinds yield more and make more profitable grain crops. Barley has always been the heaviest producing grain in the northern states and this is materially above the average in production.

Barley makes a better nurse crop for grass and clover seedings because it does not shade the ground so heavily and matures earlier. Velvet is one of the most popular varieties.

A VERY POPULAR VARIETY

WISCONSIN No. 38 BARBLESS BARLEY

Our Wisconsin 38 Type Barley Is the Smooth Bearded Kind

This is claimed as an improvement over Velvet-type and has shown a slight edge over it in production. In one test Wisconsin No. 38 outyielded all others with a production of 50 bushels per acre. It is also a spring variety and has smooth beards or awns. It is a fine malting type barley. The straw is generally somewhat shorter than Velvet and a little later in maturing. In Central Iowa it should be ripe about July 15th.

Wisconsin No. 38 shares the popularity of malting types with Velvet and Iogloss. In some eastern and northern states it is even more popular. The straw is not quite as strong but it yields well. In localities where both are equally well known it is about a toss up between the two.

A farmer can scarcely make a mistake in selecting any of the varieties listed on this page. They are all recognized as excellent kinds. We price our barley at close figures. Our guarantee assures you of a satisfactory shipment or your money back. See page 8.

Barley makes a wonderful feed for hogs. It is fattening. Builds nerves, muscle and sinew. Matures early. It is a fine nurse crop. Malting demand creates a good market. Requires only 2 bushels of seed per acre. Grow better barley by sowing better seed.

We advise treating barley with Ceresan. It is a good investment. See description on oat page 19.

ODERBRUCKER

Our Oderbrucker Type Barley Is the Rough Bearded Kind

Also known as Wisconsin 55 Type. A standard malting barley. This, in our opinion, is a heavy producer. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. We endeavor to secure the best of quality at our prevailing low prices. Recleaned seed gives you stock with small stuff removed. Plumper grains generally make somewhat stronger plants. All of our barley and other seed grains are shipped subject to your approval. If in your opinion you have not received an extra measure of value, write us for shipping instructions. See guarantee page 8.

Danese, W. Va.

Dear Friends:
I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

See Page 41 for New LOW PRICES

BROMUS INERMUS OR BROME GRASS

DROUGHT RESISTANT

**Heavily Productive—Highly Palatable
Starts Early in the Spring. Grows Late in
the Fall**

If you are needing a grass that will take lots of punishment and still produce a valuable crop, grow Brome Grass. If you want a grass that is palatable and greatly relished by all kinds of livestock, grow Brome Grass. If you want a grass that can be used for pasture or hay, Brome Grass fills the bill. For drought resistance and early and late growth it is hard to equal. We wish you could talk to farmers who are growing Brome Grass and hear their enthusiastic stories. Or better yet if you could see the crop growing and see the production it can make you would certainly want some of it. It isn't a new grass but its great value is just becoming more widely known. There are stands in Illinois that have stood over twenty years. It has been popular in the west for many years and has become widely grown in the eastern states. From Kansas and the Dakotas on east to the coast. From Michigan and Wisconsin on south into Kentucky. It is being grown as never before and each year the praises for it are better and louder.

Characteristics

Brome Grass is also known as Bromus Inermus, Smooth Brome, Awnless and Hungarian Brome Grass. It is a long lived perennial grass. Grows erect to a height of 3 feet or more depending upon soil fertility. The fibrous roots go deep sometimes 5 feet or more. Highly resistant against drought and cold. Remains green after Blue Grass has turned brown and dry. It is adapted to a wide range of soils. Does well on clay loam and sandy loam soils if not too low in fertility. Stands trampling and grazing very well. Fine to grow with alfalfa for hay and widely used with it and other clovers and grasses for pasture. While permanent it is not difficult to eradicate. If it becomes seed bound a thorough cultivation generally corrects that.

Getting a Stand

Brome Grass is sometimes a little slow in starting. Best results are obtained by preparing a good fine solid seed bed same as you would for alfalfa. Maybe sown either in spring or fall when moisture conditions are favorable to start it. The seeds are large and light and sometimes a little difficulty is had in feeding it through drill spouts. Mixing with sand or dirt or a peck or two of oats per acre helps. Keep it stirred and mixed in the box. An endgate seeder maybe used. Some practice hand sowing. The seed should have a light covering but deep covering should be avoided. Wherever possible use a cultipacker or roller after seeding. Sow about 18 to 20 lbs. per acre alone. In mixture use 8 to 10 lbs. of Brome, eight pounds each of Alfalfa and Brome is a good mixture. Remember it grows slowly the first year. What may appear a poor stand the first year is usually surprisingly good the second.

Start Brome Grass This Year

It will help you get better returns from your pastures. Make those acres produce a larger return. Reduce danger of feed shortage from drought. Sow it with clovers, alfalfa and other grasses for pasture and hay. Get earlier and later pasture. Provide your live stock with grass they eat with a relish.

Let us save you money on your seed bill. We have nice supply of cleaned seed priced to save you money.

Small lots postpaid 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

Alfalfa and Brome—A Great Combination

The two crops are adapted to similar conditions. The palatability of Brome makes it a feed relished by all live stock. The danger of bloat in pasturing alfalfa is reduced. The carrying capacity of an acre is increased. The two thrive together in periods of drought. Makes big yields of hay especially in the first cutting. When used for pasture the Brome takes hold when alfalfa begins to die out. The crop is palatable even if not grazed short. Alfalfa supplies Brome with nitrogen resulting in heavier growth and higher feeding value. The total production of a 13 year experiment in Canada showed a combination of Brome and Alfalfa to yield two and one third times as much hay as Brome alone. There was no tendency noted of any sod-bound conditions when the combination was used. Brome grass from a combination field contained 21% more nitrogen than the Brome from straight grass fields.

\$16⁰⁰
PER 100 LBS.

Farmer Reports on Brome Grass

Elmer Wagner of Ada, Minnesota, says, "It pastures better than Blue Grass. Has seen fields that stood severe pasture for 10 years. As a hay crop I have found it as valuable as alfalfa. Likes it mixed with sweet clover for pasture."

J. T. Dudgeon of Penick, Kentucky, reports he has been growing Brome Grass for more than 30 years. Cattle grazed in different grass prefer Brome to all others. He uses Alfalfa and Brome mixed with highly satisfactory results. All kinds of livestock eat Brome ravenously.

Achenbach Bros. of Washington, Kansas, say it is the only grass they have ever found to take the place of the old time prairie grass. Comes on early, stays on late in the fall and often eliminates weeds. When sown with Alfalfa reduces danger of bloat when pastured. Yields 1½ to 4 tons of hay per acre.

Lack of space prevents giving many more reports but these are indicative of the great value farmers place on this crop.

Experiment Station Reports

Agricultural Experiment Stations now recognize its value and most states in the northern half of the nation have circulars or bulletins describing the crop and its value.

The Illinois experiment station considers it the most drought resistant grass in that state. Also very palatable and relished by cattle and horses. New York recommends it especially for pasture in mixture. Michigan finds it adapted, very drought resistant, highly palatable and especially suited for mixing with Alfalfa for pasture. Nebraska recognizes it as superior to all other cultivated grasses in that state. Iowa finds it of great value. Kansas finds it especially good in the northern part of the tame grass section with hay yields of 1 to 3 tons per acre. South Dakota says it is one of the outstanding grasses in the eastern section.

REED CANARY GRASS

**GROWS
ON VERY
WET LAND
GREAT
DROUGHT
RESISTER**

A Remarkable Permanent Grass of Great Value

Here is a crop that can really "go to town." It's a remarkable crop in many ways and in a class by itself. It grows on extremely wet land, stands a lot of overflow yet withstands drought amazingly well. You should have seen it at the Iowa Experiment Station on upland one dry year. It stood out like an oasis on a desert. Farmers who came to look at the experimental field would spot it as soon as they entered the field. The Reed Canary Grass yielded 3 tons per acre when it was so dry Sudan made only half a crop. Produces 2 to 3 cuttings a year. No wonder farmers were enthused about it. You would be, too, if you had such a crop on your farm.

Grows 5 to 6 ft. High

You almost have to see it grow to appreciate the value of this crop. It is a very leafy grass. And how it can yield. Up to 3 to 5 tons of cured hay per acre from two cuttings. The second crop is even leafier than the first although not as tall. You ought to hear farmers bragging about its feeding quality. We do not consider it equal to alfalfa in feeding value, but some growers claim it is. They report increased milk flow on Reed Canary Grass. Tests show 9.43% protein in first cutting and 11.76% in second cutting. They like it for pasture. They like it for hay and many make good money out of the seed crop.

Grows from Early Spring Until Late Fall

Lots of times you can hardly wait for spring to come and give you pasture. Reed Canary grass starts on the job real early in the spring and keeps at it until late in

the fall. It is well adapted to pasturing after a good sod has been formed. And what a sod it makes especially on wet land.

Reed Canary grown on land so wet cattle would bog down in it, made a sod so strong it would support a team and wagon.

It is a perennial grass with a long life. In Minnesota a field was used for hay crops for 15 years and then 18 years as a pasture. A government report from the Pacific Coast showed it pastured four dairy cows per acre for seven months of the year.

Widely Adapted

You may ask, "Can I grow Reed Canary Grass?" This grass is adapted to all states from the Atlantic to the Pacific in the entire northern half of the country and as far south as into eastern Tennessee. If you have any low wet land there isn't a better grass you can grow. It will change acres that are worthless into valuable acres—real money makers. But it isn't limited to wet land as the Iowa Experiment Station has shown. It has been a real money maker. Used it for hay, pasture and seed production.

You can get all three in one year. First a seed crop. See below. Immediately after a hay crop and then pasture or hay. Sometimes a third cutting. The water table can be practically at the surface yet Reed Canary grass flourishes and it stands a lot of overflow. Again we would repeat that it also shows marked drought resistance. At the Urbana, Illinois Experiment Station for two years it averaged 5 tons of air dry hay per acre a year.

Postpaid: 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

How to Grow Reed Canary

It should have a relatively cool season for starting. Both fall and early spring seeding are widely practiced. Use 6 to 8 pounds per acre. Sometimes it is sown late in the fall so the seed will not germinate until the following spring. Be sure to prepare a good seed bed. Make it fine, smooth and get it well packed. Fall plowing is desirable although spring plowing can be worked into a good seed bed. Late fall seeding may be necessary on some poorly drained soils.

Sometimes the seed is sown during thawing weather in the spring. We suggest a light covering and packing it with a roller. About ¼ to ½ inch is plenty of covering. If weeds get bothersome clip them back. Seedlings are as hardy as those of Timothy and will stand considerable freezing. The growth is not fast the first year. Second and following years give full and rapid growth.

Harvesting Seed

A circular entitled "Machine for Harvesting Reed Canary Grass Seed" by A. J. Schwanter is published by the Minnesota Experiment Station. We believe anyone interested can obtain a copy by sending 25c to the Division of Publications, University Farm, St. Paul, Minn. Small quantities of seed can be harvested by hand.

Profitable Crop

Gordon Aebischer of Chilton, Wisconsin, says, "Hay yields run 1 to 3 loads per acre per cutting." Ordinarily 4 tons per acre in two cuttings. Seed yields range up to 450 pounds per acre. First seeding was in 1931. Have added more since and never had to reseed. Some of the land growing it is subject to overflow for as long as six months at a time.

Money in Seed Crop

Reed Canary Grass will produce 100 to 400 pounds or more of seed per acre. Even if the seed should get as low as 10c per pound that produces a nice extra cash income per acre. You don't have to sacrifice a hay crop for it. Good hay is obtained if cut immediately after seed harvest. It is a profitable crop as hay or pasture even if no seed is saved.

High Points in Canary Grass

Grows on very wet land. Withstands drought. Value of seed crop may run as high as \$90.00 per acre basis 20c price. Gives two to three cuttings per acre. Yields up to 4 and 5 tons per acre. Makes fine pasture. A seeding lasts many years. Comes on early in the spring and grows until late in the fall. Adapted to a wide area. It is a money making crop.

GRASSES

of SPECIAL MERIT

CRESTED WHEAT GRASS

Extraordinary Drought Resister Adapted to Wide Range of Soils

If you want the most highly drought resistant grass, sow Crested Wheat grass. In sections with as little as 10 to 18 inches of annual rainfall and high evaporation it has made a very satisfactory growth. Yields of 3 tons per acre are recorded in more humid sections and seed production up to 900 pounds per acre.

It is a deep rooted long lived perennial grass. A fine stemmed leafy grass. Roots go down as much as 8 feet and are very dense. It does not spread by under ground roots stalks, therefore is easier to eradicate than some grasses. On the other hand it does not become sod bound like some dryland grasses or to deteriorate like others.

Comes on Early—Grows Late in Fall

Starts growing unusually early as it likes cool weather. No amount of freezing or subzero temperatures seem to hurt it. Begins growing in the spring from one to two weeks before Brome Grass which is also an early starter.

Likewise it continues growing later in the fall. During hot weather it becomes dormant but responds quickly to a little fall moisture. It has not been definitely determined how far south it will grow. Has been grown in Colorado and Illinois and is worthy of trials further south and east.

It is under extremely dry conditions that it shows its most striking superiority over other grasses.

Other Valuable Characteristics

It stands close grazing and trampling remarkably well. In one test it was grazed continuously for five years from early spring until late fall without apparent injury. It has proven a fine weed eliminator. A field that was heavily infested with mustard and Russian Thistle was almost totally freed of these weeds after Crested Wheat was established, yet the grass is easily eradicated.

It is relished by all classes of livestock and especially horses. Cures to greenish stems and abundant leafage as hay which is very palatable and highly nutritious. No grass is more winter hardy.

Seeding Suggestions

Prepare a fine well settled seed bed. Rolling or packing are desirable. Use about 10 pounds per acre and sow with grain or grass seed drill. Relatively early spring seedlings when weather is cool and moisture conditions most favorable for quick germination are best. Cover seed about half an inch. In very dry sections cover a little deeper. Rolling is a good practice.

Postpaid: 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

\$16⁰⁰
100 LBS.

RED TOP GROWS MOST ANYWHERE

Seldom Fails to Make a Stand

No other grass will grow under as great a variety of conditions as Red Top. It will grow on soils so poor in lime that most other grasses fail. Next to Reed Canary it is the best wet land grass. It is also strongly drought resistant. Fine to sow on banks to prevent erosion. If you have trouble in getting a stand of grass, sow Red Top—it seldom fails.

It is second only to blue grass as a pasture plant especially in the northeastern part of our country and it grows when blue grass often fails. On sour land we know of no grass to equal it. Red Top and Blue Grass is good for both pasture and lawn purposes. Likewise it is good in hay mixtures and it is widely used in that way.

Adapted to the Entire Country

Red Top thrives from Canada to the Gulf and from New York to California. It is a vigorous grower and quickly forms a turf. Very valuable for use in soil erosion work to stop washing. When used with Timothy for hay it generally increases the yield. Matures at about the same time.

It is a perennial grass. One seeding lasts several years. The seed is small. Around 10 pounds per acre are sown when not mixed. A mixture of three or four pounds per acre is fine in pastures and meadows. May be top sown on old stands to increase production. Early spring or late summer is the best time to sow.

The seed is very small therefore the seed bed should be fine and solid. Take care not to cover it too deeply. Red Top is cheap this year compared with Blue Grass, Orchard, Brome, etc. If you wish to get a grass that is economical to sow and almost sure to get a stand even on poor land be sure to sow some Red Top this year. Use it with Timothy for hay and with Blue Grass for pasture. It will help you get more feed per acre. Check soil erosion with Red Top. It is a crop that can fill an important place on your farm.

Small Lots Postpaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75.

\$13⁰⁰
100 LBS.

Bermuda Grass

This grass is very widely used in the south for lawns and pastures. Stands the extreme heat of southern locations better than any other on soils of a clay or loam character. Grows on sandy soils too but is less productive on them. The seed is quite small. Five pounds sows an acre, although for lawn seeding a heavier rate is recommended. It is not very winterhardy and probably will winter kill north of Kansas and similar locations.

We have a very nice quality of seed for you and we are pricing it on a close margin.

Small lots, postpaid, 1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.90. Not prepaid, 25 lbs., \$6.25; 50 lbs., \$12.20; 100 lbs., \$24.00.

\$6²⁵
for
25 lbs.

Western Wheat Grass

A native American Grass. It is very resistant against extreme cold and drought although will not stand it to the extent that Crested Wheat Grass does. It produces wonderfully well, however, under average drought conditions. Grows remarkably well on Alkali soils. Not suitable on land subject to much overflow. Grows 2 to 4 ft. high and yields are around 2 to 4 tons per acre. Matures a little later. The seeds are larger than Crested Wheat and it requires 15 to 20 lbs. to sow an acre. May be sown alone or with small grain as a companion crop. This crop has certainly come up fast in popular favor in recent years.

Postpaid, 1 lb., 30c; 5 lbs., \$1.40; 10 lbs., \$2.75. See page 40 for prices on large lots, not prepaid.

\$3⁶⁰

25 lbs.

KENTUCKY BLUE GRASS

A Most Valuable Pasture

This long lived perennial grass is well known as an outstanding pasture and lawn grass in a great portion of our country. It is

very nutritious and highly palatable. Grows from early spring until late fall. Makes a fine sod and stands close grazing. Stands a lot of drought, coming out after long dry spells in an astonishing manner. It is adapted to a wide territory and to different soil types. Will stand some wet conditions and some acid but not as much as Red Top. Because of its fine quality it is widely desired for pasture.

Make Blue Grass More Profitable

Blue Grass pasture should be good money makers yet on many farms they are not. That is not the fault of the grass but more often due to neglect. When bare spots show up little attention is given them. It is hoped they may be reseeded by mother nature. Sometimes they are but it is slow. Meanwhile you lose what bare spots might be producing and weeds creep in. Save money by reseeding such places.

Other ways in which you can improve Blue Grass pasture is to fertilize them. Grasses use plant food same as grain. Sow clovers in Blue Grass to give them more nitrogen. Sweet clover is excellent for that. Clip weeds before they go to seed. Disc it occasionally and harrow early in the spring. Do not over-graze it in dry season.

Do not under-graze it. Too heavy a mat of grass may smother the roots. Reseed whenever and wherever the stand is thin.

Seeding Suggestions

Buy good seed but don't pay too much for it. Our prices should save you money. In spite of short crops our prices are low. Prepare a fine, well settled seed bed. Sow in the spring or fall. Spring seedings may be made with a light crop of grain as a companion crop. Often it is best to cut grain for hay so as to give the grass a better chance. Some clover also may be used with a spring seeding. Timothy is sometimes used both with fall or winter seedings. Blue Grass straight is sown 15 to 20 lbs. per acre. In mixtures, reduce to suit your ideas. For thickening thin spots 8 to 10 lbs. are generally sufficient. Whenever possible roll after seeding.

Blue Grass for Lawns

For lawns a very thick stand is desirable and a pound to every 5 or 600 square feet is suggested. An application of commercial fertilizer and a little lime will make a more luxurious growth, give it better color and help keep out weeds such as dandelions.

Small Lots, Postpaid: 1 lb., 40c; 5 lbs., \$1.80; 10 lbs., \$3.50.

\$20⁰⁰
100 LBS.

ORCHARD GRASS

Adapted to a Wide Region—Fine for Shady Places

Orchard Grass is grown in nearly every state in the Union. It is most common north of Alabama and Georgia and eastward from and in Iowa and Missouri. Also grown south and west of these localities. It has soil requirements similar to Timothy and Blue Grass but can be grown in a wider range of climates. It is grown alone for hay and pasture but is perhaps most generally used mixed with other grasses and clovers. A mixture of Orchard Grass with clovers makes fine hay especially for fattening cattle for market. We consider it very good with sweet clover because it grows in the shade of taller plants better than any other grass we sell. Orchard Grass makes best hay if cut when just in bloom. Makes a good aftermath for pasture.

Starts Growing Early and Grows Late in Season

The early starting growth of Orchard Grass in the spring makes it a valuable addition to pasture seedings. It grows luxuriously then and again in late fall it adds to the productiveness of pastures. Add it to Brome, Sweet Clover, Blue Grass, Timothy and other grasses for pasture.

Fifteen to twenty pounds per acre are generally sown when a stand of straight Orchard Grass is desired. The percentage in mixtures is one of personal preference. Sow spring or fall and follow the suggestions given above for Blue Grass.

Sow good seed. Let us send you a sample of our stock. See the liberal savings. Order with the complete assurance of a satisfactory shipment. Return anything that does not please you for a full refund of purchase price plus freight.

Small lots, 1 lb., 40c; 5 lbs., \$1.80; 10 lbs., \$3.50.

\$18⁵⁰
100 LBS.

English Blue Grass

A Grass That Is Widely Adapted

A crop used for hay and pasture. Yields around 2 tons of hay per acre on average land. Grows 15 to 30 inches high. Exceptionally valuable for pastures because it comes on very early in the spring and keeps on the job until late in the fall. Grows well from Kansas and Nebraska east to the Atlantic Coast and from Canada to the Gulf of Mexico. Not critical as to soils. Few grasses can equal it on wet land. Lives longer than Timothy. Seed cost is low this year. Sow about 20 lbs. per acre. It is a profitable crop either alone or in mixtures. Start this grass. You will like it and may always want some on your farm.

See page 40 for prices. Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.40; 10 lbs., \$2.70.

Lot "TIM" Red Top & Timothy

A Popular Low Cost Seeding

Our trade uses a lot of this for top seeding in pastures and meadows, and new stands. Many sow it alone, others add Alsike and other clovers. Adapted to a wide range of soils and climate. Especially good for wet land. Ten pounds an acre makes a full seeding.

Lot "Tim" is Red Top containing some Timothy seed. We secured this seed at low cost and are selling it at figures that make an appealing bargain. The low acre seeding cost and the ease of obtaining stands make this a very popular value. Shipment guaranteed to please.

See price list for other quantity prices. Small lots, postpaid, 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75.

GROW QUICK PASTURE MIXTURE

\$2.00
BU.
25 LBS.

A Popular Mixture at Reasonable Cost

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

This spring may find many farmers short on pasture. This is a seeding that may help you solve your problem. We sell thousands of pounds of it each year. Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost.

Contains Approximately 50% Clovers

The Rye Grass in this combination is a fast grower and affords the earliest feed. Meanwhile the Sweet Clover, Korean and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Korean will reseed for the next year unless the season is too short. The Sweet Clover and Timothy of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Cover seed lightly and roll if possible. A firm seed bed and a light covering are always helpful in getting stands. Sow about the time you sow small grain. Do not use a nurse crop.

Contains
Korean Clover,
Sweet Clover,
Domestic Rye Grass
and Timothy.
Approximately 50%
Clovers, Balance Grasses

PERMANENT PASTURE and MEADOW MIXTURE

Thrifty Mixture

A combination of Grasses and Clovers that give our customers very satisfactory results at low seeding cost. A seeding that lasts several years. Produces a fine quality and variety of feed. Gives a longer pasture season. Some of the crops in it start early. Others grow through hot dry weather and late into the fall. Some stand wet conditions. Others prefer it dry. Under almost any conditions it can give you a stand that is productive.

The grasses in the mixture are Kentucky Blue Grass, Red Top, Rye Grass and Timothy. These are combined with Korean Clover and Sweet Clover. The Rye Grass grows fast and serves as a nurse crop although a light seeding of grain can be used if desired. Red Top is also quite a fast grower and these two grasses provide early feed. The Korean and Sweet Clover are generally ready to pasture by mid summer and on till late fall. The Timothy and Blue Grass also add to the fall pasture.

The grasses are all perennials excepting the Rye Grass. The Korean Clover is an annual but generally reseeds itself no matter how closely it is pastured unless the season is too short. The sweet clover is a two-year crop and it too, nearly always reseeds when in pastures. Thus you have legumes to build up your land, increase the growth of the grasses and improve the feeding value of the pasture. Sow 15 to 20 lbs. per acre.

We guarantee the quality of the seed to show up to your entire satisfaction and can assure you of a good value. Your money back if the seeds or the savings are not fully satisfactory. See Guarantee.

\$5.00
50 LBS.

Master Mixture

A combination of grasses only. Contains no clovers. Many of our customers want such a mixture. Some have clovers of their own to add. Some don't care for clovers. Others want to add one kind of clover and some another. So here it is. A straight grass mixture that we are sure you will like and priced to please you.

Our Master Mixture contains Kentucky Blue Grass, Brome Grass, Timothy, Reed Canary Grass, Red Top and Orchard Grass. These give a variety of grasses and that is what livestock likes. There are other advantages. All of them are perennials. Some start earlier in the spring. Brome Grass takes the heat and drouth exceptionally well. Orchard Grass starts early and will grow well if you happen to have loose soil in spots. Red Top grows most anywhere. Reed Canary stands wet and drouth. Timothy fills in well for several years as the other grasses are getting well established.

Poor thin pastures don't pay their way. They lose money. They become infested with weeds. They start to wash and erode. Thicken up old stands by reseedling. Disc the land, harrow. Sow one of our mixtures and roll or pack the ground. Make new seedlings if old ones are too far gone. See page 25 under Blue Grass for seeding suggestions. Use 10 to 12 lbs. of mixture for top seeding or 18 to 20 pounds for a new seeding. Make those pasture acres profitable. More stock per acre for a longer period of time getting a greater variety of feed.

We use good seed and mix it as thoroughly as we can according to a definite formula. The shipment is guaranteed to please you. If you do not consider it a great value in every way at our low price you may return it for refund plus freight. For quality and value it is a bargain that we are sure will please you.

BERRY'S LAWN MIXTURES

GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 30c; 3 lbs., 80c; 5 lbs., \$1.30; 10 lbs., \$2.50. A pound sows about 500 square feet.

TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 50c; 3 lbs., \$1.30; 5 lbs., \$1.90; 10 lbs., \$3.60. All seed is thoroughly cleaned and tested.

SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade, such as Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 45c; 3 lbs., \$1.20; 5 lbs., \$1.80; 10 lbs., \$3.25.

WHITE DUTCH LAWN CLOVER

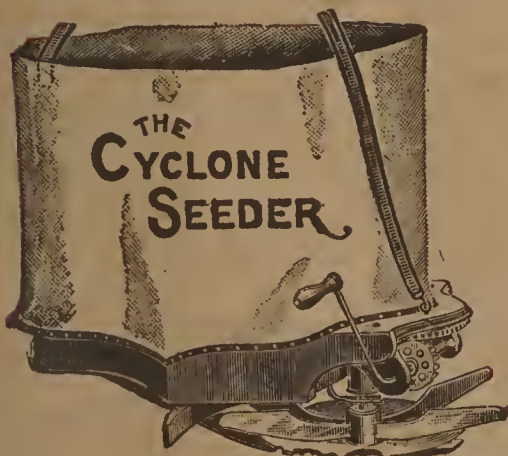

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., 85c; 3 lbs., \$2.40; 5 lbs., \$3.75; 10 lbs., \$7.00. See page 40 for larger quantities.

KENTUCKY BLUE GRASS

The most satisfactory all purpose lawn grass for the U. S. from Nebraska and Kansas east to the coast and from Canada south to Tennessee. Stands drought. Makes an excellent turf. Grows from early spring until late fall. Use Berry's quality Blue Grass. Postpaid price: 1 lb., 40c; 3 lbs., \$1.10; 5 lbs., \$1.80; 10 lbs., \$3.50.

TESTED RELIABLE SEEDERS, CLEANERS AND SEED TREATMENTS

CYCLONE SEEDER

This handy seeder can save you many dollars a year. It saves on seed cost because it distributes seed nicely and therefore less seed per acre is required. It also saves on labor costs as with a Cyclone Seeder you can sow many acres per hour.

Sows Clover, Timothy, Alfalfa, Lespedeza, Sudan, Oats, Wheat and any other seed that is sown broadcast. Can be regulated for any amount per acre.

Its well known double feed insures a uniform flow of seed. Sloped feed board keeps hopper properly filled. Feed adjustment is automatic. Distributing wheel scatters seed evenly. Throws equal amounts to equal distance from operator. Full directions for setting furnished.

Postpaid price \$2.35

HORN SEEDER

Postpaid price 90c

Sows all smooth seeds like Alfalfa, Clover, Timothy, Lespedeza, etc. Patented Brass Seed Gauge regulates amount per acre to be sown and it is reliable. Tube comes in sections or joints that fit tightly. Easily operated.

USE SEED TREATMENTS FOR BETTER YIELDS

Treating seeds like Corn, Oats, Barley, Wheat and potatoes pays. That is especially true when unfavorable weather conditions increase the danger of disease damage. Seed treatment brings larger yields and often a much better quality in the crop produced. The cost is small. For Potatoes it is only 2½c per bu. Corn about 15c per bu. or less than 3c per acre. Small grain treatment is also about 2½c per bu. See catalog pages referred to below for description and prices.

For Corn
Merko—Page 16

For Small Grain
Ceresan—Page 19

For Potatoes
Corona P.D.7—Page 15

SEED CLEANER

Clipper Mills

For Grain—Seed and Beans

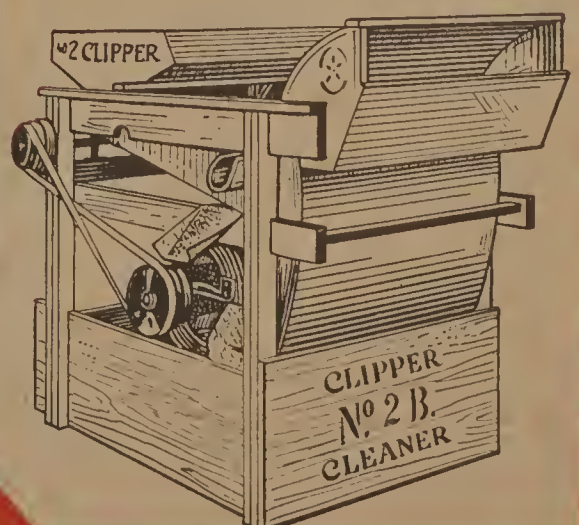

We have sold hundreds of these mills and have never had a single complaint on any of them. They are a profitable investment. With a Clipper you can improve the quality of your own seed and grain and get better prices for your product.

They are sturdily built and well finished. Comes equipped with screens for cleaning Wheat, Oats, Barley, Rye, Red and Alsike Clover, Alfalfa, Sweet Clover, Timothy, Millet, Flax, Peas, Beans, Cowpeas and Soybeans. Grades Corn, Cane, Milo, etc.

Write for Circular giving detailed information on Clipper Cleaners. It tells you all about them. They come in two sizes.

KOREAN CLOVER

\$ **2.00**
BU.

Grows on the poorest land
Wonderful pasture — Excellent Soil Builder.

A VERY VALUABLE CROP

This clover came into use a comparatively few years ago. It is no longer an experiment but a crop of proven value. Its merits and its limitations should, however, be understood so it may be used in the most profitable manner. You should know where, how and when it will grow and how it compares with other crops for hay, pasture and soil building.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches and gullies.

CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana. If it does not reseed itself it will not come up the next year. When it does reseed the stands get heavier from year to year. Korean Clover is not a good competitor of Red and Sweet Clover and Alfalfa. That is those crops are more profitable if they can be grown successfully. But on poor land where those crops do not grow readily, Korean is a very valuable crop.

PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early. We therefore recommend Korean as a mixture for all pastures, new and old. You can thicken up old pastures by just broadcasting the seed during the winter or when the ground is checked by freezing and thawing.

VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much. Sow 12 to 15 lbs. per acre. Land should have fair drainage.

SEED QUALITY AND PRICES

All Korean Clover looks very much the same to inexperienced eyes. There is, however, a lot of difference in quality both in purity and germination. Off quality seed looks all right and can be purchased for less money. Insist on the best if you want to succeed.

Our stocks are new crop and of good quality. Considering quality we guarantee our prices lowest. We have quality stocks that are bargains.

Write for free circular on these Lespedezas.

INOCULATE YOUR SEED

Inoculation helps get bigger and better stands. Cost is low. A bushel size package inoculates two 25-lb. bushels of Lespedeza. 1 bu. size, only 30c; 2 bu., 50c; 5 bu., 90c.

GIANT INCARNATE

CRIMSON CLOVER

OR

\$ **7.80**
BU.
60 LBS.

This clover resembles Red Clover more than any other except Mammoth. Valuable for pasture, green forage, hay and especially for quickly restoring worn out soils.

Giant Incarnate Clover forms upright branching plants, often 2 to 2½ feet in height. It roots very deeply and is a bountiful provider of nitrogen. It grows most luxuriantly on fertile loam, yet it will thrive better on thinner and poorer soil than Red Clover. It is more efficient for green manuring than the latter. Plowing under a crop of Giant Incarnate has been estimated to equal 20 tons of manure to the acre. After hay crop was removed one authority states the stubble plowed under is equal to 12 tons of manure. It is the cheapest source of nitrogen. E. R. Lloyd, Agriculture Expert, states, "When plowed under will add from \$25.00 to \$30.00 worth of nitrogen to the soil." It has restored to profitable agriculture thousands of acres of poor land.

Crimson is used most extensively in the south as a fall sown crop. We suggest only spring seeding in the north where it lives as a quick growing annual. The growth in the north depends upon seasonal conditions. Sowing without a nurse crop should give best results. That permits it to escape exceedingly hot weather. Prefers a cool growing season. Maximum growth should be obtained in July. Shipment guaranteed to please you.

Postpaid, 1 lb., 35c; 5 lbs., \$1.50

KOREAN LESPEDEZA

EARLY STRAIN No. 19604

This strain of Korean can be grown further north. Grows taller. Matures seed earlier. Best adapted and most productive for Iowa and similar conditions. Amount of seed still very short. Sow it this spring. Harvest seed crop this fall. Produced over 1000 lbs. of cleaned seed per acre. Grew about 2 feet high during dry year of 1936. Stands heat and drought in an amazing manner. This is a coming strain. Get in on the big money. Sow some this year. We have only a limited quantity. No more at this price when it is gone. Order at once.

1 lb., postpaid, 75c; 5 lbs., \$3.00; 10 lbs., \$5.50, see page 41 for quantity prices.

SERICEA LESPEDEZA

A perennial Lespedeza. Comes up from roots in the spring. Has wintered as far north as New York. Grows on very sour soil without lime. Grows taller and coarser than Korean. Very leafy. Highly drought resistant. High feeding value. A great soil builder. Sow about 6 to 8 pounds per acre, about April 15th in latitude of southern Iowa. Wants a solid seed bed. Cover seed lightly.

Seed supply is still limited. All prices are for prompt orders. See page 40.

Small lots, postpaid: 1 lb., 50c; 5 lbs., \$2.25;
10 lbs., \$4.25

Watson, Missouri.

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL.

All Domestic Grown

All of the seed is hardy U. S. grown and qualified as to origin, North Central region, for benefit payments. Here is a mixture with an abundance of hardy clovers. Priced to provide very low seeding costs and yet give you a rich clover seeding. Averages fifty percent by weight in clovers. When sown at 12 pounds per acre should give you an average of 45 to 50 clover seeds per square foot and you have the Timothy besides. Think of making such a seeding at a cost of \$1.20 per acre for seed.

Quality Guaranteed to Please

We will gladly send you a representative sample of our Marvelous Mixture so you can see the quality of this seeding. Or you can order it with the assurance that you will be well pleased. As with all our grass and clover shipments you can take up to 60 days time after you receive the shipment to have any test or analysis made. Then if you are not satisfied or if you do not believe you have made a big savings you can return the shipment and your money plus freight charges will be refunded.

A Seeding That Lasts Several Years

Such a combination of clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops, Fine quality and Big savings in cost. Many use it as a pasture. They stock it heavily and get feed of excellent value. The alfalfa seed in the mixture helps to establish the crop on your land. The sweet clover opens up the soil and adds much nitrogen. The Red and Alsike fill the lower growth and the Timothy supports them and adds to the weight and growth of all. It is a great seeding and it is no wonder our customers are enthusiastic about it.

Start the Profit Maker

You, too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of clovers is a joy to behold. We sell thousands of bushels of Marvelous Mixture every year and with present low prices on such a combination of all home grown seed its sales should smash all previous records. We will protect prices until seed is sold or market advances make duplication impossible. Get the best bargain now. Sow around 12 lbs. per acre.

A Few Who Speak for Thousands

It is the experience of our customers that gives our Marvelous Mixture its strongest endorsement. It is the heaviest producer we have ever developed. High in feeding value. Rich in soil building elements. Suitable for hay and pasture. Low in seeding costs. It makes an ideal combination for thousands of farmers.

Saves 50% at Berry's

Stratford, Wisc.

Dear Sirs:

I was more than pleased with the seeds I bought from the Berry Seed Co. Never had a finer stand of hay. Sowed Marvelous Mixture this spring, and the seeding looks very good. I feel I saved about half by buying from this Co.

Yours truly, THEO ROGGENBAUER.

Yield and Quality Fine

Catawba, W. Va.

Dear Sirs:

I have been using your Marvelous Mixture of grass seed for more than eight years with satisfaction. The quality and yield has never disappointed me, and can heartily recommend to others desiring good seed.

Yours truly, WILLIE L. ROBE.

Good Stands—Big Yields

Hillsdale, Wis.

Gentlemen:

We have been using Marvelous Mixture grass seed on our farm near Blue River, Wis., for a number of years and have been well pleased with the results. Have had the best stand and best yield of any seed sown for several years.

Yours truly, G. L. POUND.

Splendid Hay—Lots of It

Martinsville, Ind.

Berry Seed Co.

Dear Sirs:

I find your Marvelous Mixture makes splendid hay and I got 21 loads off of 9 acres first cutting and 11 loads of fine Alfalfa this year in second cutting. In 1928 I bought one bushel of Kansas Grown World Brand Alfalfa, and it is still fine field of hay and thick as ever, so I have been using your seed ever since.

(Signed) W. L. COLEMAN.

Marvelous Satisfies

Kent, Ohio.

Dear Sirs:

I had good results with your Marvelous Mixture, very heavy crop and good quality. Your Marvelous Mixture is my choice. There is no guesswork about this seed. I have recommended it to a good many friends and neighbors.

Yours truly, J. B. SMITH.

HONEST JOHN
FOR FINE STANDS
BIG CROPS ~ LOW COST

Only
\$11.90
BU.
60 lbs per bu.

GENUINE HARDY CORN BELT STOCK

SEE
PAGE 42

Origin qualifies for North Central agricultural conservation program. Serviceable seed priced extremely low. We believe this to be absolutely the lowest price at which you can buy seed of this character. It has purity and germination tests that we have found adequate to produce good heavy stands. And our customers have found it so. The saying "thick as hair on a dog's back" indicates the character of reports we have from many customers. People write us "we want some of your Honest John because we saw what it did for our neighbors. They had better stands than we did from much higher priced seed."

This Honest John is the same in hardiness as any of our Corn-Belt stock. It should yield as well and last as long. The appearance of the seed, however, is not as nice as the higher priced lots. The color is not as good nor the berries as large. If you do not object to a lack of uniformity so long as it can produce satisfactory results, then the seed should please you. It is a seeding that pleases thousands. Sow 15 lbs. per acre. There are more seeds per pound than in larger berried stock.

TWO OUTSTANDING ALFALFA VALUES, BUY NOW!

GENUINE MINNESOTA GROWN

GRIMM NORTH
Lot
Approximately 99% Crop Purity

FROM THE "ORIGINAL" GRIMM FIELD STATE-SUPER HARDY STOCK

This Lot North comes from Minnesota, the home of the original Lymans' Grimm field. In this northern state damaging extremes of weather kill out the weaker plants and leave only the most rugged ones to produce seed. That means an extremely hardy type of stock and we consider such Grimm especially desirable. It is in big demand and is selling at premium prices in many places.

Wherever conditions cause much trouble with winter killing, Grimm should be used. Here is a lot of nice quality seed that is priced to make it an extraordinary value. We secured this seed at a low figure. It is priced so you can secure a nice saving by acting promptly. Don't wait.

Lot North has the high quality characteristics. Good color. Smooth uniform berries, 99% pure including around 2% to 4% crop seed which is principally Red Clover and Sweet Clover. Good germination. A vigorous growing type. We'll gladly send you a sample. Compare it with the best grades. Consider the hardy character of this seed. Your saving should run around \$2.00 to \$3.00 per bu.

This is not our lowest priced seed. Other lots are described on pages 31 and 42 to 45. They are all fine values but this is such an outstanding bargain that we give it our special recommendation to all who want Genuine Minnesota Grown seed and do not object to a small percent of crop seed.

All Hardy U. S. Grown Seed

We always delight in showing critical customers our World Brand quality Grimm Alfalfa seed. When they compare it with other similar quality seed and then compare prices it is really not necessary to say much more. This quality is prepared for our most critical trade. Our best Corn-Belt Grimm seed goes into it. It contains high colored seed and plump berries. It is our purest grade. It has satisfied exacting customers for years and its value should appeal to every thrifty buyer.

Grimm Alfalfa is generally hardier than Common and wherever winter killing is prevalent, the Grimm is the kind we advise buying. Customers say they get a finer leafier growth and appreciate the measure of value in our World Brand Grimm.

\$15⁹⁰
BU.

WORLD BRAND QUALITY

If you are an old customer you know that World Brand means our finest and best. There is a sample of World Brand Red Clover enclosed with this book. That will show you the Character of this grade and what kind of seed you may expect when ordering World Brand Corn-Belt Grimm. No matter how exacting you are the seed is guaranteed to please you. Yet our price is not a premium price. Make comparisons. Judge for yourself. If after you receive your shipment you do not consider that you have saved \$1.50 to \$2.50 on every bushel, ship it back and we will refund your money plus freight. A guarantee of savings and satisfactory shipment backs every order we ship. Why pay more for this fine quality seed than Berry's Direct to you prices.

DAKOTA No. 12 ALFALFA

WORLD BRAND QUALITY

Dakota No. 12 has long enjoyed a wide popularity. The seed we have for you this year is of World Brand quality and Nebraska grown stock. Consider the high quality of this seed. Ask for samples. Compare values. Thrifty quality buyers should delight in this quality bargain. The price should save you around \$2.00 on every bushel. Shipment guaranteed to please you.

Our Dakota No. 12 alfalfa is not Grimm but is considered by many farmers to be equally hardy and heavier in production. We have many customers who will buy nothing else. They claim it out-yields others and takes a lot of punishment. Seed of Nebraska origin comes from plants that have survived wide variation in climatic conditions. Extremes of heat and cold are damaging and drought also takes its toll of weaklings. We consider therefore that in this seed you will secure a type of stock that will give you most satisfactory performance and a stand of rugged character. Supply limited. Early buying is advised.

\$15⁰⁰
BU

**UNITED
STATES
GROWN**

**RED CLOVER
LOT LEADER**

99% PURE Including 4% Crop Seed

A SEEDING MANY FARMERS PREFER

Many farmers prefer it because it gives them a high quality seeding at a substantial saving in cost. This Lot Leader is very nice quality domestic grown seed. It is just as fine in looks as the sample of our World Brand Red Clover enclosed with this book. Bright in color and plump in berry. It is practically the same in germination. Very few would notice there was any difference between the two.

But you know there must be a difference because of the lower cost. We bought this seed at a lower price because it contains some crop seed. By crop seed we mean seeds like those of Alfalfa, Alsike or Sweet Clover. There is only around 4% of these crop seeds in this lot and including that this seed shows a purity of right around 99%. That little crop seed does no material damage, yet because of it we can sell it to you at this unusually low price.

Quality at Reduced Cost

Aside from the small percent of crop seed you do not sacrifice anything in quality under our World Brand Grade and World Brand is known to tens of thousands of farmers as a most dependable grade of high quality seed. We invite you to compare this value on a quality basis with any obtainable anywhere. Buy it, and if you do not believe you have saved \$1.50 to \$2.50 a bushel, quality considered, fire it back and get your money plus freight refunded. This is a value you will find it difficult to match.

Suitable for Conservation Program

Most sections of the United States require that hardy domestic seed be sown for benefit payments in the AAA program. This Lot Leader and Just-Rite are both hardy home grown seed. It contains no imported seed nor seed from the Pacific coast or from the south. This seed should be hardy anywhere in the U. S. A.

Lot Leader should give a good stand when sown at the rate of seven pounds per acre. Some sow less and report good stands. With such seed so low in price it will pay you to sow a liberal acreage. If you are in the AAA program you get paid for sowing it, and if you are not in it the benefits to be secured from a clover stand are far greater than its cost.

Seeding Suggestions

Do not use too heavy a nurse or companion crop. That is the cause of a lot of failures from stands that started out in nice shape. Sow only a half to a third as much grain as normal. Thin stands of grain produce surprisingly heavy yields. Pasturing grain instead of harvesting it often gives the best clover stands. Make sure your seed bed is firm and well settled. Use a roller after seeding wherever possible. Inoculate your seed. See page 41.

**A MONEY SAVING SEEDING
LOT JUST-RITE
RED CLOVER
WITH ALSIKE and TIMOTHY**

\$8.40
BU.
60 LBS.

All Home Grown

We have prepared this seeding because a number of our customers have given us enthusiastic reports on it. It also fills a very definite need this year in providing a lower cost seeding and yet one that gives highly satisfactory results. All of the seed is U. S. grown hardy stock thus qualifying for benefit checks in the No. Central agricultural conservation program. The seed is recleaned stock. You have quality here at a lower acre cost.

Contains Approximately 60% Clovers

Lot Just-Rite is made up by combining approximately 40% Red Clover, 20% Alsike Clover and the balance Timothy seed. When you sow this seeding at 7½ pounds per acre you should have an average of around 21 Red Clover and 24 Alsike Clover seeds per square foot in addition to the Timothy. You know that is plenty to give you a fine stand of clovers. The Timothy holds these clovers erect. The blending of the Red and Alsike makes a dense, deep mat of clover that can yield "to beat the band." This really is a "hammer" and Just-Rite is a good name for it.

All New Crop Quality Seed

We haven't tried to see how cheap we could make this. We have made this seeding from very good seed and then priced it low. It is composed of cleaned seed and carefully blended. It is a quality that has the ability to produce good stands.

In Lot Just-Rite you have a seeding to produce a crop that can be used for hay or pasture. A crop that will check soil erosion. It is an adapted seeding and a good one, yet the acre cost is very reasonable. This seed is priced to save you \$1.00 to \$2.00 per bushel. If you don't believe you saved at least that much you can return it and get your money back.

RED CLOVER

**Hardy
U. S. Grown**

See Sample enclosed for representative quality.

Examine the enclosed sample for purity. It tests right around 98½ to 99½% pure. Note the fine color and size of berries. This sample is representative not only of our finest Red Clover but of our World Brand grade in other lines. You are always assured our extra fancy quality when you order World Brand. It has satisfied our most critical customers for many years. It is distinctly superior to the so-called best grade of some dealers.

ECONOMICAL AND SATISFACTORY

This quality pleases because of the results it can give. It requires less seed per acre than country run or poorly cleaned lots. A bushel goes further. Produces crops that are generally more uniform, vigorous and productive. This seed is priced very low considering its fine quality. If at any time within 60 days after you receive shipment you do not consider you have saved \$1.00 to \$2.00 a bushel, write us for shipping instructions and a prompt refund.

THIS SEED IS HARDY U. S. GROWN

It is new crop, hardy anywhere in the United States and suitable for the AAA conservation program. North Central Region. Compare sample with any you can find anywhere for appearance and quality. Such seed is worth premium prices.

You will find other grades of U. S. grown Medium Red Clover described on page 9 and priced on page 40. Lot Leader and Lot Just-Rite described on the page opposite this are also U. S. Grown. Postpaid 1 lb. 45c; 5 lbs. \$1.75; 10 lbs. \$3.00.

GETTING GOOD STANDS OF CLOVER

Use Berry's World Brand Seed. Avoid heavy nurse crops. Cover seed lightly. Roll if at all possible. Inoculate seed. Inoculation pays well and costs little. Price ½ bu. size 30c; 1 bu. size 50c; 2½ bu. size 90c. Also see page 41 on inoculation.

MAMMOTH RED CLOVER

U. S. Grown Seed, Priced to save you money

Critical and thrifty buyers are served alike in our World Brand grade. The quality meets demands of our most critical trade. Our low price satisfies the sense of thrift. There is always true economy in such a value.

Here is our extra fancy, northern grown Mammoth. It is re-cleaned and tested. It has size and color that indicate strength and vitality. Has a high purity. Such seed goes farther. It is far cheaper and more satisfactory than most average seed.

Our World Brand seed gives you better assurance of clean, heavy, healthy stands. That means larger and more profitable crops. This is a very fine value. Limited crops and advancing markets make it advisable to order what you need early. See page 9 for description of other grades and page 40 for prices.

Mammoth Clover is a large variety of Red Clover. It lives longer. It is also known as Sapling and Big English Clover. Superior for soil building. Extensively grown when seasons are too short for two cuttings and wherever an extra heavy crop is desired. Buy early. We look for higher markets.

Auburn, Mich.

Gentlemen: I find you always live up to your advertisement, "Quality seeds at lowest prices." Your clover is putting my soil back to profitable land and at your low prices we can plant more of it.

Yours truly,

August Krieger.

**A
SENSATIONAL
VALUE**

ALSIKE CLOVER

WORLD Brand

\$13⁵⁰—
BU.
60 LBS.

This is a clover so valuable, so adaptable to conditions unfavorable to other clovers that many farmers are passing up a good bet when they do not use it. In this World Brand you secure our finest quality. Highest in color and plumpest berries. The grade that has satisfied our most critical trade for years. All hardy U. S. Grown seed.

Alsiike is a fine stemmed perennial clover. Higher in feeding value than Red, greener in color and less dusty. Under favorable conditions stems grow 3 to 5 feet long. Prefers loam to heavy soils. Grows on land too sour for red and is extra winter hardy. It is excellent practice to sow a couple of pounds of alsike per acre with Red. Helps to secure a better stand and a thicker growth.

Alsiike is economical to sow. It is a smaller seeded clover, 5 to 6 pounds per acre is plenty to sow. Use it alone or with other grasses for hay and pasture. Stands trampling. An extra good clover for pasture and makes wonderful hay.

Alsiike is grown from Oregon to Maine and from Minnesota to Tennessee and other southern states. In the south is used largely for pasture on lower ground. North and east it shows its great value as a hay crop. Extra good on wet land, stands a lot of overflow. Its use however, is by no means confined to wet land. It is generally easier to get a stand of alsike. Compare our values. Although the seed is relatively scarce we have very low prices and can save you money on this our finest quality.

Postpaid 1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

LOT MERIT ALSIKE

This lot of Alsiike sells at a substantial discount under our World Brand simply because it may have a little White Dutch Clover or Red Clover in it and a small percent of Timothy. Will average 90% or better pure clovers. Free samples on request will show you just how nice this seed is.

You will like it for hay and it is very good for pasture. If you are making a new seeding you should like it and it is fine too for top seeding on old meadows and pastures. If you are making up a pasture mixture with other grasses you can use Lot Merit. It helps to reduce seeding costs and it is a value we are sure you will appreciate. Return seed for refund if you are not completely satisfied. See guarantee page 8.

To succeed best with Alsiike and other clovers make sure your seed bed is firm and cover seed lightly. Some harrow to cover. Others only roll. Rolling is excellent practice. Seed should have some covering but not much. Don't use too heavy a nurse crop. That kills lots of clover seedings. Pasturing the nurse crop often gives the best clover stand and especially in dry weather.

\$12⁰⁰—
BU.
60 LBS.

INOCULATE ALL CLOVER SEED

The cost is small and it generally produces healthier, heavier stands. See page 41.

Postpaid Price: ½ bu. 30c; 1 bu. 50c; 2½ bu. size 90c.

Lot ECONOMY ALSIKE WITH TIMOTHY

A special lot and a seeding that our trade takes to in a big way. Low in cost yet heavy in production. A bushel (60 lbs.) sows 7 to 8 acres. Costs only around \$1.00 per acre. Eight pounds averages approximately 60 alsike seeds per square foot. Then you have the Timothy in addition to hold up the Alsiike. Helps it grow taller and adds to the yield. The Alsiike helps the Timothy make a better growth and have higher feeding value. Produces heavy crops of hay and a valuable pasture.

Lot Economy generally contains 50% or more Alsiike. This is mixed with the Timothy to make a blending and quality that our customers consider a real bargain and a money-making seeding. Do not confuse this with the average combination of Alsiike and Timothy. It is richer in clovers. You get 60 pounds per bushel not 45 and it requires less seed per acre.

Shipment is guaranteed to please you. You can cut your seed bill. The seed is U. S. grown and hardy anywhere in the U.S.A. If you want to make an adapted seeding and an economical one order Lot Economy. We are sure you will be well pleased.

Dorset, Ohio,
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,
LAWRENCE S. GIDDINGS.

\$7⁹⁰—
BU.
60 LBS.

WHITE DUTCH CLOVER

The low growing white clover so widely used in pasture and lawn seedings. It is a perennial that roots at the joints. Will withstand acid conditions and poor drainage. Does not require rich soil but responds well to fertilizer. Pasture and lawn grasses make better growth with the clover than when grown alone and they contain more protein. The seed is very small. Two to three pounds makes a good mixture in pastures. Even one pound helps a lot. Lawn seedings require a heavier rate.

White Dutch Clover is very scarce this year. Our prices low considering conditions. See page 41.

Small Lots, Postpaid: 1 lb., 85c; 5 lbs., \$4.00; 10 lbs., \$7.50.

\$9⁰⁰—
¼ BU.
15 LBS.

TIMOTHY WORLD BRAND

Highest Quality—Iowa Grown

Timothy is coming back and coming back strong. Men who condemned it as a crop of little value are using the soft pedal now or advocating its use again. Its value in checking soil erosion is again appreciated. It is being sown more and more with alfalfa to increase production. Because of its low price it will be widely used in combination with other clovers. Straight Timothy seedings will be made for pastures and meadows. It will be a great Timothy year in 1940.

Berry's Quality Prices Low

Located as we are at the door of one of the World's greatest Timothy seed producing sections we have a better opportunity to get the best. Our buying costs are low. Transportation is a small item. For years we have been large handlers of Timothy seed. Our machinery is designed to handle it efficiently. Our experience has taught us much. We handle a large volume. All these factors combine to make our prices low and quality extra nice.

More for Your Money

Our World Brand grade is extra fine. That is what our most critical customers have been demanding and using for years. We have other grades too, Fancy, Planet and Square. See page 9 for description and page 40 for prices. A quality and a price to meet every need and a genuine saving guaranteed on each one. Return for refund if shipment not satisfactory. Buy direct. Save Money. Get that extra measure of value and ease the strain on your pocketbook.

Single pounds, postpaid, 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

SQUARE BRAND TIMOTHY

\$2³⁰
BU.
45 LBS.

This is a very serviceable grade of recleaned Timothy seed. It has good purity and germination and the ability to produce fine stands. It sells for less money than our World Brand grade because it isn't so nice in appearance. It contains some lighter weight seed and some lots with a larger percentage of hulled seeds are blended in. Therefore it is not quite as bright or uniform in appearance. This Square Brand will compare very favorably with much seed used. When compared with our World Brand you will see it is not quite as nice looking.

Costs Only 55c an Acre

A bushel will sow 4 acres nicely. Timothy is one of the surest seedings. It is adapted to a wide range of soils and climate. Gives you protection against soil erosion at low cost. It is a small investment that buys profitable returns. Don't risk the wastefulness of thin stands of grass when it costs so little to get a good one. Provide for bigger yields and better soil protection by sowing Timothy this year. This seed is good sound merchandise of good practical value.

Stoddard, Wisconsin.
Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand, the other failed. You saved me money and I got better results.
Yours truly, ALBERT J. JONAS.

\$2⁶⁰
BU.
45 LBS
**THIS GRADE
VERY
PURE**

DOMESTIC RYE GRASS

Fast Grower—Big Yielder

Domestic Rye Grass is rather light green in color. Leaves are a little broader than Blue Grass and grows much taller. Requires no nurse crop. In fact it grows so fast it is often used as a nurse crop for other slower growing grasses. Do not confuse this with Rye that is sown for grain. It is entirely different. The seed is somewhat like that of Blue Grass only larger.

If you need early pasture or hay, something to sow early, use Domestic Rye Grass. A full seeding is 25 lbs. per acre. Some sow less. Prepare a good seed bed, cover seed lightly and roll if possible. Sow alone or in mixture.

Our Grow-Quick Mixtures (see page 26, a good percentage of this valuable grass. Buy now. For present prices see page 40.

Small lots, postpaid: 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

VARIETIES AND TYPES

SWEET CLOVER

That which we formerly listed as White Sweet Clover is now designated as Sweet Clover only. The reason for this is that in nearly all the main seedling producing sections some yellow sweet clover has gotten into the fields. While in many instances the percentage of yellow is small it is still technically a question about selling it as straight White Blossom even though much may be all white. The White lives two years. May grow 6 feet high if uncut or not pastured. Has big powerful roots that go down deep. They decay quickly when crop is plowed under. It is a wonderful crop for pasture, soil building and produces heavy crops of hay.

Grundy County Type—Does not grow as tall as the common Sweet Clover generally not exceeding 3½ feet. Matures about 3 weeks earlier. See page 37.

Yellow Type Sweet Clover—Lives two years. Matures between Common and Grundy County. Finer stemmed and leafy. Mostly all yellow blossom. See pages 37 and 39.

Hubam Type—An annual Sweet Clover. Makes complete growth in the same year it is sown. In big demand when quick growth is desired. Blooms, bears seeds same year sown. See page 39.

SWEET CLOVER

An Economical Soil Builder

This year Sweet Clover is proportionately much lower in cost than Red Clover or Alfalfa. The acre seeding cost is much lower and it will be widely used. It is not only cheaper but it excels other clovers in its soil building power and in its capacity as a pasture. It is a far better drought resister than most clovers.

Supplies of seed are not large in the face of enormous need. It is our opinion that Sweet Clover will show the largest percentage of market advances of any item in the seed line. According to our best judgment you will make a substantial extra saving by buying your seed early.

Rebuild Your Land Now

Sweet Clover is an ideal crop to use for building up land. It surpasses all other crops in its quick soil building powers. It stores large quantities of Nitrogen in the soil, increasing fertility. It adds vast quantities of humus. That helps to stop erosion, makes ground easier to work and less apt to dry out hard. The bacterial life in the soil is increased so that plants will thrive better. A crop of Sweet Clover plowed under is equal to 25 big loads of manure.

A Very Valuable Pasture

Then again it is a wonderful pasture crop. Can be pastured the first fall with one to two head of cattle per acre. Three to four head the second year is no exception and you put on hogs besides. Even then you may have to clip it to keep it down. Less danger of bloat and with a straw stack accessible to stock practically no danger at all.

Sweet Clover generally makes a hay crop the first year and two the second. Its greatest value is as pasture or fertilizing crop. A fine way to handle sweet clover is use it for pasture or hay the first year and plow under in the spring of the second year and plant to corn.

Inoculate Your Seed

Inoculation of seed gives the young plants the bacteria they need to take nitrogen from the air for growth and development. Inoculation generally means healthier and more vigorous plants. It costs so little and is easy to apply. Complete simple directions on each package.

Price only 30c for ½ bu. size; 50c for 1 bu. size, and 90c for 2½ bu. size. It pays to use it on all kinds of clover seeds. Order Berry's Nodule Germ inoculation.

Sow sweet clover in the early spring just like Red Clover. Use about 15 lbs. of seed per acre. Your seed bed should be as firm as possible. Generally a light covering is advisable. If at all possible roll the land after seeding. Use a light nurse crop and pasture the grain if the season gets dry.

BLUE RIBBON BARGAINS

UNHULLED SWEET CLOVER

ALL RECLEANED SEED

\$1.80 at CLARINDA
PER BU. 30 LBS. to BU.
\$1.95 at CHICAGO
PER BU.

BAGS FREE

Our well recleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

This seed is fancy cleaned quality that pleases our trade. It is a high grade product and our prices are very low. Compare qualities. Judge values and note the difference.

Buy Now—Save Money—Sow Early

Blackstone, Va.

Gentlemen: I have used your seeds for many years with satisfaction. The quality has never disappointed me. The price, excellency of the seed considered, has been much lower than I could secure elsewhere.

Very sincerely,
BENJ. R. MORSE.

3 SPECIAL VALUES

IN HULLED AND SCARIFIED

SWEET CLOVER

LOT WONDERFUL SWEET CLOVER

\$3.70
BU.-60 LBS.

Those who wish a fancy, higher colored and larger berried grade of nice quality Sweet Clover will find a very attractive bargain in Lot Wonderful. The seed comes very close to our World Brand grade. You can see what that is like by examining the sample of World Brand Sweet Clover which is enclosed.

A Quality Seeding

Lot Wonderful is just a shade under this grade and therefore we can sell it at a lower figure. For all practical purposes this lot should do everything that the higher priced seed can do. It is re-cleaned, hulled and scarified with care. We'll gladly send you a sample of it. You can compare it with the best grade of other dealers and in many cases you may be unable to detect any difference. But when you then compare prices you should find in Lot Wonderful an opportunity to save from \$1.00 to \$1.50 per bushel.

Judge for Yourself

Our seed is sold subject to your state or government test. See our guarantee on page 8. We invite you to have your seed tested. Our business has grown and grown because our customers were satisfied with the quality received and savings made. Customer satisfaction means most to us and to you. In this Lot Wonderful you have a value, a lot that will sell fast, for our customers sure know how to pick 'em.

SWEET CLOVER

LOT DO-MORE

This lot stretches your money over more acres than any other. It is our lowest priced grade. It is a quality that has been giving our customers satisfactory results. It isn't the finest for looks but the favorable reports we get on it indicate its real value and after all, seed is sown for results.

Lot Do-More has been scarified. It comes from re-cleaned stocks. The crop from this seed is the same kind as will be secured from any of the higher priced grades. Sweet Clover is the greatest of all soil builders and the most productive pasture crop. See page 36 for further information on the value of this crop.

\$3.30
BU.
60 LBS.

This Grade in Big Demand

Every year we sell large quantities of this grade and this year the quality is improved. As mentioned above it is not the finest looking seed. It has some off-colored seeds in it. The berries are smaller and therein lies the secret of its performance in the field. While the germination per hundred seeds is lower than in the average larger berried grades, there are so many more seeds in a pound of Lot Do-More that this helps to compensate for the lower test per hundred seeds. The true value of a lot of seed, in our opinion, is the number of sprouts per oz. or per pound. You sow your seed by weight or measure and not by counting it out.

Reduced Seeding Costs

You do not have to sow Lot Do-More at any heavier rate than the higher priced seed. This lot is a real value. It costs you only around 80c an acre to sow this seed. Compare that with the cost of sowing any other clover seed. Our customers who use this quality are boosters. They come back for more.

If you want our finest looking seed order World Brand. Lot Wonderful is also a good value. But if you want to cut seeding costs to bed rock order Lot Do-More. You may order this seed with perfect assurance of receiving seed of this character. You can have 60 days to test it after you get it. Then, if for any reason you are not entirely pleased you may return it and your money plus freight will be refunded. We cannot emphasize this value in a fairer or stronger way.

YELLOW SWEET CLOVER

LOT SAV-MOST

\$3.60
BU.
60 LBS.

We offer this Yellow Type Sweet Clover. It is a biennial or two year kind. Somewhat leafier than the White Type. Does not grow as tall and coarse. Blooms and matures 10 days to two weeks earlier. Preferred to many for hay. Some claim it is surer to make a stand.

Our Lowest Priced Yellow Type

Lot Sav-Most gives you a very low cost on this finer stemmed leafier sweet clover. It gives you a lot of value at low cost. We sell large quantities of this seed. It is our lowest priced grade. Naturally it isn't as nice looking as the World Brand or Premium

on page 39 but we are sure you will find it a real bargain value. There are some smaller berries in it. The color and uniformity are not equal to our World Brand but the amount we sell of it each year indicates that it gives satisfaction to our trade. It is all hardy seed adapted as to origin for AAA benefit payments. See guarantee page 8.

Sow it alone or in mixture for hay and pasture. See seeding suggestions bottom page 36. Start Sweet Clover this year. It is a money maker. Stands heat and drought. Produces lots of valuable feed and does a wonderful job of soil building. Lot Sav-Most gives you the yellow Type Sweet Clover at very low seeding costs.

Inoculate All Clover Seed

Inoculate with Berry's Nodule Germ. Inoculation helps make more vigorous growth, better stands and yields. Costs only 30c. 1/2 bu.; 50c. 1 bu.; 90c. 2 1/2 bu. Easy to apply. Read page 41. It pays to use it.

3

WORLD BEATERS

SWEET CLOVER
BLUE RIBBON BARGAINS

PEARL

EXTREMELY
LOW
PRICES
COMPARE ON
A QUALITY
BASISGRUNDY
COUNTYGrundy County Type
Sweet Clover

An earlier maturing variety of biennial White Blossom Sweet Clover. Grows around 3½ ft. tall. Blooms about three weeks earlier than the Common Sweet. Matures seed more evenly. Easier to handle because of its shorter growth. It is in big demand where the common grows too rank or where earlier maturity is desired. Only requires 12 lbs. of seed per acre because the berries on this variety generally run smaller in size.

World Brand
Quality

We have the Grundy County type only in our finest quality. World Brand has pleased our most critical trade for years. It is scarified, cleaned, tested and shipment is guaranteed to please you in every way. You may compare it with the finest obtainable. If you do not find this a superior value at our low price you may return it for refund. See page 8.

Supplies of this Grundy County type are much smaller than of the common type. Be sure to order your supplies of it early. Let us have your order for Grundy County Type Sweet Clover and save you money.

Inoculate your Sweet Clover seed. See pages 36 and 41.

\$4²⁰
BU.
60 LBS.

A Good Value—Moderately Priced

Lot Pearl is the biennial or two year sweet clover same as the World Brand grade described on this page and the Lot "Do-More" and "Wonderful" on page 37. The tall growing, big-rooted, long seasoned sweet clover. A leader in production. Unexcelled as a soil builder. Big pasture yields. Enormous hay crops. A valuable money making crop.

A Medium Grade

Lot Pearl sells at lower prices because it is not as nice looking. If you demand the finest order our World Brand. If you want to cut seeding costs and willing to take seed that has some small berries and some off colored seed, then Lot Pearl should suit you ok. It has the ability to produce good stands. The seed is cleaned and blended. It lacks the uniformity and smoothness of our higher priced lots, but many of our customers have used a grade like this for many years and they are well pleased.

Compare Values

A sample of our sweet clover is enclosed with our catalog. That represents the quality of our best grade. Lot Pearl is like our choice grade. There are a good many more seeds per pound than in the World Brand. If you would weigh out an equal weight of seed out of both grades and test all of the seeds in each pile you might find the larger number of sprouts in the lower priced seed. It is important to remember that while the germination per hundred seeds is lower in the cheaper grades, that larger number of seeds per pound tends to equalize that difference.

SEE PAGES 6 and 7 for
PREMIUMSWORLD BRAND
SWEET CLOVER

See Sample Enclosed

Consider what it means to you always to get our finest seed by simply placing two words "World Brand" on your order. We have customers who have been doing that for many years. They have been well satisfied with their purchase. See our samples. Compare quality and price. Could any seed give you greater assurance of success? Sweet Clover seed may vary in appearance according to the producing season. Our World Brand quality always represents our highest grade.

Low Prices Now

We couldn't stay in business if our customers did not find our values dependable. Satisfactory quality at lower prices. Why should any one pay more for seed that is no better? We urge you to check values. No matter how critical you may be we invite you to put our World Brand next to any other.

As this catalog with these low prices goes to press we are confident that we are seeing the low point in seed prices. The seed is still lower than last year's price. Our finest seed costs only around \$1.00 an acre. With prices so low on seed so fine, this is an opportune time to make liberal seedings. Sweet clover has been one of our specialties for years. We were one of the first to offer the seed in a large commercial way. This is one of our years of greatest values. You are guaranteed a liberal savings and a satisfactory shipment. Send your order early as higher prices may be expected later.

Binghamton, N. Y.

Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,

\$4²⁰ BU.
60 LBS

An Extra Value

Our very finest extra fancy quality. The choice of our most critical trade. Guaranteed to please the most exacting trade. See guarantee, page 8. Why pay more than our low price? Consider quality and check the savings. This is quick germinating scarified seed.

Yellow Type Sweet Clover is in great demand. It is finer stemmed than the white and more leafy. Does not get so rank. Matures about 10 days earlier. Many say it is easier to grow. Provides pasture in abundance. Makes hay superior to white. Works wonders in soil improvement.

Brings Better Profits

Farmers generally are in dire need of clovers. They will restore humus, fertility and profits. Land will be easier to work. It will drain better yet hold the proper moisture at the surface for growing crops. Make your soil perform better. Use Sweet Clover to do the job. It will improve land quicker and at lower cost.

Our prices are guaranteed to save you money. See price list for price on our Planet Brand. Let us take care of your Sweet Clover needs.

It has been our specialty for years and we are equipped to take care of your needs.

Lakefield,
Minn.

Dear Friends:
I like your
seeds and rec-
ommend them
to others. Your
seeds do well in

this section. I save money by
buying from you. I am well
satisfied and am sure other
farmers will, too.

Yours truly,

JOHN GREIN.

LOW PRICE on HUBAM TYPE CLOVER

ANNUAL WHITE SWEET CLOVER

\$7⁵⁰
BU.

The Sweet Clover That Does Two Years Work in One

Hubam clover is more plentiful this year. The price is more reasonable. It is again economical to sow. Use it liberally this year. Sow it this spring. Use it as a hay, seed, pasture or soil building crop this fall. Hubam is a variety of sweet clover that blooms and bears seed the same year it is sown. It is an annual. Does not live over winter. Gives an enormous growth and production in a short season.

Get Two Cash Crops in One Year

Sow Hubam Type with small grain. Harvest your grain. Then cut clover for seed. Produces up to 600 lbs. of seed per acre. Sometimes more. Or use it as a pasture. It grows fast, attaining height up to 4 or 5 feet if not cut or pastured. Think what a carrying capacity that means. The growth is rich in protein, making it all the more valuable. Makes a heavy production of rich hay if cut when it begins to bloom. Or if you want to enrich your land fast, plow under a full growth. Some pasture it a while and then plow it under. Think of it, all this in the same year the crop is sown. No wonder farmers who know the crop were willing to pay up to \$15.00 a bushel for the seed two years ago. It's only half that this year.

Seeding Suggestions

Inoculate your seed with Berry's Nodule Germ. See Page 41. Sow on winter grain when ground can be harrowed lightly. Sow 15 lbs. per acre. Harrow lightly or roll after seeding. Rolling is best. Sow with spring grain in a similar way. Cover seed lightly with a harrow and roll. The firmer the seed bed the better.

If you cut Hubam as a seed crop or use it for pasture, often the crop will reseed itself for another year. It does not become a pest. It is easily eradicated by cultivation. If plowed under before it seeds it will not come up again.

Low Price on World Brand Quality

Our Hubam Type seed is carried in one quality and that is our World Brand. That is our best grade and a fine quality that pleases critical buyers. Make comparisons on a quality basis and note the big savings our prices can give you. This is the year to get started with this valuable, quick acting, money making clover. Use Berry's World Brand scarified seed. We use care in the purchase and preparation of this seed. Our seed is scarified. Shipment guaranteed to please you and save you money. See Page 8.

We want your business and are making our prices correspondingly low. Don't pay more for seed that is no better or will do no more for you. Here in this great crop you can get a measure of value that we do not believe can be duplicated anywhere else. Let us help you get started with this money maker.

Small Lots, postpaid: 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25.

YELLOW TYPE SWEET CLOVER

Lot PREMIUM

A very Serviceable lot of seed. Not as fine and smooth as World Brand but a quality that pleases many of our customers. Not our cheapest but a good medium grade. It is cleaned scarified seed. Graded and priced to make a very popular seeding. Widely used for top sowing on old pastures or thin stands as well as for new seedings. With smaller berries and more seeds per pound it has ample sprouts per pound to give a good stand at the regular seeding rate of 15 lbs. per acre. Lot Premium is one of our big selling lots. Cuts seed costs. We guarantee a saving or your money back.

INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

Inoculation Necessary

No legume can thrive without proper inoculation.

In order to be inoculated there must be a certain strain of bacteria working in the roots of the plants. Then and then only can these legumes take nitrogen from the air and use it for its own growth.

Legumes are heavy users of nitrogen. If they cannot make it for themselves because they lack the proper bacteria, they generally turn yellow and often die. Meanwhile instead of building up your land they are robbing it of nitrogen which is the most valuable plant food. You grow legumes because you want them to store nitrogen in the soil but they will take it away if they are not properly inoculated.

When you buy Berry's Nodule Germ you get a package containing millions of bacteria suited for the crop you specify. You put that on the seed. See opposite column. As soon as the seed sprouts the bacteria start to work and give the plant the power to make its own nitrogen out of the air.

We urge you to inoculate. The cost is small. It is easy to apply. We guarantee our Nodule Germ to give satisfactory results. If it does not make nodules on the roots of your plants we will refund the price of the material. See opposite column for prices.

FORAGE CROPS—Pages 13

CORN-BELT ALFALFA

Corn-Belt Alfalfa is a "registered" trade mark. It is our name for seed that we consider well adapted to the section that is shaded on this map. It is not a variety of alfalfa. This Corn-Belt seed is produced in the northern and western part of this section and even further west and north. It contains no unadapted seed and is stock of a hardy character. All "Corn-Belt" Alfalfa qualifies as to origin for benefit payments in the agricultural conservation program. North Central Region.

Thoroughly Dependable

Reg. U. S. Pat. Off

It is not necessary to specify Montana or Dakota to get hardy seed. Experiments have proven that seed such as our Corn-Belt is entirely satisfactory in most sections. It is hardy and equal or better in production. Get adapted seed without paying premium prices. See page 40.

HARDY and HEAVILY PRODUCTIVE

GRADES of CORN BELT ALFALFA

Berry's Corn-Belt Alfalfa comes in four regular grades of common. These grades are separated largely according to color and size of berries. Read page 9. There are also special lots of Corn-Belt designated by names such as "Honest John," etc. We also have the Corn-Belt Grimm such as our World Brand on page 43 and Lots Bonafide and Bed Rock. We have found our Corn-Belt Alfalfa hardy and heavy in production. See money saving prices on regular grades on page 40 and get seed that is suited to corn-belt conditions.

INOCULATE ALFALFA SEED

Better Stands—Heavier Growth

Alfalfa gathers nitrogen from the air. That is why it builds up soils and contains so much protein. But it can do this only when the plant's roots have certain bacteria working in them. You can get these bacteria by inoculating your seed. These bacteria can thus enter the roots and form nodules as soon as the seed sprouts. Then your plants will be healthier, stronger and grow larger. Plants that are not inoculated often turn yellow and die. Inoculation may mean the difference between success and failure.

Berry's Nodule Germ Inoculation is inexpensive. It is easy to apply. Full simple directions with each package. Price 1/2 bu. size, 30c; 1 bu. size, 50c; 2 1/2 bu. size, 90c. If this inoculation does not form nodules on the roots of your plants we will refund the price of the Nodule Germ.

Market Conditions

Alfalfa seed production is short in some producing sections. There is not much seed in growers' hands. The demand and need for the seed is great. As the season for seeding approaches we look for markets to show strong advances. Our prices will be protected until stocks are sold or market advances make duplication impossible.

Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. Inoculate your seed.

CUSTOMERS' REPORTS ON BERRY'S ALFALFA

Joseph Ash of Otsego, Michigan: "We got some of your World Brand Corn-Belt Alfalfa 2 or 3 years ago. It is doing so good we want some more."

C. A. Foster of Sparta, Ill., says he bought some of our cheapest Corn-Belt Alfalfa 5 years ago. Still going strong. Has another piece of ground ready for more.

Ed Phienheimer of Shipshewanna, Ind., has used Corn-Belt Alfalfa for seven years. Orders more. Says to send it whatever the price may be.

Ivan R. Arnsmeir of Juda, Wis., reports our Corn-Belt Alfalfa gave him four cuttings when his neighbors got only two. He had our lowest priced grade.

Wm. Koutny of Brandon, Iowa, states he obtained a fine stand. Lots better than some who paid five bucks per bushel more for their seed.

Oscar M. Hub of Riley, Wis., says the four bushels of Corn-Belt alfalfa was seeded with excellent results. Well pleased.

Frank L. Wilcox, Galloway, Ohio, wants another bushel and a half like the Corn-Belt he got the year before which gave very good results.

Wm. S. Van Tassel, Antwerp, N. Y., says: "I secured a wonderful stand last year of your seeds, especially of your alfalfa."

Elmer Broedlow of Jefferson, Wisconsin, writes: "Just wish to say the alfalfa I purchased of you last year withstood the drought and ice of last winter. My seeding is excellent although some report their seedings are dead again this year."

North Liberty, Indiana.
Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

If you are not fully pleased with your purchase return it for refund of your money.

LOT BED ROCK

Grimm Alfalfa
Shipped in a Sealed Bag
Serviceable Seed at Low Cost

\$13⁵⁰
BU.

Grimm Alfalfa is placed within reach of every farmer who wants this super-hardy variety. This is a very low price on such quality. This grade has given our customers satisfying results. Has good growing power. Produces exactly the same kind of Alfalfa as higher priced seed.

This low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is lower there are so many more seeds per pound that this is largely compensated for. Several tests per ounce show more sprouts than an ounce of larger berried kind.

A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong stands. In appearance it isn't the best but from a practical standpoint it does very nicely. Sow 15 pounds per acre. Seed is guaranteed to satisfy. If you want to get a start with Grimm at a low cost, order this lot. Customers report it an outstanding bargain.

Corn-Belt Alfalfa Seed

A low priced grade that satisfied many

This is a quality similar to our Square Brand. Thousands of our customers have been using this type of seed for many years. They know the seed isn't the best for looks but they also know by experience that they can get good results from such seed. The great saving in seeding cost is clearly seen in our very low prices. Less expense with satisfactory results, gives plenty of reasons for the popularity of this lot.

The crop from this seed is just as hardy and productive as any of our corn-belt alfalfa. If you don't object to smaller berries and some discolored seed we're sure you'll like it as so many of our customers do.

WORLD BRAND CORN BELT ALFALFA

\$14⁹⁰
BU.
60 LBS.

We ask every critical buyer to check the savings you can make on this high quality grade. This is Corn-Belt alfalfa at its best. Our extra fancy quality. The highest color and plumpest berries. A grade that nearly always runs 99½ pure. Priced to save you

real money. See the samples of World Brand Red Clover and Sweet Clover enclosed. They indicate the beautiful character of this grade. Compare prices. We guarantee you a saving of \$1.50 to \$2.50 per bushel over any seed of similar character and quality. If you don't consider you have made such a saving when you receive your seed, return it for refund plus freight charges.

The hardy character of our Corn-Belt Alfalfa is described on page 42. This seed is used over a much wider area than the shaded map shows. It is grown with satisfaction to the north, west and south of this area. This is seed that we consider winter hardy and highly productive. It is this character of alfalfa that has helped build up such an extensive alfalfa seed business for us. Quality to please our most critical trade and a price to suit our keen judges of value. You will appreciate this high grade bargain.

LOT BIG KROP

Choice Quality
Corn-Belt
Alfalfa

\$13⁵⁰
BU.
60 LBS.

If you want a good serviceable, in between quality, order Lot Big Krop. It is a finer grade than the Honest John (page 30) and the Lot Good Service described above. It is not as smooth and uniform as the extra fancy World Brand described in the opposite column.

It is the same hardy Corn-Belt alfalfa like the others. This medium quality seed has given our trade a high degree of satisfaction for many years. The very low price we have on it makes it a great value that we do not believe can be duplicated anywhere. It is a good practical value for thrifty buyers.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,
 WM. E. KLEMKE.

EXTRA HARDY ALFALFA

Shipped in a Sealed Bag A Real Value

A selected bargain in medium grade Grimm Alfalfa seed. Honest-to-goodness quality without the extra high color that means higher prices. It is seed of good character; cleaned, good growing power, extra hardy.

Lot Bonafide is Corn-Belt Grimm of the same productive hardy type as our World Brand described on page 31. We consider it practically as certain to produce a stand. This grade may sell as a fancy quality. It certainly is a serviceable lot.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such quality of Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Any buyer of Lot Bonafide who does not think he has made a big saving can return shipment and get his money back.

MONTANA ALFALFA

\$15³⁰
BU.
60 LBS.

Montana grown alfalfa has always been in demand as it is generally considered of very hardy character. The extremes of temperature that may prevail there kill out weak plants and leave the hardier, sturdier ones to produce seed. Therefore Montana grown seed nearly always commands a premium price.

World Brand Quality

During the past few years climatic conditions have caused a drastic reduction in Montana seed crops. This year they have a good crop. We completed buying arrangements for a nice supply of this seed. Our strong financial power enabled us to make purchases at prices that we believe to be below the average. Low costs and direct sales make possible our present values.

We sell straight Montana grown alfalfa only in our very finest grade. Such seed is always a satisfactory quality, pleasing our most exacting customers. They have recognized its high standard for years. We consider our Montana Alfalfa extra winter hardy. It should stand conditions most anywhere in the U.S.A. Compare quality, price and origin and see how much you can save. Buy some other things you need with the difference. See premium offers pages 6 and 7.

INCULCATE ALFALFA SEED PAGE 41

IDAHO ALFALFA

World Brand

We have some customers who demand Idaho Alfalfa. When a man gets results that give him real satisfaction a little difference per acre in seed costs is a small item. That is especially true of critical buyers.

Our World Brand Idaho grown alfalfa will appeal to anyone wanting high quality seed, priced right. Genuine Idaho seed is not so plentiful this year and a check on prices and value can show you the substantial savings in this fine quality. Bright color, high purity and germination. Supplies limited and really a value while it lasts.

BU.
60 LBS

STATE
SEALED
AND
CERTIFIED
GRIMM

World Brand

Genuine Montana grown seed. New crop, bright, clean, plump seed. World Brand in quality and priced to save you real money. Montana grown seed is always in demand when available. The extra hardy character of the seed is widely and generally accepted. Discriminating seedsmen compete actively to secure supplies for their trade.

They consider it suitable to the most extreme winter conditions. Such seed is often sold at premium prices. Our direct-to-you price should show savings up to \$2.50 per bushel.

Buy our World Brand Montana Grimm with the distinct understanding that you can return it for full refund, including freight if you can secure seed of equal character and quality at the same price. In other words, if we don't save you money you can have your money back.

This Montana World Brand Grimm is for men who demand quality. World Brand has satisfied our most critical trade for many years. No matter how exacting you are as to grade, this seed should please you. Most farmers are economy minded and appreciate our savings. This seed from the wind swept state of Montana where temperatures drop extremely low should give you a stand that will last for many years. Okay for AAA and a money-maker.

Blackfoot Grimm

State Sealed and Certified

This is Idaho seed. It gets the name Blackfoot from an organization that controls the selling of most of the seed produced in the section around Blackfoot, Idaho.

The demand for it is heavy and it is desirable when crop is to be grown for especially seed production.

Prices for Prompt Orders

See page 40 for prices on State Sealed and Certified Grimm. Supplies are so definitely limited that orders can be filled at these prices only so long as available at prevailing wholesale quotations. We believe we will be able to supply all our trade wanting Blackfoot Grimm at present catalog price but early ordering is advisable.

Blackfoot Grimm nearly always sells at a premium over other alfalfa yet our prices are down to money saving figures. Compare and see for yourself.

Postpaid 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.75. Less than bushel bags do not carry tag.

WORLD BRAND MINNESOTA GRIMM

Extra Hardy - Extra Quality

"World Brand" means our top quality. "Grimm" means a super hardy strain. "Minnesota" means the seed was grown in that state where the severe winters eliminate all weaklings and reproduce only the most vigorous and sturdy kind. You can make no better selection if you wish the hardest type and seed of excellent quality.

Original Grimm Field State

Minnesota is the home of Grimm Alfalfa. Here it was found on the farm of a man named Grimm. Our World Brand Minnesota Grimm was purchased by Minnesota buyers. Men who know the state like a book. Knowledge of production and available supplies helps us to secure better values for our trade. Buy high quality Grimm at our direct-to-you prices. Shipped in a Sealed Bag.

Use Inoculation. Bu., 50c; 2½ bu., 90c.

\$16⁵⁰—
BU.
60 LBS.

Save \$3.00 to \$4.00 per bu.

This seed in our opinion will do as much for you as state sealed and certified stock, yet you can buy it at \$3.00 to \$4.00 a bushel less money. The difference on every bushel will buy a lot of things for the home or farm. We'll gladly send you a sample of it. Check! Make comparisons. Here is high quality World Brand grade, genuine Minnesota grown, Grimm Alfalfa at a price that is drastically low for such quality. Compared with any other seed of similar character you should find a saving of \$2.00 a bushel.

Minnesota Seed Popular

During the past three years we have built up a big trade in Minnesota Alfalfa. Our buying connections have enabled us to secure stocks to very good advantage. The prices we have been able to make have been most attractive. Our customers appreciate the savings and they like Minnesota grown seed because of its productivity and winter hardiness.

1 lb., postpaid,

10 lbs., \$4.00.

Myerstown,
Pa.

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,
MILES L. RISSER

SEE
PREMIUMS
Pages 6 and 7

3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is recleaned and shipment is guaranteed to satisfy you in every respect. Return it for refund if not satisfactory.

TIMOTHY AND ALSIKE

28 to 33% Clover

Super Grade
Low Cost — Big Yields
An Economical and Highly
Satisfactory Seeding

All U. S. Grown as Required for A.A.A.

See Sample Enclosed.

\$4⁴⁰
BU
45 LBS

This is the year to sow liberally to this famous natural mixture. The cost is reasonable and a seeding lasts for several years. We know of no mixture that makes a finer quality of hay than our Super Grade Timothy and Alsike. The Alsike hay is less dusty than Red Clover and pound for pound it has a higher feeding value. It can be used as pasture to good advantage and keeps soils from washing.

Both Alsike and Timothy are very winter hardy. Alsike being the hardiest of the clovers. It will also grow on soils that are too sour or too wet for other clovers. Timothy and Alsike have the same soil and climatic requirements. They are naturally adapted to growing together. The Timothy supports the clover, enabling it to grow erect, taller and more leafy. The alsike forms a dense mat of clover down in the Timothy and it seems to stimulate the growth of the grass. Thus both do better when grown in a mixture instead of separately.

We know the sections where large quantities of this seed are grown together. The seed is harvested mixed. Because it is so difficult to separate the two we can buy it at a substantial discount below the cost of the Timothy and the Alsike unmixed. We secure the bulk of our seed from these sections. It is processed, cleaned and uniformed. It is passed on to you at prices that are low figures for such fine quality clover rich seeding.

This mixture when sown at 12 lbs. per acre will give an average of 60 Alsike seeds per square foot. It would take about a 60% Mixture of Red Clover to give you as many clover seeds. Alsike seeds are smaller and go farther. This mixture satisfies because it is easy to get a catch, lasts for several years and produces big crop of the finest mixed hay.

We guarantee to save you money on this seed. See sample. Compare for color, purity and clover content. This seed has good growing power. It is truly a remarkable value. We recommend and urge its use because we know it is a seeding that gives satisfaction and the seeding cost is low this year. Buy early and protect yourself on price.

Small Quantities Postpaid any Mixture on this page.

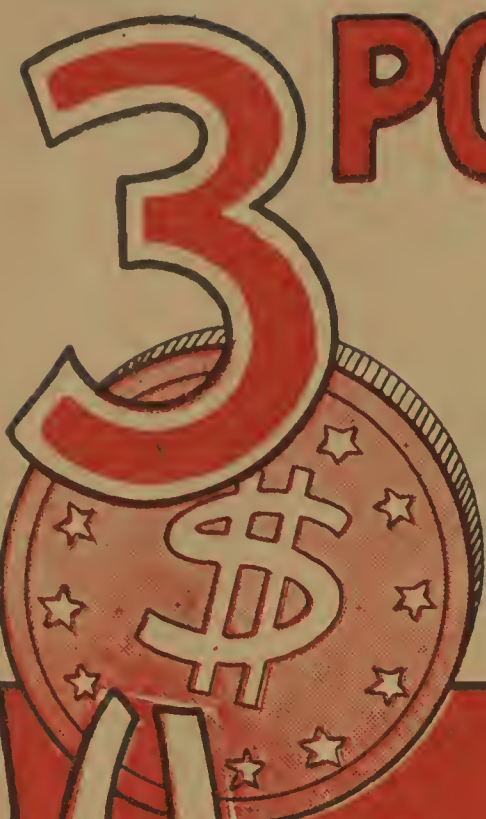

1 lb., 30c; 5 lbs., \$1.35; 10 lbs., \$2.25.

Dalton, Ohio

Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,
S. J. KULA

4 WAY
TIMOTHY AND CLOVER
MIXTURE **4⁵⁰**
BU.
45 LBS

All U. S. Grown as required for A.A.A. Contains 28 to 32% of Alfalfa, Red Clover and Alsike combined. Balance Timothy.

Here is a great seeding that we personally like very much. Makes very fine hay and excellent pasture.

By adding some hardy alfalfa seed to our Timothy, Red Clover and Alsike mixture we have made a combination that our customers praise highly. It produces heavily and gives you an opportunity to get some alfalfa started. Although one of our newer mixtures it is rapidly forging toward the front in sales.

Our price this year is most reasonable, making it an outstanding value. Some of our finest lots of mixed seed are used in making this blend. It certainly has a good measure of value. Seeding cost is low. Only takes 12 lbs. per acre. It is priced to save you money on your seed bill.

TIMOTHY & ALSIKE REGULAR GRADE

\$3.80 per bu.—20-25% Clover
Economical and Highly Satisfactory

The same quality stock as our Super Grade. Twelve pounds sows an acre and places an average of around 40 clover seeds on every square foot in addition to the Timothy. That makes a rich mixture that produces heavily. Alsike is superior to Red Clover in feeding value. Hay is less dusty. The seeding is easy to start. Comparison will show you our prices are low, quality considered. Let us save you money on this quality seeding and send your orders early as we may not replace stocks at these figures.

3 Timothy^{AND} CLOVER MIXTURES

**AT
LOW
SEEDING
COST**

TIMOTHY ALSIKE and RED CLOVER

SUPER GRADE

**Contains 28 to 32% Clovers
All Hardy U. S. Grown**

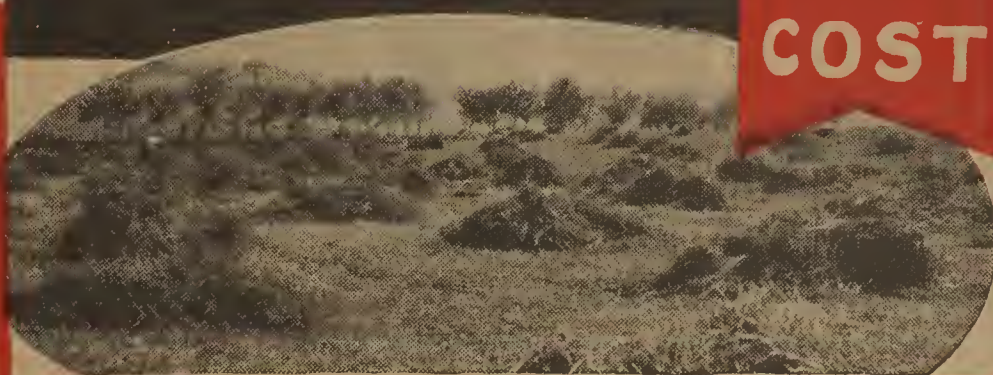

The heavy production and low seeding costs of this mixture makes it a great favorite with our trade. Its rich clover content is ample for a heavy stand of clovers. This mixture when sown at twelve pounds per acre will average about 50 clover seeds per square foot. You have the Timothy besides. The clovers grow erect and taller because the plants are supported by the timothy. That makes for finer quality and larger yields. With the Red Clover and the fine stemmed Alsike making a dense clover growth, a heavy tonnage of rich feed is obtained. Customers certainly are pleased with it.

Adapted, Recleaned Seed

This seed is all hardy U. S. Grown as required for A.A.A. The seed is cleaned and blended to the best of our ability to give a uniform clover content. Many prefer this three way mixture. They like the Alsike to assure a better clover stand in event there should be conditions in the field unfavorable to red clover.

We'll gladly sample this so you can see its quality. It is this combination of quality, low price, heavy yield and high feed value that appeals to our trade and makes this such a big seller. Use it for hay, pasture or soil building. At our low price you can afford to sow a larger acreage to clovers. Keep your land in better condition and farm for better profits.

**\$4⁵⁰
BU
45 LBS**

TIMOTHY & RED CLOVER HOME GROWN

SUPER GRADE

**Contains 28 to 32% Clovers
Hardy U. S. Grown**

This good old standby will never go out of style or lose its popular favor. Especially not when the seeding cost of such a rich clover mixture is so low. This mixture will average around 30 clover seeds per square foot when sown at 12 lbs. per acre. Just draw a square foot and place 30 seeds on it and see how close they are together. Then you have the Timothy to make these plants grow erect and to add to the tonnage. You generally get a larger yield when these crops are grown in a mixture, than separately. It retards soil erosion very successfully and enriches its nitrogen content.

Economical to Use

The seeding cost of Berry's Super Grade U. S. Grown Timothy and Red Clover mixture is only around \$1.10 per acre, less than the price of two bushels of "sealed" corn. The soil building value alone of this seeding should give you an increase of 10 bushel of corn per acre. Lots of farms need clovers worse than their owners think. This is the year to increase your grass and clover acreage while seed prices are low.

This seed is cleaned and if you'll compare values we are sure you will see a big saving. We mix it to attain as uniform a clover content as we can give it. Our guarantee (page 8) gives you assurance of a satisfactory shipment or your money back.

You should be pleased in selecting this kind of a seeding that for so many years has satisfied so many thousands. We want your business and are making our prices as low as we can so as to make it to your interest to trade with us. Buy direct this year for greatest savings.

**\$4³⁰

TIMOTHY and HARDY EUROPEAN RED CLOVER

Cut-Cost Quality—Contains 20% or Better Red Clover

This mixture is in demand because of its lower seeding cost. The clover in it is bright bold seed of extra high purity. It is as fine or finer than our mixture containing home grown clover seed. This clover is not the kind found non-hardy by the Department of Agriculture which has to contain red stained seed. The clover in this mixture contains the green stained seeds which indicate a hardier origin. See page 40 for price on Unmixed European Clover.

Sowing 12 lbs. per acre averages around 18 to 20 clover seeds per square foot. That's plenty to suit a large number of buyers and it cuts seeding costs to around 75c per acre. Just ask us for a sample if you want to see how really fine this Cut-Cost grade is. If you don't consider it one of the finest values on the market today fire your shipment back and your money plus freight will be promptly refunded.

North Manchester, Ind.
Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises.
Yours truly,
A. F. STELLAR.

BERRY'S GARDEN SEED

AMERICAS OUTSTANDING VALUES

PLANT MORE VEGETABLES at BERRY'S LOW PRICES

**HIGH QUALITY, GUARANTEED
TESTED SEEDS at LOWEST PRICES**

Berry's have greater values for you this year than ever before. Prices are still lower; but we guarantee the same high quality we have always furnished our thousands of customer friends.

In raising a garden you like to have the best. The cost is so little that you can not afford to trust every source of supply to have fresh, high testing, true to type seeds. We have always furnished just that, and always will.

ORDER DIRECT OF BERRY'S—BEST SEED—LOW PRICES

When you order garden and flower seeds of us, you are buying direct from a known reliable source. Our growing contracts from which we supply you with fresh seed each year are in the hands of experts all over the world. From then until your order is packed for shipment, every detail is properly supervised to insure you getting just what you ordered as quickly as possible.

24 HOUR SERVICE ON ALL ORDERS

All orders are shipped by mail or express Prepaid within 24 hours after received, usually the same day to arrive 1 or 2 days later. If we can't ship immediately for any reason, you will be notified at once.

Take advantage now of the lowest prices we have ever made on the highest quality stocks.

**BULK PRICES
SAVE YOU MONEY**

SEE PRICE LIST PAGE 53

Our bulk seed or quantity price list on opposite page is strictly wholesale for large farm or market gardeners. Seeds are guaranteed to be strictly new crop, high germinating and true to type, and priced to save you money.

For smaller quantity prices postpaid on any variety, see the item as listed in our garden seed section pages 54-66. All vegetables listed in our catalog not priced on this page are at the one price listed for standard varieties.

Special low wholesale prices page 53 are not prepaid. Shipment will be made by Express or Freight Collect whichever is cheapest. Specify on ordering from this list your freight and express station. Usually transportation charges will be between 1 and 2 cents per pound depending on distance to be shipped and weight of order.

PACKETS for

Any six packets from our regular 5c groups, your selection of all vegetable and flower offerings are 25c. 12 packets would be 50c, etc. This offer does not apply to any packet not selling for 5c.

Germāco

Hotkaps

SEE PICTURE PAGE 49

Crop insurance at such low cost. Have the finest vegetables and flowers three weeks earlier in the Spring by using Hotkaps. Used by millions of gardeners in every state.

Hotkaps are made of light strong specially waxed paper—"individual hothouses" for every plant—protecting them against frost, rain, wind, insects and crushing. They "force" plant growth, making bigger and better crops for the earliest market prices. They allow the proper amount of air and light for quick-est plant development.

Hotkaps are used to protect plants or seeds of any flower or vegetable, being especially suited for vine crops such as tomatoes, cabbage, peppers, cucumbers, cantaloupes, watermelon, squash, pumpkin, etc.

Everyone should have the new Home Garden size package of 25 Kaps. Easy to set—complete instructions given.

Postpaid prices: 25 Kaps (Home Garden) size with paper setter, 50c. 100 Kap size with light metal setter and steel tamper, \$2.75. 250 Kap size with setter and tamper, \$4.00. Special steel setter and tamper without Kaps, \$1.50.

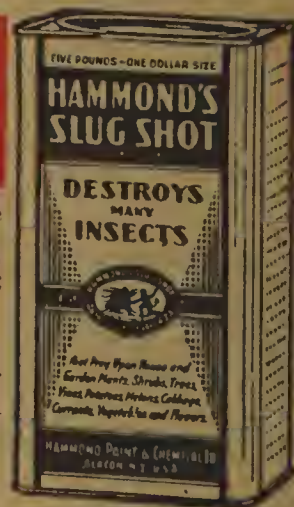

Not prepaid: 1000 Kaps without setter, \$10.75. Weight, 28 lbs.

GUARANTEE
If any of our garden or flower seeds fail to grow due to poor germination we will replace them free of charge.

**HAMMOND'S
SLUG SHOT**

Dry or dust slug shot is one of the best non-poisonous destroyers of chewing insects. Wonderful for potato bugs, cabbage worms, etc. Postpaid: 1 lb., 25c; 5 lbs., \$1.00. Not prepaid: 5 lbs., 75c; 10 lbs., \$1.25.

Liquid Slug Shot. Non-poisonous. Teaspoonful makes quart of spray. Kills chewing insects and controls sucking insects by contact. Postpaid: 1 oz. bottle, 35c; 6 oz., \$1.00.

**INOCULATE FOR
BIGGER CROPS**

All garden peas and beans should be inoculated. More vigorous vine growth hastens maturity and increases crop. Builds up the soil. Postpaid: Pkt. (for 5 lbs.), 10c; Market size (15 lbs.), 25c.

Inoculation free with Bean Collections pages 54-55.

BERRY'S PRIZE COLLECTION

40 BIG Packets-A \$2.00 Value

The same big packets and fresh seed we have always sold.

Only \$1.00

POSTPAID

A bargain probably never equalled. Many seed houses get more than \$2.00 for these same 40 packets.

40 BIG PACKETS—ONLY 2½¢ EACH—\$1.00 POSTPAID

The produce shipper growing vegetables for distant markets has suffered great losses the last few years, and the quality has never equalled the fresh vegetables. It never will, and today with higher food costs prevailing the demand is for more fresh vegetables. A large farm garden for your own use of fresh vegetables and for canning is the most profitable farm occupation. This "Prize" collection of 40 packets contains 18 vegetables, many of which you may have a surplus of to be sold in town. Think of it—getting more vegetables than you can use for only 2½¢, and selling the rest at a big profit—only a little time on some boy's or girl's part. At regular price 20 packets are free in this collection. All 40 are guaranteed satisfactory.

Best Varieties for the Farm Garden

Each packet in this collection is specially selected to give you the best variety we can. Liberal measure is given on all items, and on Radish, Lettuce, and your favorite vegetables, there will be enough seed for 100 feet of row. On all vegetables in this collection there is enough seed to produce a garden for a family of 5. The seed in this collection will plant 3000 square feet at regular rate or garden 60 ft. x 50 ft.; or 75 ft. x 40 ft.

4 FAVORITE HARDY FLOWERS

Here are 4 favorite flowers, all hardy perennials that will grow anywhere. Buy this collection to get these alone. Make your home surroundings more beautiful! Live happier!

I URGE EVERY PERSON WHO READS THIS BOOK TO TRY SOME OF THESE EXTRA DELICIOUS VEGETABLES

Charles Sinn, Manager of our Garden Seed Department, grew up in the business. He is prepared to serve you personally and save you money.

A VERY TENDER DWARF FIBERLESS BEAN

Berry's Stringless Green Pod Bean

Absolutely the most vigorous growing, heavy yielding dwarf bean we ever saw. Of unsurpassed quality, it is absolutely stringless and fibreless. Very tender and mild flavored. Matu- res with the earliest, and outyields them all. Resistant to drouth and unusually hardy. Plant at least one pound early for table use; 2 or 3 pounds more later for canning. At these low prices, don't fail to have plenty. Lot 121X—Post- paid: Large 2 oz., pkt., 10c; 1/2 lb., 25c; 1 lb., 40c; 2 lbs., 65c; 5 lbs., \$1.50.

Other Beans, Pages 54-55

The finest quality, heaviest yielding vegetable varieties I can offer you for your home garden, regardless of price. Thousands of customers by their repeat orders each year back my statement up. You'll never really know the truly superior quality of these delicacies until you try all of them. The few cents difference will be repaid a hundred times over. Special offer. 8 packets 60c — any 5 your choice 40c.

OUR BEST - A FAVORITE OF THOUSANDS

Berry's Beat-'Em-All Radish

Think of it! Crisp, snappy radishes ready to eat 15 to 18 days after planting. A decidedly superior variety with sparkling red top and white tip. An extra early variety of super- ior quality for home or market. Save money by buying enough for a succession of plantings and enjoy fresh radishes all summer. Lot 725X—Post- paid: 1 pkt., 10c; oz., 20c; 1/4 lb., 40c; 1/2 lb., 70c; 1 lb., \$1.25. Radishes. Also Page 65

AN EARLY TOMATO of WONDERFUL QUALITY

Berry's Early Wonder Tomato

A favorite with home and market gardeners for years. The very earliest to- mato that gives you unsurpassed quality. The color is a deep, glossy, bright, brilliant red. The skin is smooth. The thick meat is finely flavored. The fruit is nearly round and large in size. Has a small seed cavity, firm but juicy flesh. A vig- orous grower, it bears enormous crops, over a long period. Grow this to- mato for the earliest finest quality fruit. Lot 156X — Postpaid: Pkt., 10c; 3 pkts., 25c; oz., 40c; 1/4 lb., \$1.50; 1/2 lb., \$2.75; 1 lb., \$5.00.

See Next Page

DELICIOUSLY SWEET, TENDER, HEALTHFUL

Berry's Tenderflesh Carrot

The finest health giving vege- table at its best. Crisp, tender, delicately flavored flesh makes this a garden favorite with anyone who grows it. Supreme quality. Core- less, distinctive cylindrical in shape with very little taper, its flesh has a deep rich orange color. This is a very early maturing strain de- veloped for home gardens. Some say it is the favorite vegetable in their garden. Be sure to try it! Lot 012X—Postpaid: Pkt., 10c; oz., 25c; 1/4 lb., 60c; 1/2 lb., \$1.00; 1 lb., \$1.75.

Regular Varieties, Page 58

PACKET

5 for 40¢

OUR MOST DELICIOUS WATERMELON AND VEGETABLE

Berry's Mam- moth Melting Sugar Water- melon

The sweetest most delicate flavor you ever tasted. Abso- lutely stringless, its scarlet flesh fairly melts in your mouth. A spice to its sugar—sweet juice makes it always a delicacy at any time. Big beauties growing 20 to 25 inches long, weighing 40 to 60 pounds. Dark green color with tough rind, creamy col- ored seed. Hardy, vigorous vines often bearing 6 to 8 mel- ons each. The earliest finest quality melon we have ever seen. Plant extra early. Lot 153X—Postpaid: Pkt., 10c; oz., 25c; 1/4 lb., 60c; 1/2 lb., \$1.00; 1 lb., \$1.75; 5 lbs., \$8.00. Melons, Pages 60-61

A MOST SUPERIOR QUALITY PEA FOR YOU

Berry's Supreme Wonder Pea

Named because you will marvel at its quality and production. A dwarf wrin- kled variety growing vigor- ous dark green pods about 20 inches high. They are loaded with pods filled with dark green peas. You have never tasted peas so tender, so sweet, so delicious. The best there is for your gar- den. Plant at least two pounds at different times so you will have plenty for canning. Lot 364X—Post- paid: Large 2 oz. Pkt., 10c; 1/2 lb., 25c; 1 lb., 40c; 2 lbs., 65c; 5 lbs., \$1.50.

See Also Pages 62-63

AN EXTRA FINE EARLY CABBAGE

Berry's Earliest Cabbage

We challenge you to beat this variety any- where for earliness, quality and productive- ness. A round head type cabbage that starts with a bang, heads in a hurry and is ready for the table before most kinds curl up its center leaves. Heads are firm, color bright green. Rich flavor. Grows compact so may be planted closer together than most varieties. For the first cabbage in your own garden, plant this. Lot 971X—Post- paid: Pkt., 10c; oz., 35c; 1/4 lb., \$1.10; 1/2 lb., \$2.00; 1 lb., \$3.75.

Later Varieties, Page 57

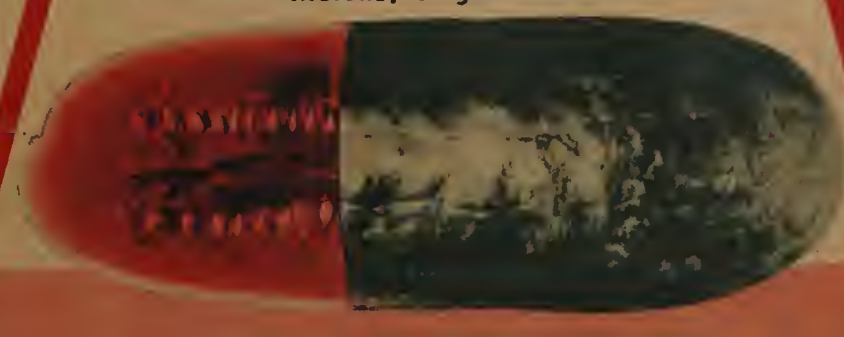

A BEET of TRULY SUPERIOR QUALITY

Berry's Early Blood Red Beet

An early variety of deep blood red color. A selection of equally superior quality for table, canning and pickling. Smooth globe shaped roots with short tops. Extra sweet and crisp, it ma- tures quickly but is a splendid keeper. If you want the best, try this one. It will be a favor- ite among all others. Lot 393X—Postpaid: Pkt., 10c; oz., 20c; 1/4 lb., 40c; 1/2 lb., 70c; 1 lb., \$1.25.

Page 51

BERRY'S TOMATOES

Rich Juicy

BEST EARLY RED VARIETIES

Berry's Early Wonder. (Picture page 51.) Our own discovery and after years of breeding and selection it is still the tops for Earliness, Quality and Yield. A brilliant red color, smooth, thick meated flesh; juicy, sweet and delicious either cooked, stewed, canned or served raw. An enormous yielder for being so early. Pkt., 10c; 3 pkts., 25c; oz., 40c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

Bison—See picture at right. For a sure crop of the finest quality, earliest tomato try Bison. It produces abundantly where other varieties fail. Bison is the best new Tomato in years. It produces smooth, luscious, deep red fruit a little larger than Earliana and maturing a few days earlier. Far superior to Earliana in yield and quality. Pkt., 15c; 2 pkts., 25c; oz., 50c; ¼ lb., \$1.75.

Break O'Day. Most prolific of early types being a cross on Marglobe and maturing a little later than Earliana. Fruits orange-red, medium large, smooth, solid and heavy. Vines wilt-resistant. Pkt., 10c; oz., 35c; ¼ lb., \$1.25; 1 lb., \$4.00.

Earliana. A favorite of home gardeners. Vines open, spreading, and very productive. Fruits deep scarlet, medium size, exceptionally smooth. Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.00.

John Baer. Matures the same as Break O'Day between Earliana and Bonny Best. Fruits semi-globular, very attractive bright scarlet red, smooth and quite firm. Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.00.

INTERMEDIATE OR SECOND EARLY SORTS

Certified Rutgers—Pictured opposite. The outstanding new variety in its class. To insure you getting the variety at its best we offer seed certified under supervision of New Jersey Experiment Station where it originated. Really an improved Marglobe maturing a little earlier and being a heavier yielder. It ripens from the inside out to a uniform bright scarlet color. Thrives under more unfavorable conditions than other varieties. Pkt., 10c; oz., 35c; ¼ lb., \$1.50.

Bonny Best. Earliest of all tomatoes in this group. Fruits medium large, apple-shaped, smooth, solid, bright scarlet in color, of excellent quality, setting in clusters of 4 to 8. Unexcelled as a general purpose tomato. Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.00.

Chalks Early Jewel. Nearly as early as Bonny Best. Produces the largest, smoothest, tomatoes in its class. Color bright red flavor delicious, fruits solid and meaty. Prolific yielder. Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.00.

Marglobe. A most popular all-purpose variety, very vigorous and productive, disease resistant. Uniformly large solid fruits, bright scarlet, of finest quality and flavor. Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.00.

RUTGERS

OXHEART

A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid, meaty fruit of a delicious sub-acid flavor. Almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands. For the home garden. Pkt., 10c; ½ oz., 35c; oz., 60c; ¼ lb., \$2.00.

Oxheart

this giant of all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt., 15c; 2 pkts., 25c; oz., 60c; ¼ lb., \$2.00.

New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkt., 5c; oz., 25c; ¼ lb., 85c; 1 lb., \$2.50.

Beefsteak. Bred from the original Ponderosa, and resembles it closely. A brilliant crimson scarlet, wilt resistant, the large fruits are carried in clusters. Flesh is very solid and meaty, making it excellent for table use. Pkt., 10c; oz., 40c; ¼ lb., \$1.50; 1 lb., \$5.50.

Ponderosa. Vines large and spreading, bears until frost. Fruits are purplish-pink and grow to immense size. They are solid, meaty and of finest flavor. Pkt., 5c; oz., 40c; ¼ lb., \$1.50; 1 lb., \$5.00.

SMALL FRUITED VARIETIES FOR PRESERVES

Ground Cherry or Golden Husk. Fruits small, yellow round of delicate flavor. Fine for preserves. Pkt., 5c; oz., 40c.

Yellow Plum. About two weeks earlier than Ground Cherry. Very productive. Fruit plum shaped, about 2 inches long. Pkt., 5c; oz., 40c.

BISON

3"ALL AMERICAN"WINNERS

A special introductory offer to the 3 best tomatoes you can grow today. Nature's finest fruit all-season long at its best. See the superior quality of these special selections for yourself. Bison (early), and Rutgers (second Early) are pictured on this page. Berry's Improved Giant Ponderosa (late) the largest tomato that grows is especially for the home garden. 3 pkts.; 1 each all 3 best varieties only 29c. The biggest tomato seed value of the year.

PINK FRUITED FAVORITES

Pink Earliana. The earliest of the pink fruited varieties. Flesh is solid, of fine texture and best quality. Fruits smooth, purplish pink. A prolific bearer, in clusters of 6 to 8 large fruits near main stem. Pkt., 10c; oz., 35c; ¼ lb., \$1.25; 1 lb., \$4.00.

Pink Marglobe. A new disease resistant variety developed by Ohio State Experiment Station. Earlier than regular Marglobe, it is also a heavier yielder. Otherwise similar to regular Marglobe, but flesh is Pink. Pkt., 10c; oz., 35c; ¼ lb., \$1.25; 1 lb., \$4.00.

Golden Queen (Yellow). The standard large yellow variety for main crop planting. Fruits are smooth and large, uniform in size, and of attractive golden yellow color. They are solid and meaty, mild and delicious in flavor. Pkt., 5c; oz., 35c; ¼ lb., \$1.25; 1 lb., \$4.00.

Golden Ponderosa (Yellow). A very large deliciously mild flavored late variety for the home garden, wilt-resistant and nearly seedless. Same as Ponderosa except flesh deep Yellow color. Pkt., 10c; oz., 40c; ¼ lb., \$1.50.

LATE or MAIN CROP

Berry's Giant Improved Ponderosa—the largest tomato developed to date. Our seed has been triple tested, in laboratory, greenhouse and trial grounds in removing the roughness and splitting tendency from

BERRY'S GARDEN BEANS

Famous for Their Tested Quality

WHAT'S THE DIFFERENCE IN BEANS?

When you see the outward appearance of anything, you can't tell what's behind it on the inside. The most important step back of Berry's superior quality Garden Beans is the breeding. Better characteristics such as vigor, yield, hardiness, finer quality, etc., had to originate in the breeding.

Second, our beans are grown in mountain areas to make them more hardy and resistant to wilt and disease. Our fields are carefully rogued by experts to take out any plant not true to type. All of our Beans are then hand-picked and polished to insure you finest appearance and highest germination.

Buy direct from us—get the best at low prices. For larger quantities see our special wholesale price list page 53.

GREEN PODDED BUSH BEANS

121X Berry's Stringless Green Pod. Earlier and hardier than regular varieties. The finest quality and largest yields for the home garden. (Pictured on page 51.) Postpaid prices: Large pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c.

116 Tendergreen. (See picture at right.) Similar to Full Measure, but hardier and more prolific. Light green pods 7 in. long are round, meaty, tender, stringless. For the home garden, canners or truckers. Postpaid: Pkt., 5c; ½ lb., 18c; 1 lb., 29c; 2 lbs., 52c; 3 lbs., 70c.

The next 4 old favorites at these low postpaid prices: Pkt., 5c; ½ lb., 16c; 1 lb., 25c; 2 lbs., 45c; 3 lbs., 60c.

134 Burpee's Stringless Green Pod. The old favorite garden bean for home, market or canning. Plants sturdy, very prolific. Pods round, fleshy, perfectly stringless and of excellent quality.

132 New Bountiful. An extra early green podded variety ready to pick in six weeks. Vines vigorous and productive. Brittle, meaty and tender, absolutely stringless, and of fine flavor.

133 Giant Stringless Green Pod. One of the favorite stringless podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer.

125 Tennessee Green Pod. One of the earliest snap beans, pods long, flat, dark green, of excellent flavor. Plants hardy and productive.

150 Red Kidney. Dark Red. The old-fashioned baking bean. Produces large flat green pods, well filled with large red kidney-shaped beans, rich in flavor. **Postpaid: 1/2 lb., 14c; 1 lb., 22c; 5 lbs., 90c.**

BEAN CULTURE—HOW TO PLANT

Don't plant until the ground is thoroughly warm. Plant about 2 1/2 feet apart in rows, about 3 inches apart in the row. Cover about 2 inches pressing soil down firmly. One pound plants about 100 feet of row. Plant every 10 days to two weeks for a continuous supply. Pick frequently to insure longer bearing. Don't pick or cultivate when vines are wet.

Plant Pole Beans one week later than Bush Beans. Plant 3 to 6 beans to a hill, about 3 to 4 feet apart.

LATE SWEET CORN

All 4 varieties postpaid: Pkt., 5c; 1/2 lb., 16c; 1 lb., 25c; 2 lbs., 45c; 3 lbs., 65c.

289 Golden Evergreen. A cross between Golden Bantam and Stowell's Evergreen combining the deliciously sweet flavor of Golden Bantam with the tenderness of Stowell's Evergreen. Ears with 14 to 18 rows, kernels rich golden yellow of finest quality.

290 Early Evergreen. The earliest of all Evergreens. Ears are fully as large as Stowell's and remain tender for a longer period. One week earlier.

287 Stowell's Evergreen. The best known standard main crop sweet corn, excelling all others. Ears 8 inches long, 16 to 20 rowed. Very productive. Kernels clear white, deep, medium width, sugary and tender.

284 Country Gentleman. One of the best known late varieties, superior for home and market gardens and commercial canners. Stalks often with two ears. Ears 7 to 8 inches long, with narrow irregular grains of good quality, sweet and tender.

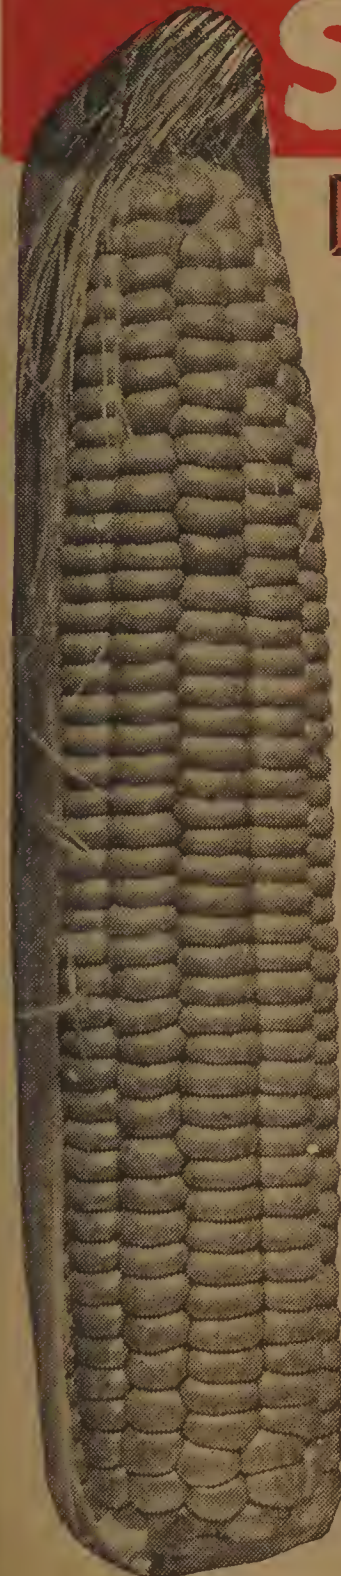

HYBRID SWEET CORN

284X Golden Country Gentleman. A golden yellow country Gentleman, large ears, shoe peg Kernels, sweet, fine quality.

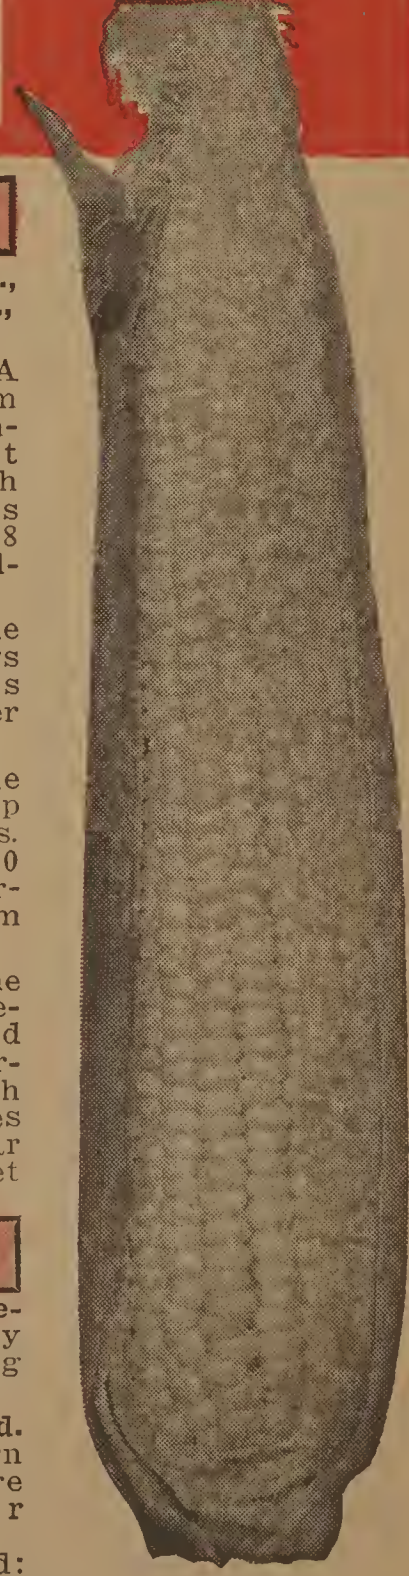

277X Golden Bantam Hybrid. Your favorite early Sweet Corn now better than ever. More hardy, finer flavor, heavier yielder.

These 2 varieties postpaid: Large pkt., 10c; 1/4 lb., 15c; 1/2 lb., 25c; 1 lb., 40c; 2 lbs., 70c.

Asparagus

CABBAGE

EARLY VARIETIES

971X Berry's Earliest Cabbage. The best for earliness, quality and productiveness. (See picture page 51.) Postpaid: Pkt., 10c; oz., 35c; ¼ lb., \$1.10.

179 Golden Acre. A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for earliest markets. Postpaid: Pkt., 5c; ½ oz., 15c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.35.

These 4 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10.

176 Early Jersey Wakefield. Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers.

182 Copenhagen Market. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut.

185 Norseman. A good shipping variety, heads round, weigh 8 to 10 lbs. Superb quality.

178 Extra Early Express. Extra early sort, oval head, very large for an early cabbage. A fast grower.

CELERY OR CHINESE CABBAGE

A vegetable well deserving its fast growing popularity. The leaves are highly palatable, although it heads in 55-60 days. Fine boiled or for cole slaw.

175 Chinese PeTsai. The most popular variety for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August. Pkt., 5c; oz., 18c; ¼ lb., 55c; 1 lb., \$1.85.

LATE VARIETIES

Postpaid price on following six varieties: Pkt., 5c; oz., 15c; ¼ lb., 50c; 1 lb., \$1.75.

186 Premium Late Flat Dutch. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity.

187 Drumhead Savoy. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper.

191 Danish Ballhead. A superior variety, one of the finest late cabbages. Extremely hard heads, 8 to 9 inches across. Desirable for shipping, storage, and kraut. Pictured at right.

192 Volga. Matures early, heads large and solid, disease and rot resistant. Stands long without bursting. A standard variety for market gardeners and shipping.

194 Mammoth Redrock. The largest and best red cabbage. It is fine for slaw, pickling or boiled. A sure header, heads weighing 10 to 15 lbs. An excellent keeper.

173 Surehead. A main variety of Late Flat Dutch type. They sell on sight in the market. Extra solid, fine grained, with a very small core and of excellent flavor.

177 Penn State Ballhead ("All-America" Award 1934). Handsome, hardy late cabbage for keeping qualities. For home garden or shipping. Plants vigorous, compact with few thick outside leaves. Postpaid: Pkt., 10c; ½ oz., 25c; 1 oz., 40c; ¼ lb., \$1.20.

CAULIFLOWER

Choicest Imported Seed

Danish Giant

220 Early Snowball. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. Postpaid: Pkt., 10c; ¼ oz., 25c; oz., 85c; ¼ lb., \$3.00; ½ lb., \$5.50.

221 Berry's Danish Giant. Snow white heads, large and compact, of excellent quality. The finest late variety. Postpaid: Pkt., 10c; ¼ oz., 25c; oz., 85c; ¼ lb., \$3.00; ½ lb., \$5.50.

MEDIUM EARLY

181 Early Flat Dutch. A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs.

180 Glory of Enkhuizen. A variety from Holland. Used largely for kraut, also by truck gardeners and shippers. Heads globe shaped, solid, with few outer leaves, weigh 6 to 8 lbs. Remarkably fine flavor, splendid keeper.

YELLOWS DISEASE RESISTANT VARIETIES

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains. "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

These 4 best varieties postpaid: Pkt., 5c; oz., 35c; ¼ lb., \$1.00; 1 lb., \$3.50, postpaid.

174 Marion Market. Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later.

190 Wisconsin Hollander No. 8. Similar to Danish Ballhead. Excellent for kraut and winter storage.

183 Jersey Queen. 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed, small and compact, permitting close planting.

188 Racine Market. 60 days. Selected from Copenhagen Market. It is decidedly early and uniform; heads are round, solid, and of superior quality. Fine for early kraut.

Danish Ballhead

Postpaid prices on following two varieties: Pkt., 5c; oz., 15c; ¼ lb., 50c; 1 lb., \$1.75.

BETTER SEED MEANS BETTER GARDENS

TABLE CARROTS

012X Berry's Tenderflesh Carrot. A superbly delicious quality vegetable, entirely coreless. A vegetable favorite of all who try it. (Pictured page 51.) Postpaid: Pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 65c; $\frac{1}{2}$ lb., \$1.15; 1 lb., \$2.00.

The following varieties postpaid: Pkt., 5c; oz., 8c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75.

201 Oxheart. A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder.

202 Early Scarlet Horn. One of the best for table use and liked by gardeners for early market. Crisp and sweet.

204 Danvers Half Long. None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive.

205 Chantenay. A fine sort for bunching, market or home gardens. About 6 inches long, stump rooted. deep orange in color. A heavy yielder.

212 New Coreless Carrot. The greatest improvement made on any vegetable in years. Fine flavor, tender, and sweet. Early, uniform size. Postpaid: Pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 65c; $\frac{1}{2}$ lb., \$1.15; 1 lb., \$2.00.

STOCK CARROTS

These two varieties: Oz., 8c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75.

206 Long Orange. Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper.

208 Mastodon. Flesh white, crisp, solid, very sweet in flavor. Roots frequently measure 15 to 20 inches in circumference. A heavy yielder.

EGGPLANT

These two varieties postpaid: Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.50; $\frac{1}{2}$ lb., \$2.50; 1 lb., \$4.50.

310 Improved New York Purple. Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

312 Black Beauty. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

New
Coreless
Carrot

JAP HULL-LESS HYBRID POP CORN

New Minhybrid 250 Japanese Hull-less Popcorn is the variety to grow this year. It will give you bigger yields, earlier maturity, better quality and a premium price.

Introduced by Minnesota Experiment Station, records since 1931 show: (1) 16% greater yield than average Jap. Hull-less; (2) 20% greater popping expansion; (3) earlier maturity; (4) it is practically free from smut; and (5) it is in popping condition 30 days earlier than regular Jap. Hull-less.

Last year there was not enough to supply the demand at 45c a pound. This year we offer it at new low prices postpaid: $1\frac{1}{2}$ oz. pkt., 10c; $\frac{1}{2}$ lb., 19c; 1 lb., 32c; 2 lbs., 59c; 3 lbs., 81c.

CUCUMBER

225 Berry's Champion Pickler. The best variety for home gardens. Excellent for slicing and pickling. Fruits dark green in color, uniform in size, straight and smooth. We recommend this variety very highly. Postpaid—Pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 50c; $\frac{1}{2}$ lb., 85c; 1 lb., \$1.49.

The following 7 varieties postpaid: Pkt., 5c; oz., 12c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 95c.

226 National Pickling. The finest early pickling type slightly larger than Early Green Cluster. Uniformly smooth and cylindrical with well rounded ends. Flesh thick preventing splitting in the center and hollow sides in the pickles. Size 7x3 inches, $1\frac{1}{4}$ pounds.

228 Chicago Pickle. One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size.

230 Early Green Cluster. A fine pickling variety and for early slicing. Very prolific, fruits small, pale green, borne in bunches.

231 White Spine Evergreen. Fine for home garden, and widely used for shipping. Dark green, holds color well. Crisp and tender.

232 Cool and Crisp. Extra early variety, medium sized fruits, crisp and tender, fine mild flavor.

233 Boston Pickler. Very early and prolific; uniform size, slightly tapered, weigh about $1\frac{1}{2}$ lbs. Dark green. Fine for table.

234 Improved White Spine. Vigorous and productive, fruit uniform, seven to nine inches long, very showy.

These two varieties postpaid: Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.15.

239 Straight 8. The highest award winner of the All-America trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping.

236 Improved Long Green. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to $3\frac{1}{2}$ lbs., flesh white, firm and crisp.

Berry's Pickling Cucumber Collection

Here are the finest pickles you ever had. Assorted for size, also for season, being early, medium and late. Plant this collection of 3 best varieties. No. 140C.

1 oz. Early Green Cluster
1 oz. Chicago Pickling

ONION SEED and ONION SETS

PURE BRED SELECT STRAINS

Dealing in large quantities of onion seed has enabled us to furnish onion and onion seed growers fine strains of all standard varieties. We also have found seed grown in Idaho to run higher in germination normally than California grown seed. We can furnish seed grown in either state though.

We know there are many good onion seed growers for critical buyers. Trying to be of greatest service to growers we have complete stocks in the varieties listed from 3 to 4 of our best known growers in this country.

We can furnish you onion seed to fine advantage. Our stocks are new crop (1939) of high germination. If you desire a sample or further quantity prices kindly write us. We have the germination and grower to furnish on request. We are pleased to quote vegetable growers association the very lowest prices on high quality stocks guaranteed satisfactory.

NOTE: Our prices are low but quality is high. We guarantee new crop, high germinating, true to type seed or **YOUR MONEY BACK.**

These 12 varieties postpaid: Pkt., 5c; oz., 18c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

432 Southport Red Globe. The finest of the red onions. Uniform in size, handsome, perfect globe type. An excellent keeper. Skin glossy red, flesh white, fine grained and tender. (Picture at right.)

426 Improved Large Red Wethersfield. Bulbs large, well flattened, skin purplish-red, flesh white, tinged with pink, very firm. Keeps well; an excellent commercial variety.

429 Berry's Gigantic Globe. A handsome fine flavored yellow globe type. Flesh white, mild and tender.

431. Early Yellow Globe. 3 weeks earlier than Danvers or Southport Yellow Globe. Very hardy, heavy yielder. Beautiful yellow color. Globe shaped. Best for storage of early types.

441 Mammoth Silverskin or White Portugal. A large onion, skin and flesh white, mild flavored. Excellent for sets, pickling, bunching, and storage.

427 Mammoth Prizetaker. Produces handsome onions of very large size; sometimes weigh up to 6 lbs. Light yellow; flesh white, mild and fine flavored.

428 Large Red Wethersfield. One of the best winter keepers; also used largely for sets. Early ripening, but grows throughout the season. Skin deep purplish red, flesh white flushed with pink.

430 Mammoth Silverking. One of the largest onions in cultivation, averaging from 15 to 22 inches in circumference. Uniform in size, matures early. Skin is silvery white, and flesh tender, mild and sweet.

435 Yellow Globe Danvers. A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh and mild flavor. Most productive with fine keeping qualities.

438 White Queen. A fine early maturing pickling onion. Small flat bulbs, pure white, very delicate in flavor. A favorite with market gardeners who desire bunching onions.

443 Ebenezer. An excellent variety for producing sets of exceptional keeping quality. Matured bulbs will keep in good condition all winter. Flesh white, tender and unusually mild.

436 Southport Yellow Globe. Grown for commercial purposes. Large, globe shaped, rich yellow color. Flesh white and mild. An excellent keeping onion. (Picture at left.)

These 2 varieties postpaid: Pkt., 10c; oz., 30c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

425 Yellow Sweet Spanish. Most popular variety today. Golden yellow, larger than Prizetaker, flesh white, very mild and of pleasing flavor. Very prolific, excellent for shipping or fall storage.

434 White Sweet Spanish. The largest and mildest of all onions. American grown strain. Globular, with golden yellow skin; flesh white, very mild and of good flavor.

Yellow Sweet Spanish

Southport Yellow Globe

MUSK MELONS

SALMON FLESHED

402 Berry's Favorite. (Center Picture.) A large size melon with quality equal to any. Early, luscious flavored, finest eating qualities for the home garden. Size about 6¾ by 7¾ inches, weighs about 6¾ pounds. Prominent ribs, good netting. **Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

409 Golden Delicious. A popular medium early, large melon. Thick flesh of finest texture and rich flavor. Good netting over a hard rind. Slightly smaller than Berry's "Favorite" and ribs not so prominent. **Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

410 Shumway's Giant. The largest of the pink fleshed melons it is deeply ribbed with a fine netting. Weighs about 10 pounds. Skin turns creamy yellow as it ripens. About 4 days later than Golden Delicious. **Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

7 other salmon flesh varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

418 Osage. (Picture at right.) The finest flavored "Queen" of salmon-fleshed melons. Flesh exceptionally thick, tender and sweet. Fruits distinctly ribbed and netted; weigh around 6 lbs.

411 Sugar or Honey Rock. All-American winner in 1933. Has been most popular for the home garden since. Very early, weighs about 3 pounds, flesh thick and very sweet.

407 Bender's Surprise. Largest pink fleshed, oval shaped melon. Early for its size, flesh of exceptionally high quality. For the home garden.

413 Hoodoo (Hearts of Gold). Fruits practically round, weighing about 2 lbs., small seed cavity. Tender, juicy, sweet and delicious. A good shipper.

414 Banana. Resembles a banana in shape, growing 18 to 30 inches long. Flesh salmon color, with delicious banana-like flavor.

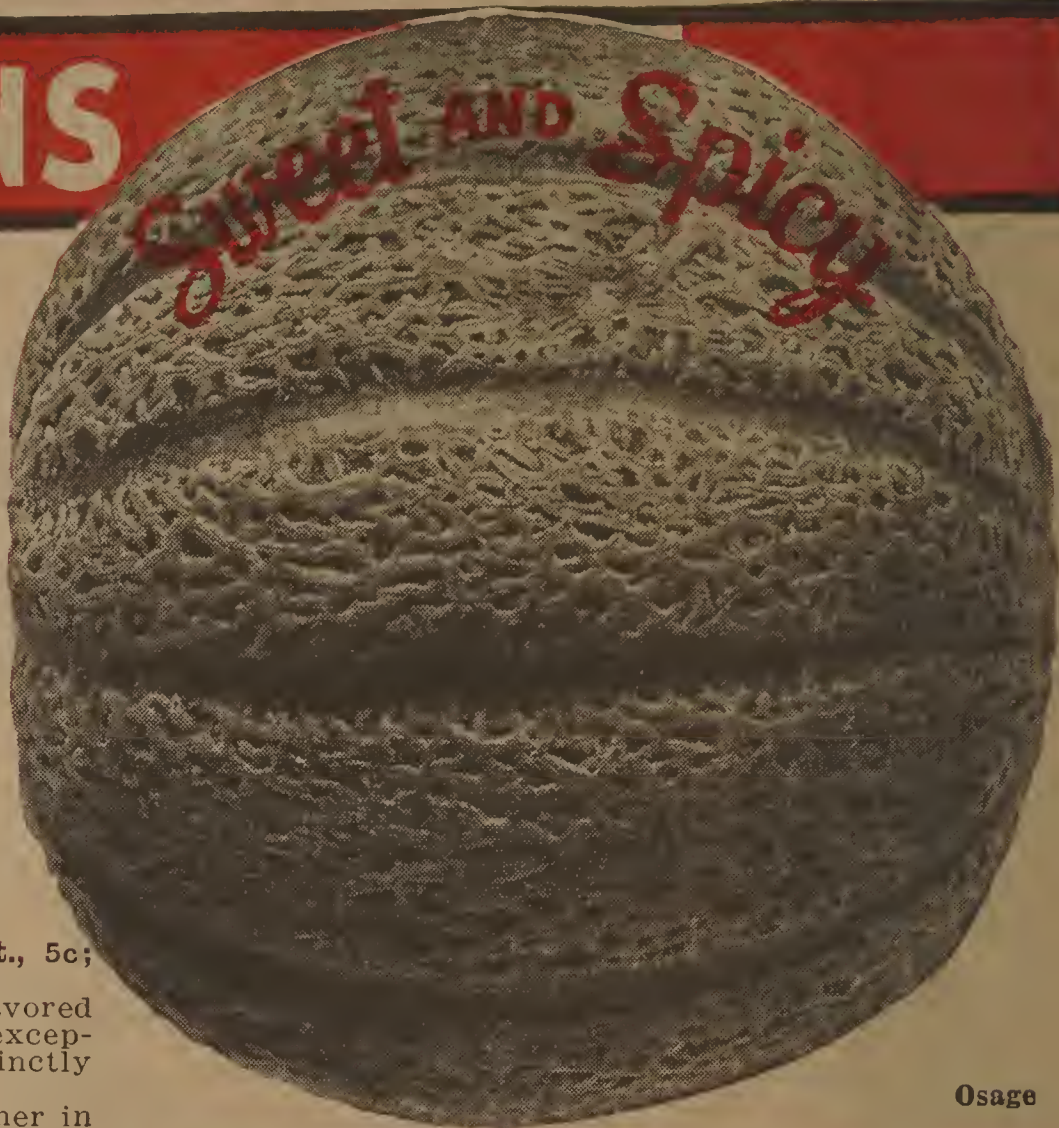

420 Hales Best. An early melon with very thick flesh of sweet flavor. A Rocky Ford type, but excelling all others for long distance shipping to markets.

416 Tip Top. Very productive, of fine appearance, showy. Fruits pale green, turning to yellow at maturity; flesh bright salmon, sweet and delicious. Weighs about 8 lbs.

423 Mixed. Give the boys a treat. Start them in gardening with something good. The best assorted varieties for a home melon patch and local markets. The biggest bargain on the page. **Postpaid: Giant Pkt., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c.**

Early Select
Rocky Ford

Osage

GREEN FLESHED

417 Gold Lined Rocky Ford. In delicious flavor Gold Lined far excels the regular Rocky Ford. It is slightly longer and a few days later. Oval in shape, small seed cavity. Flesh thick and firm. **Postpaid: Pkt., 10c; oz., 25c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.00.**

Next 4 varieties postpaid:
Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

408 Montreal Market. Fruits very large, thick, green meated, delicious and sweet. Often weigh 18 lbs. Almost round, deeply ribbed, well netted.

412 Early Hackensack. A most popular variety for home use and truck gardening. Fruits large, globular, flattened. Flesh is thick, very sweet and spicy.

405 Early Green Nutmeg. One of the oldest and most popular varieties. Very early and prolific. Fruits weigh about 3 pounds, are heavily ribbed and well netted.

401 Extra Select Rocky Ford. (Picture at left.) Probably the most widely known cantaloupe. Almost round, covered with netting. Green flesh of delicious flavor. Fruits weigh about 2½ lbs.

BERRY'S FAVORITE MELON PATCH

¼ lb. each of **Golden Delicious, Osage, and Rocky Ford. Value 80c. No. 601—only 55c postpaid.**

MUSTARD

Postpaid prices on following four varieties: **Pkt., 5c; oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 55c.**

710 Chinese Curled. The best known and most popular for greens. Large leaves. Ready for use in 6 weeks after sowing.
713 Southern Giant Curled. The most popular sort for greens. Leaves long and wide, light green, heavily crumpled and curled at the edges.

711 Large Smooth Leaved. Large broad oval leaves of deep green color with a white rib. A vigorous variety.

580 Mustard-Spinach. A quick grower, resistant to heat and drought. Used for greens, combines flavor of both mustard and spinach.

WATER MELONS

Berry's Improved Kleckley Sweet

WHITE SEEDED

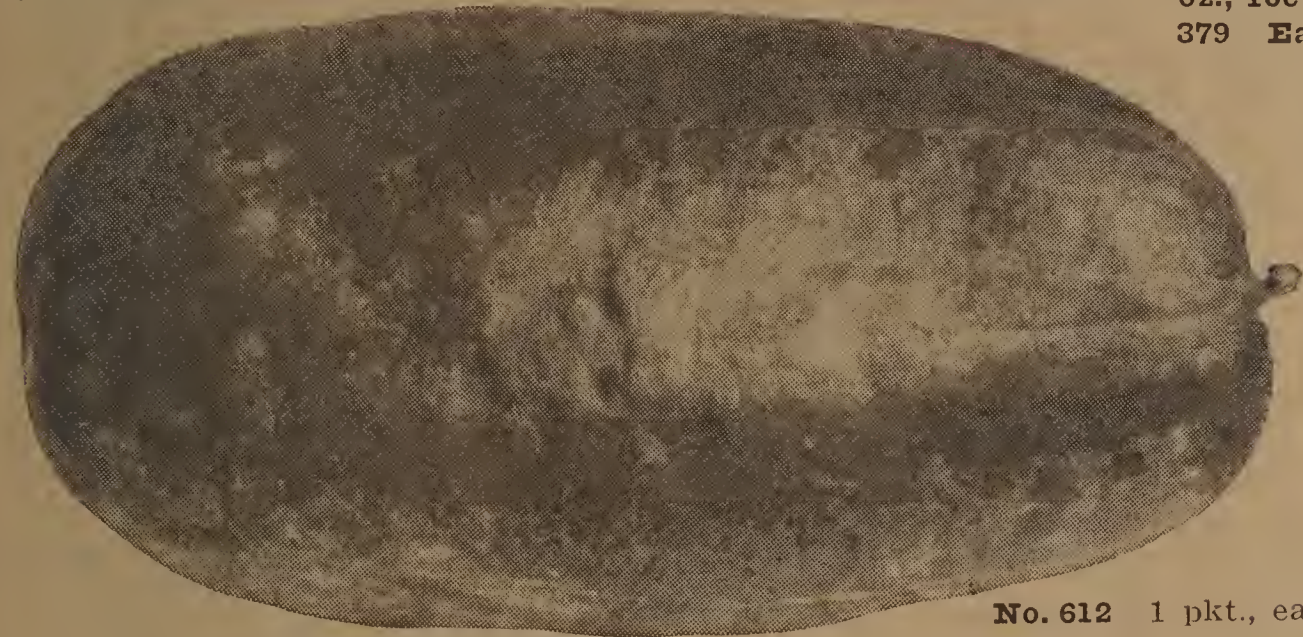

368 Berry's Improved Kleckley Sweet. Finest melon for home and market gardens. An improved type of the old popular strain; larger and wilt-resistant. Medium early, dark green skin, with bright red flesh very tender and melting. **Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

153X Berry's Mammoth Melting Sugar. Very early for such a large melon. Sweetest, most delicate flavor of any. (Pictured page 51.) **Postpaid: Pkt., 10c; oz., 25c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.75.**

All other white seeded varieties postpaid: **Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 3 lbs., \$1.65.**

370 Georgia Rattlesnake. A large long melon, striped light and dark green. Rind rather thick; flesh red, of good quality. Very prolific and drought resistant.

355 Peerless or Ice Cream. Flesh bright scarlet, sweet and of excellent flavor. Medium sized. One of the best early melons for the home garden.

Halbert Honey

352 Halbert's Honey. One of the best for home and local markets; not a good shipper. Color dark green. Thin rind, rich red sugary flesh of fine texture.

356 New Irish Grey. Large, long grey melon of excellent quality. Rich red flesh of good texture. Rind thin but very tough. Good shipper.

360 Tom Watson. Very popular shipping melon of the long type. Early; keeps well. Flesh bright red, of excellent flavor.

362 Light Icing. A long greenish grey melon of medium size. Rich red flesh of delicious flavor and sweetness. Poor shipper.

369 Golden Honey. Dark green, medium sized, long oval shape. Cream colored flesh, which is very tender and delicious.

372 Phinney's Early. Small, long type, light and dark green striped. An early melon. Very prolific. Flesh pinkish red.

377 Stone Mountain. Light veined with dark green. Fruits round, weigh about 45 lbs. Flesh rich red of fine texture, tender, sweet, luscious. (See picture at right.)

Berry's "Sweet As Honey" Melons

1 oz. Dixie Queen **No. 610 29c pp.**

SAVORY GARDEN PEAS

EXTRA EARLY VARIETIES

364X Berry's Supreme Wonder Pea. A variety you will want to plant several times during the spring. Finest quality for eating fresh or canning, most abundant yielder. **Postpaid: Large pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 3 lbs., \$1.00.**

These wrinkled varieties postpaid: Pkt., 5c; ½ lb., 17c; 1 lb., 27c; 2 lbs., 49c; 3 lbs., 70c.
451 New Laxtonian. (1½ ft.) The best known of the early dwarf, large podded sorts. Large telephone like pods of finest quality. Requires no support, making it one of the most popular varieties. (Pictured below.)

478 Laxton's Progress. An excellent and standard dwarf early variety for home gardens. Bears heavily, producing straight, plump deep green pods. Each pod contains 8 to 10 large sweet deep green peas.

450 World's Record. (2 ft.) A sure cropper uniform in maturing for home gardens and early markets. An improved Gradus, a little earlier, more dwarf and prolific.

459 Berry's American Wonder. (1 ft.) Vines bear in greatest abundance. Pods large, containing 5 to 8 delicious peas. Very early.

460 Thomas Laxton. (2½ ft.) A great favorite of home and market gardeners. Pods single, plump and square ended, containing 7 to 8 large tender peas of good quality.

464 Nott's Excelsior. A very popular and profitable pea for home gardens. Prolific bearer of dark green pods. Pods contain 5 to 8 tender, sweet flavor peas.

458 Premium Gem. (1½ ft.) A new development, wilt resistant, for the home garden. Early and prolific of good quality.

456 McLeans Little Gem. A pea that always gives entire satisfaction. Very early but has the fine sugary flavor of later sorts. Pods 2½ to 3 inches long, round and filled with peas of delicious flavor.

Three smooth varieties postpaid: Pkt., 5c; ½ lb., 15c; 1 lb., 24c; 3 lbs., 65c; 5 lbs., \$1.00.

455 Early Alaska. Smooth seeded, and earliest of all. Hardy, vigorous grower maturing well filled pods of finest quality. Ideal for first markets and home gardens.

480 Early Bird or Laxton's Superb. (2 ft.) The earliest large podded semi-wrinkled pea, bearing pods containing 7 to 9 large peas of finest quality. Hardy enough to plant a week ahead of wrinkled varieties.

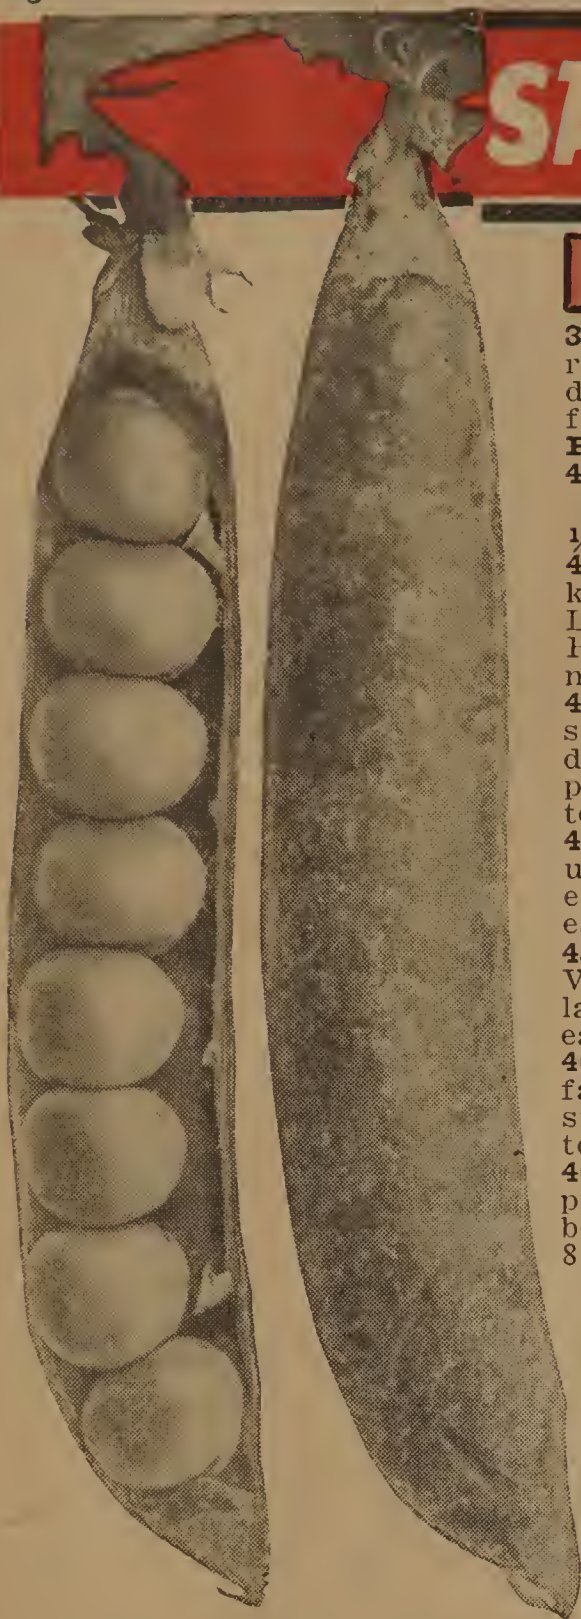

Pea Culture

Peas thrive best in a rich soil and moderate temperature. Smooth seeded varieties are most hardy and can be planted quite early 2 to 3 inches deep. Don't plant wrinkled varieties until ground is warm and dry. 1 lb. to about 50 feet of row.

SPECIALS

463 Little Marvel. (18 in.) Home gardener's favorite. Exceptional in quality and yield. Pods well filled with tender peas. Extra early. **Postpaid. Large pkt., 10c; ½ lb., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.10.** Not prepaid: 10 lbs., \$1.30. (Picture at left.)

468 Berry's Everbearing. A prolific and continuous bearing variety. Pods 3 to 4 inches long containing 6 to 8 large wrinkled peas of superior flavor. The best main crop or mid-season variety. **Postpaid: Large pkt., 10c; ½ lb., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.10.**

Little Marvel

457 First and Best. Favorite home garden variety for early crop. Very hardy and abundant yielder. Yellow seeded peas 6 to 8 to a pod.

LETTUCE CRISP, HEALTHFUL AND DELICIOUS ALL THE TIME

Heading Varieties

The following 6 varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

330 May King. An extremely early, fast growing type. Heads small and compact, with a fine, rich, buttery flavor.

331 Crisp as Ice. Attractive bronze, glassy leaves. Heads solid, medium sized, well blanched and of delicate flavor. Popular for the home garden.

332 Improved Hanson. Unsurpassed for home and market garden use. Heads large and compact, tender and sweet, light yellow-green color.

333 Selected Big Boston. A very popular variety for forcing; splendid shipper. Very solid heads, extremely tender. Leaves tinged with brown, heart light golden yellow.

334 California Cream Butter. A fine early heading variety. The solid heads are a rich golden yellow with a most agreeable and delicate buttery flavor. A good shipper and ready seller on the market.

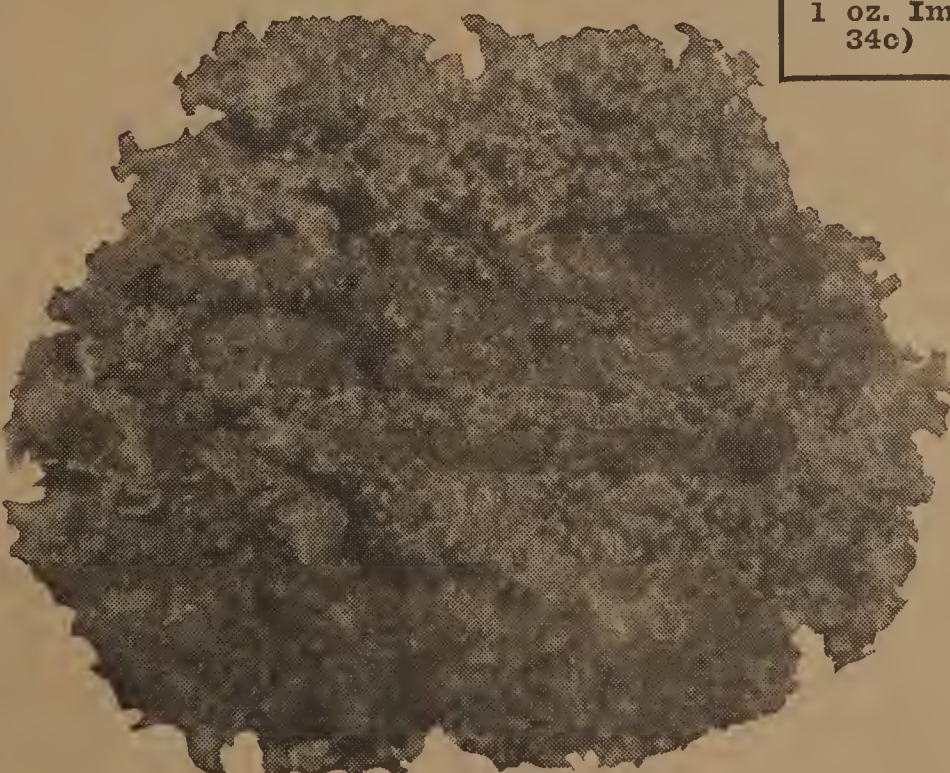

336 Iceberg. A large late variety. Conical shaped heads, of medium size, crisp and sweet, white interior. Outer leaves light green tinged with brown, crinkled.

Postpaid, Berry's Bountiful and New York Wonderful. Pkt., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.75.

335 Berry's Bountiful. Grows beautiful compact heads, weighing 2 to 3 lbs. Exceedingly tender, creamy flavor. A splendid variety for shipping. None excels.

337 New York Wonderful. The outstanding shipping variety. Leaves dull green, heads large and solid, crisp and of excellent quality, fine flavor. (Pictured above.)

Grand Rapids Lettuce

New York Wonderful

LOOSE LEAF VARIETIES

These 4 varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

326 Black Seeded Simpson. A popular variety, leaves large, light green in color. Best for forcing. Tender.

327 Early Curled Simpson. One of the most widely used for home gardens. Very early, non-heading, of excellent flavor.

328 Grand Rapids. Excellent for early planting outside, and for forcing. Superior quality, beautiful appearance, leaves light green, heavily fringed. (Picture below.)

329 Early Prizehead. An early non-heading variety. Remains tender and crisp. Leaves medium green, light brown edges.

SUPREME WONDER

LATE VARIETIES

Postpaid price of following 2 varieties: Pkt., 5c; ½ lb., 18c; 1 lb., 29c; 2 lbs., 54c; 3 lbs., 75c.

465 Potlatch or Fillbasket. (26 in.) A superior late variety for home and market. Peas tender, fine flavored.

473 Improved Stratagem. A favorite with home gardeners because of its large, handsome pods. Very productive. Pods long, well filled with large peas of delicious flavor.

474 White Eyed Marrowfat. (5 ft.) Vines hardy and productive. Pods large, peas of fair quality. Grown extensively for dry use. Postpaid: Pkt., 5c; ½ lb., 16c; 1 lb., 25c; 2 lbs., 45c; 3 lbs., 60c.

475 Mammoth Melting Sugar. (4-5 ft.) The best of the edible podded sorts for home and market garden use, wilt resistant. Very tender and richly flavored. Postpaid: Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.40.

LARGER YIELDS-BETTER QUALITY

PUMPKIN

481 Mammoth Prize. The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick of a beautiful bright yellow, fine grained, solid and tender. **Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c; 5 lbs., \$4.00.**

483 Sweet, or Sugar Pie. Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.**

485 Kentucky Field. Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow, coarse, thick and nutritious, and of good flavor. Also used for stock feeding. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.**

486 Connecticut Field. (Picture below.) The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.**

487 Cushaw or Crookneck. Very popular variety. Very large, often 2 ft. long, crookneck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.**

488 Large Cheese. Exceptionally early and uniform for early canners and market gardeners. An excellent keeper, making fine pies. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.25.**

489 Mixed. A combination filling all practical purposes: for pies, local markets and stock feed. The boys will find just the right size for Hallowe'en too. **Postpaid: Large Pkt., 10c; ¼ lb., 20c; 1 lb., 60c.**

Connecticut Field Pumpkin

PEANUTS

Should be shelled before planting. Plant in rows 2½ to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

621 New Mammoth Virginia. Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. **Postpaid prices: ¼ lb., 12c; ½ lb., 17c; 1 lb., 30c; 5 lbs., \$1.35.**

PEPPERS

Postpaid prices on any of following 7 varieties: Pkt., 5c; ½ oz., 12c; 1 oz., 20c; ¼ lb., 65c; 1 lb., \$2.25.

510 Sweet Mountain. Plants very productive, growing upright, about 2 ft. tall. Fruits large, smooth, handsome. Green turning to rich red, when ripe.

511 Large Bell or Bull Nose. Plants small, erect, prolific, early. Large fruits bell shaped, deep green turning to scarlet, mild and sweet in flavor.

515 Ruby King. Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes.

517 Pimiento. A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild.

512 Cayenne. A favorite hot variety used largely for canning, pickles, and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red.

516 Neapolitan Sweet Salad. A very early, medium large, prolific variety. Fruits yellowish-green changing to bright red. Flesh extremely mild and sweet.

519 Chili. Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot.

518 California Wonder. One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping, home or market gardening. **Postpaid: Pkt., 10c; ½ oz., 18c; 1 oz., 30c; ¼ lb., 90c; 1 lb., \$3.00.**

Postpaid prices on each of following 2 varieties: Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.25; 1 lb., \$4.00.

513 Chinese Giant. One of the best mango peppers. Plants short, stocky. Fruits large, thick, meaty, of sweet flavor; color deep green changing to scarlet.

514 Golden Dawn or Oshkosh. Of a beautiful golden yellow color. Very sweet, without the fiery flavor. Very productive.

PARSNIPS and PARSLEY

Postpaid prices on all varieties: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 65c; 5 lbs., \$2.45.

502 Improved Hollow Crown Parsnip. Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. Keeps well.

503 Improved Guernsey Parsnip. Roots white, uniformly tapered. Extra thick crown. Flavor delicious.

495 Champion Moss Curled Parsley. Very compact plant, with very dark green leaves. Used for garnishing.

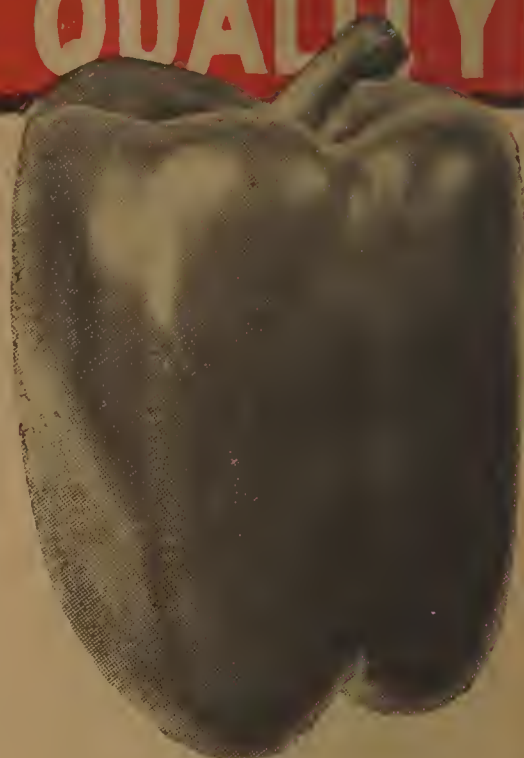

RHUBARB or Pie Plant

Seed and Roots (See page 76)

Postpaid prices either variety: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

626 Victoria. A splendid variety for family use. Sometimes called "wine-plant."

627 Mammoth. Market garden variety, very large and a wonderful producer.

Ruby King Pepper

Hollow Crown Parsnip

ALL TESTED AND GUARANTEED SEED

RADISHES

The following 11 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.00.

526 Crimson Giant. The largest of early radishes. Suitable for early forcing or planting out-of-doors. It is always crisp, tender and of fine flavor. Never gets pithy.

528 Early Scarlet Turnip. An early maturing variety. Roots small, round, skin red. Flesh very white, mild and crisp.

529 Early Round Dark Red. A market gardener favorite. Makes rapid growth and is one of the sweetest, most tender radishes on our list.

530 Early White Turnip. The earliest white radish. Flesh pure white, crisp and tender. Has a short top and is a quick grower.

531 Early Long Scarlet Short Top. Excellent for home or market garden. Roots long and slender, of rich scarlet color. Extra short tops. A quick grower.

532 White Strasburg. A variety popular with market gardeners. Roots about five inches long, thick at the shoulder, tapering to a point. Crisp and tender.

533 French Breakfast. One of the most popular varieties, excellent for home garden, forcing or early outdoor planting. Excels in appearance and quality. Medium sized, olive-shaped. Scarlet with a white tip. Flesh white, crisp and delicious.

535 Early Scarlet Turnip, White Tipped. A favorite for early outdoor planting. Fine in quality and appearance. Roots nearly round, carmine red, white tipped, crisp and mild.

Icicle Radish

538 Improved Scarlet Globe. Our seed is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality.

541 Icicle. The most popular white radish. Grow long and slender, free from side roots. Flesh clear white, brittle, mild flavored.

525 Sparkler. Resembles Scarlet Turnip White Tip, but more white and somewhat flattened on lower side. Very solid, crisp, tender and does not become pithy when ready for table use. Excellent for the home garden.

540 Mixed. We offer an excellent assortment of the best varieties of radishes, early, medium and late. **Postpaid prices: Extra large pkt., 10c; ¼ lb., 15c; ½ lb., 25c; 1 lb., 45c; 5 lbs., \$2.00.**

725X Berry's Beat-em-all. (Illustrated page 51.) The crisp, snappy radish we all like. Extra early—ready to eat in 15 to 18 days after planting. Sparkling red top with dainty white tip. A most superior quality radish for home gardens. **Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

3 DELICIOUS SNAPPY RADISHES

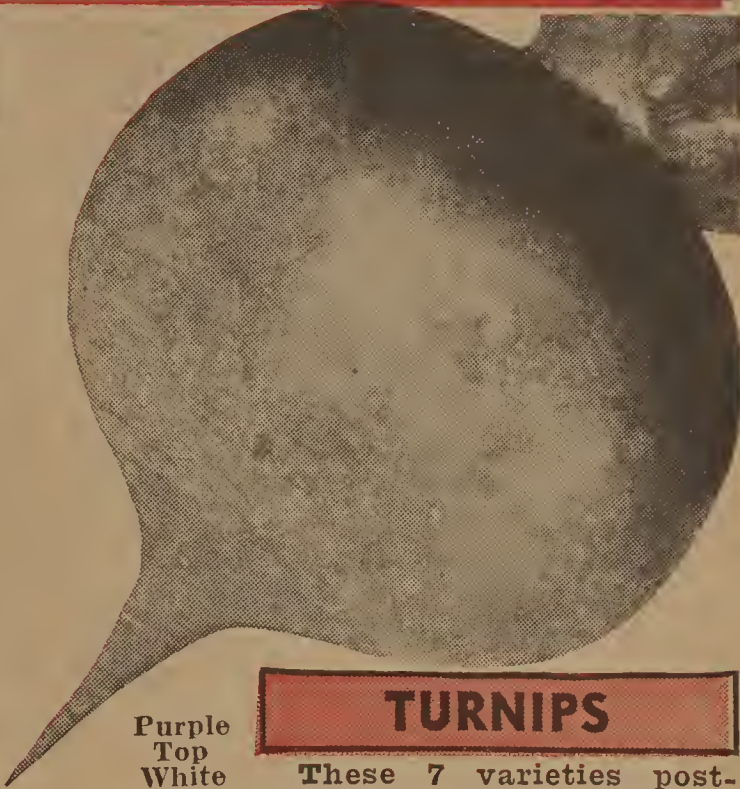

The 3 best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. **No. 650—36c value—only 25c, postpaid.**

1 oz. Berry's Beat-em-all
1 oz. Crimson Giant
1 oz. White Icicle

TURNIPS

These 7 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 19c; ½ lb., 35c; 1 lb., 49c;

5 lbs., \$2.20.

601 Purple Top Strap Leaf. Fine for table use or stock feeding; one of the most widely planted varieties. Tops medium small, roots four to six inches across, flat. Purple-red at the top; flesh white, fine grained and tender.

602 New White Egg. Fine for market gardeners. Roots egg-shaped, smooth.

Skin is thin. Flesh is white, fine grained, cooks mealy and tender. Best quality.

603 Red Top Strap Leaf. A medium early, productive variety. Roots slightly flattened; upper part reddish, white below. Flesh mild, sweet and tender.

605 Large White Globe. A very productive type. Large, globe-shaped, skin white and smooth. Valuable for home garden and market.

607 Purple Top White Globe. (Picture above.) Unsurpassed for home planting or truck gardening. Attractive in appearance, fine in quality. Roots large, globe shaped, lower portion white, upper-part purple-red. Flesh is of fine flavor, white, crisp and fine grained.

609 Cownhorn. Grown largely for stock feeding. Roots 12 to 15 inches long, tapering, often crooked. Flesh tender and mild flavored. A good keeper.

608 White Milan. An extremely early variety, used for forcing or planting out-

doors. Roots white, flesh sweet and tender.

RUTABAGA

These 2 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 19c; ½ lb., 35c; 1 lb., 49c; 5 lbs., \$2.20.

611 New Monarch or Elephant. Yields larger roots and more per acre than any other sort.

612 Improved Purple Top Yellow. A dependable variety. Roots large, round, yellow with purple top; flesh light yellow, firm, sweet and tender.

HERBS

683 Caraway. Seeds used for flavoring bread, pastry, meats and sauces. **Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c.**

685 Dill. Leaves are used in pickles and flavoring soups and sauces. **Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c.**

687 Sage. Leaves and tops used for seasoning and stuffing. **Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 65c.**

693 Sweet Marjoram. Used for seasoning soups, sauces, etc. Can be used either fresh or dried. **Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c.**

White Tipped

VEGETABLE FAVORITES OF THOUSANDS

WINTER SQUASH

These 5 varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., 95c; 5 lbs., \$4.25.

552 Red or Golden Hubbard. Similar to Green Hubbard, only smaller. Fruits weigh 8 to 10 lbs., orange-red with faint cream colored stripes. Flesh very thick, orange-yellow, dry and sweet.

553 Mammoth Chili. The giant among squashes often weighing 150 pounds. The flesh is yellow, very thick, of good quality for stock feed. Also excellent for exhibition.

554 Improved Hubbard. Standard winter variety for home, and market gardeners and the best for shipping. Our strain is very early. Dark bronze-green, rind hard and tough, slightly warted. Fruits weigh about 12 lbs., flesh very thick orange-yellow, fine grained, sweet and dry.

557 Table Queen or Des Moines. Desirable for home and market garden; also good shipper. Fruits acorn-shaped, smooth, thin-shelled, dark green, mature early. Six inches long, 3 inches thick. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well.

559 Kitchenette. Sometimes called Baby Hubbard, being about two weeks earlier. Color of shell a dark glossy green, weight about five pounds and a fine keeper. Flesh fine grained, delicious, golden yellow.

556 Buttercup. A new introduction just the right size for baking. Of excellent quality, flavor is similar to sweet potato. Flesh dry, deep rich orange, texture and keeping qualities the best. Postpaid: Pkt., 8c; oz., 15c; ¼ lb., 40c; 1 lb., \$1.25.

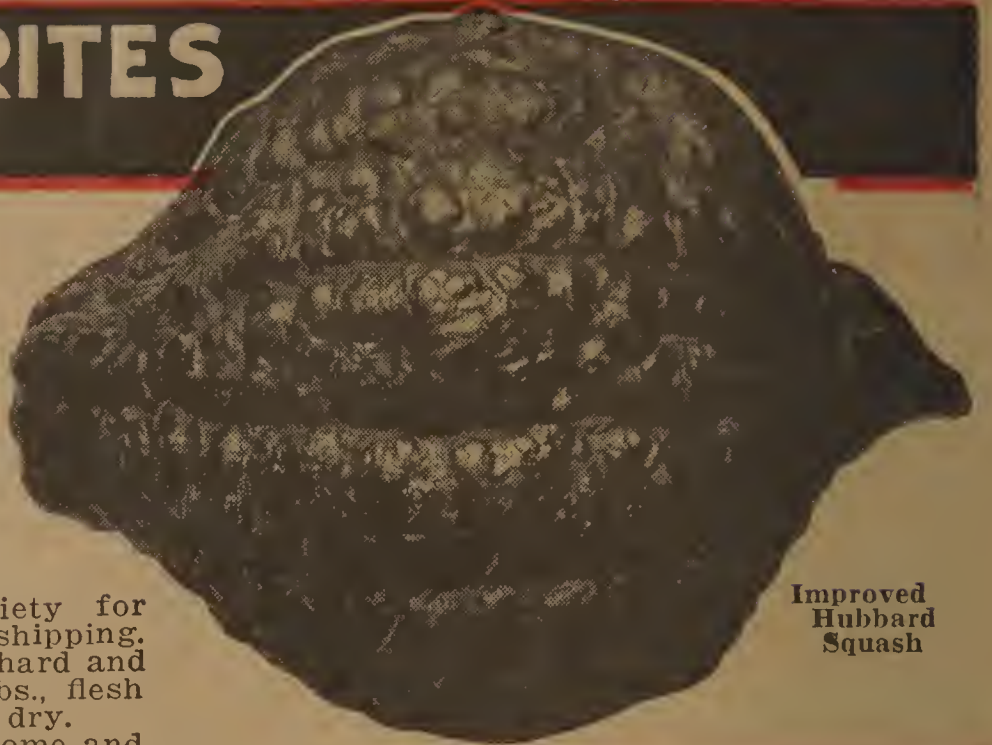

SUMMER SQUASH

These 2 varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 80c; 5 lbs., \$3.50.

561 Mammoth White Bush Scallop. A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit a clear white, and excellent for stewing.

563 Giant Yellow Summer Crookneck. Widely used by market gardeners and shippers. Weight about 5 lbs. Flesh thick and yellow, of rich, meaty flavor.

565 Mixed Squash. The assortment you want. Has all standard varieties in our regular quality seed, both summer and winter varieties. Postpaid: 1 oz. Pkt., 8c; ¼ lb., 20c; 1 lb., 70c.

Improved
Hubbard
Squash

King of
Denmark
Spinach

SPINACH

581 New Zealand. It thrives in hot, dry weather, and almost any soil. May be cut throughout the summer, but cannot stand frost. Leaves small, broad and pointed, while plants are large and spreading. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.25.

These 4 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.25.

582 Long Standing. A quick-growing, long-bearing variety for mid-summer use. Plants grow low and spreading, with pointed, dark green, intensely crumpled leaves. May be sown in spring or fall.

583 Bloomsdale Savoy. An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green.

584 King of Denmark. Very desirable for canning and for market gardens. Leaves broad, rounded, very dark green, somewhat crumpled. An exceptionally long standing type, remaining in condition from one to two weeks.

586 Summer Savoy. An improved long standing Bloomsdale. Well savored, dark green and slow seeding, for warmer weather or later spring plantings.

SALSIFY

571 Mammoth Sandwich Island. Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc. Postpaid price: Pkt., 5c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.10.

MAMMOTH SUNFLOWER

The sunflower seeds have a very high feeding value and are greatly relished by poultry. The Mammoth Russian is the largest of Sunflowers. Plant about the same as corn. If you have no field space to spare, plant them in corners, along fences, etc. Postpaid prices: ¼ lb., 8c; ½ lb., 12c; 1 lb., 18c; 5 lbs., 75c. Write for special prices on larger amounts.

TOBACCO

Postpaid price on each of the following 2 varieties: Pkt., 10c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.10.

727 Havana. An early variety used largely for cigar wrappers, on account of the thinness and fine quality of the large leaves. Rich flavor.

728 White Burley. Broad attractive leaves. Easy to cure. Used for fillers and wrappers.

MISCELLANEOUS

676 Brussels Sprouts. Of the cabbage family highly desirable. Plants thickly set with firm cabbage-like balls, maturing successively. Postpaid price: Pkt., 5c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

690 Kale, Dwarf Green Curled Scotch. A member of the cabbage family, used for greens. Leaves large and crimped. Postpaid price: Pkt., 5c; oz., 8c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 85c.

720 Okra, Long Green Podded. The best variety that you can plant. Plants dwarf and very productive. Valuable for soups and stews. Postpaid price: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 50c.

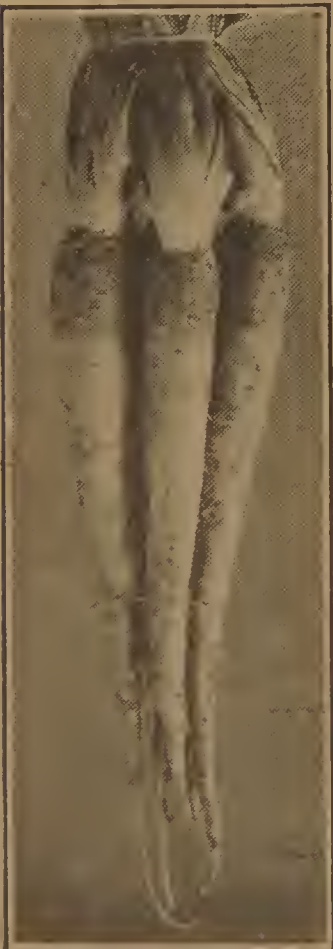

705 Collards, Georgia. A good substitute for cabbage which succeeds on poor soil, grown especially in the south. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c.

706 Broccoli, Italian Green Sprouting. Forms large head consisting of a cluster of small heads. Both stems and heads are cooked and served like cauliflower, but is of a more delicate flavor. Postpaid: Pkt., 5c; oz., 35c; ¼ lb., \$1.15.

695 Early White Vienna. Dwarf variety. Excellent for home and market garden use. Bulbs 2 to 3 inches in diameter, globular, flesh white, tender and crisp. Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 75c.

696 Early Purple Vienna. Desirable early dwarf variety. Bulbs globular with white, tender flesh. Price—Same as Early White Vienna.

1256 Finest Mixed Gourds. All of the popular varieties: Calabash, Orange, Jap Nest Egg, Dipper, Dishcloth, etc. Many sizes and colors. Postpaid: Pkt., 8c; oz., 20c; ¼ lb., 50c.

PACKETS
For****25¢****SELECTED
SEED****GROUPED FOR
SPECIAL USES****All Flower 5c
Packets Each****FINE SEEDS AT SUCH LOW COST**

You may wonder how we can give you the best quality seeds in colored packets at such a low cost of 5c each, 6 for 25c. Our packets are liberally filled, too, with planting instructions given for each variety ordered. We hope you desire to save money—because by not listing many varieties in picture and colors in this catalog as some do—enables us to furnish you the same quality and amount of seed in our 5c packet that sells in other catalogs for 10-25c.

Each flower is marked (A.) or (P.).

Annuals. (A.). Produce flowers in one year and die. Easy to grow and continuous bloomers.

Perennials. (P.). Plants which usually start blooming the second year and continue for many seasons.

EVERBLOOMING ROSES

29¢ EACH

4 for \$1.00
10 for \$2.35

RED ETOILE DE HOLLANDE — Most beautiful brilliant crimson, rich, velvety and very lovely. Fragrant, free blooming, long stems.

E. G. HILL—Striking in form and color. Long buds open into full double flowers. Dazzling scarlet that deepens as Rose develops.

GRUSS AN TEPLITZ—The hardiest ever-blooming rose. Rich blackish-maroon bloom in clusters, very vigorous.

RADIANCE—Red. Americans' favorite garden rose! Large, bright rosy-red, free bloomer. Hardy.

AMI QUINARD. Rich deep maroon—darkest red Rose. Fragrant. Bush is vigorous, free blooming and disease resistant. New and extra good.

PINK RADIANCE PINK—Universally popular! Best and Hardest Pink H. T. for inexperienced gardeners. Rose Pink with true rose fragrance. Strong—blooms freely.

EDITOR McFARLAND—Rated one of America's Best 10. Deep, brilliant Pink, fragrant blooms on long, strong stems. Vigorous, free bloomer.

MME. C. CHAMBARD—New coral pink. The bushes are covered with loads of large, full, well-shaped blooms.

YELLOW JOANNA HILL—Large yellow with bronze shading in center. Fragrant, vigorous.

MRS. P. S. DUPONT—Golden Yellow. Winner of more Gold Medals for outdoor blooms than any other Rose. Strong, vigorous, free blooming. The best.

GOLDEN DAWN—A new yellow that is a sensation. Free bloomer. Large, very fragrant, long lasting flowers.

WHITE FRAU K. DRUSCHKI, H. P.—Hardest white—blooms all summer. Very vigorous. Extra large, double snow-white bloom.

MME. JULES BOUCHE. Considered the finest pure white rose but not as hardy as Frau Druschki. Lovely bud and bloom on long, strong stem.

AMERICA'S "10 BEST" ROSES

Selected by rosarians affiliated with the American Rose Society as being the 10 best Roses for the average amateur gardener. Chosen for vigorous growth, rich coloring, disease resistant qualities, and production of lovely blooms. Berry's are happy to offer these outstanding groups to you at such low prices.

Pink Radiance—Silvery Pink.
Talisman—Rich Copper Yellow.
E. G. Hill—Dazzling Rose-scarlet.
Golden Dawn—Rich Yellow.
Rose Garden of above 4 varieties.
No. 888—2 yr. Standard—90c.
No. 889—2 yr. No. 1—\$1.10.

TALL HEDGES for Screens

Will Grow to
4 ft. or Higher
See Description.

See Page 73 for Low Prices on Tree Seedlings for Windbreaks

These taller, rapid growing varieties are best for screens to conceal undesirable buildings, alleys, unsightly situations next door, etc. Where room is available, they are excellent for mass plantings or as background for Shrub borders, etc.

HONEYSUCKLE—BUSH. (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower—beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.

12 to 18 in.—10 for 95c; 25 for \$1.95; 100 for \$7.25.

18 to 24 in.—10 for \$1.25; 25 for \$2.50; 100 for \$9.15.

RUSSIAN MULBERRY. A very useful variety at unusually low cost. Quick growing and absolutely hardy. Useful for both hedge or screen as it can be kept pruned down to 4 or 5 ft. (when planted 15 to 18 inches apart), or allowed to grow to 12 to 16 ft. high (when planted 3 to 5 ft. apart). Birds love the fruit, too.

12 to 18 in.—10 for 25c; 25 for 50c; 100 for \$1.35.

18 to 24 in.—10 for 30c; 25 for 60c; 100 for \$2.00.

RUSSIAN OLIVE. Another very useful, attractive, yet inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight, silvery grey hedge, kept pruned down to 4 to 6 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 15 to 18 ft. tall.

12 to 18 in.—10 for 40c; 25 for 80c; 100 for \$2.50.

18 to 24 in.—10 for 55c; 25 for \$1.10; 100 for \$3.50.

TRIMMED and NATURAL LOW HEDGES

IMPORTANT. Your Hedge will never be tight, close to the ground unless you prune it severely immediately after planting. Always prune off at least ½ of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 in.

PRIVET—AMOR RIVER NORTH. Most popular Hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

12 to 18 in.—10 for 55c; 25 for \$1.10; 100 for \$3.65.

18 to 24 in.—10 for 65c; 25 for \$1.40; 100 for \$5.15.

PRIVET—CALIFORNIA. Similar to Russian Privet except that it is not dependably hardy north of St. Louis. In mild climates, it is almost evergreen.

12 to 18 in.—10 for 50c; 25 for 95c; 100 for \$3.15.

18 to 24 in.—10 for 60c; 25 for \$1.25; 100 for \$4.25.

BARBERRY—Red. Like Japanese but with brilliant red foliage when planted in full sun.

12 to 15 in.—5 for 55c; 10 for \$1.00; 25 for \$2.10.

15 to 18 in.—5 for 65c; 10 for \$1.25; 25 for \$2.60.

SPIREA V. H.—BRIDAL WREATH. One of the most beautiful Hedges—in the Spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows 4 to 6 ft. high. Prune very severely when planted but, after the first year, prune out only the dead wood.

12 to 18 in.—10 for 60c; 25 for \$1.15; 100 for \$3.75.

18 to 24 in.—10 for 80c; 25 for \$1.60; 100 for \$6.00.

2 to 3 ft.—10 for \$1.10; 25 for \$2.25; 100 for \$8.65.

BARBERRY—JAPANESE. A very compact, dense growing, thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

12 to 15 in.—10, 50c; 25, \$1.00; 100, \$3.35.

15 to 18 in.—10, 60c; 25, \$1.25; 100, \$4.25.

CARAGANA. Best ornamental Hedge for severe northern climates. Strong, upright, growing, thornless branches with dense foliage and yellow blossoms insure a beautiful hedge. Keep pruned from 3 to 6 feet or you may let it grow higher.

12 to 18 in.—10, 35c; 25, 70c; 100, \$2.25.

18 to 24 in.—10, 45c; 25, 90c; 100, 3.15.

SPIREA—Red. It is everblooming and makes a wonderful hedge. The flower is bright crimson and the bush hardly ever gets over 30 inches high. It is hardy everywhere. Flowers are borne in clusters often 3 inches across and bloom from June on.

12 to 15 in.—10, \$1.25; 25, \$2.50; 100, \$9.15.

15 to 18 in.—10, \$1.60; 25, \$3.25; 100, \$12.25.

For all Spirea varieties in regular Shrub grade see page 74. Jap and Red Leaved Barberry also listed on page 74 in larger and heavier shrub size.

VINES

Strong 2 Yr. Plants for Rapid Vigorous Growth

Vines with their luxuriant foliage and lovely blooms relieve the monotony of bare walls and give quick shade on porches and arbors.

BOSTON IVY. Best clinging vine for brick, stone, cement or stucco. 2 for 50c; 6 for \$1.25.

For Trellis, Arbors, Porches, etc.

HONEYSUCKLE—Scarlet Trumpet. A strong growing vine with bright red, trumpet-shaped flowers. 2 for 50c; 6 for \$1.25.

ORIENTAL BITTERSWEET. Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby. 2 for 50c; 6 for \$1.25.

HONEYSUCKLE—Hall's Japan. A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces. 2 for 50c; 6 for \$1.25.

CLEMATIS—Paniculata. The hardy, vigorous growing Japanese Clematis. Covered with fragrant flowers in late summer and fall. 2 for 50c; 6 for \$1.25.

WISTERIA—Purple. The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates. 2 for 50c; 6 for \$1.25.

Some Vines of Special Beauty

SILVER LACE VINE. The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. Each, 35c; 3 for 89c.

CLEMATIS JACKMANI—Purple. A beautiful perennial vine with its mass of large, rich, purple bloom. Considered the most beautiful vine for trellis. Requires protection in severe climates. Each, 65c; 3 for \$1.75.

CLEMATIS—MME. E. ANDRE. Like Jackmani except that the lovely bloom is velvety red. Each, 65c; 3 for \$1.75.

HONEYSUCKLE—Golden Flame. New, everblooming Honeysuckle. Masses of deep scarlet trumpets lined with gold from early summer until frost. Attractive blue green foliage. Plants are vigorous, hardy and disease resistant. Each 59c; 3 for \$1.55.

MADEIRA VINE BULBS. An old fashioned vine, covering a large space in a very short time. Heart-shaped leaves and feathery white fragrant flowers. Not hardy—dig up in late Fall and store like Gladiolus. 4 for 25c; 10 for 50c.

Irish Juniper
**PLANTING
SUGGESTIONS**

Evergreen seedlings should be planted in beds and cultivated like garden plants. Rows may be 18 to 24 inches apart with the Evergreens 10 to 15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. After about 2 years or when 18 to 24 inches high, transplant into permanent location.

WINDBREAKS at

A MONEY MAKING INVESTMENT

For just a few dollars you can now plant several hundred Evergreen seedlings; to protect your home, farm buildings, and feed lots, from sweeping winds in winter and summer. Windbreaks from these seedlings will greatly increase crop production from the protection given, also production of your livestock. Nearly every farm has some waste land that will grow all the fence posts you need, all the wood you can burn, and at the same time, prevent soil erosion and provide shelters for grazing livestock. A fine investment needed on every farm at such low cost. All Evergreens may be ordered and planted in the Fall also.

EVERGREEN SEEDLINGS

By following carefully the planting instructions given at left you will obtain excellent results with the smallest of seedlings.

For further planting suggestions and windbreak ideas ask for our **free circular on Evergreens** giving a full description of all varieties also.

Berry's Evergreen Seedlings are grown in Northern Wisconsin on soil that develops a strong root system, and are shipped direct to you prepaid. They are carefully packed by experts and guaranteed to arrive in good condition.

SPECIAL EVERGREEN BARGAINS

TREES

This special offer of twice transplanted windbreak stock is our biggest value of the year. We make this offer only on Scotch Pine and Norway Spruce (both described below) as these two Evergreens alone make a fine two row windbreak. (See Lay-out on next page 73). These extra large trees that cost so little may be planted in their permanent location, the Scotch Pine should be your outside row and the trees 8-10 feet apart. On the inside the Norway Spruce may be planted 14-16 feet apart.

SCOTCH PINE. Very hardy, rapid grower that thrives on any type of soil. Needles are short, light green in color. Grows to 40-50 feet.

NORWAY SPRUCE. A very hardy rapid grower fine for windbreaks on the Northwest as it branches close to the ground and has dense foliage. Color is deep green and grows 60-80 feet in height. Lives 45-60 years.

TREE SEEDLINGS

Windbreak IDEAS

When double row planting and up to four or more rows are used; it is best to use a combination of species, rather than a single species. By using one species with a crown like the Scotch Pines, and one with a crown like the Norway Spruce, a more complete screen is formed from the ground up. The different spruces should be on the inside row, and the pines on the outside. For a three and four row windbreak, just add more rows of pines. The first two rows may be 14 to 16 feet apart, all further outside rows 20 feet.

Windbreaks are a great asset to any farm both in summer and winter. Protects crops from burning winds and dust storms. Protects buildings, feedlots and all livestock. Helps secure better production.

Start a fine windbreak this spring with our extra value vigorous, well rooted seedlings. They are hardy—easy to grow (planting instructions at right) and are shipped to you prepaid guaranteed satisfactory.

Hard Maple

HOW to PLANT

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first 2 or 3 years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

SHADE TREES for Every Purpose

SHIPPED EXPRESS PREPAID

ELM—AMERICAN. The best all-around Shade Tree. Hardy, rapid growing, yet long lived. Cheapest to plant, easiest to grow, best in every way. Plant the large size for quick shade.

6-8 ft.—Each 85c; 4 for \$2.85.

8-10 ft.—Each \$1.15; 4 for \$3.95.

ELM—CHINESE. The new extra fast growing Manchurian Elm. An improved type that's better.

5-6 ft.—Each 45c; 4 for \$1.65.

6-8 ft.—Each 75c; 4 for \$2.75.

MOLINE ELM. A new pyramidal, vigorous growing variety with large handsome green foliage. Fine for street, drive planting.

6-8 ft.—Each \$1.35; 4 for \$4.95.

8-10 ft.—Each \$1.95; 4 for \$7.45.

MAPLE—HARD. Splendid ornamental tree. Foliage turning bright orange, sometimes scarlet in autumn.

6-8 ft.—Each \$2.35; 4 for \$8.50.

MAPLE—SOFT or SILVER. One of the best rapid growing shade trees. Perfectly hardy.

6-8 ft.—Each 95c; 4 for \$3.45.

8-10 ft.—Each \$1.65; 4 for \$6.00.

4-5 ft.—4 for 50c; 10 for \$1.00.

5-6 ft.—4 for 75c; 10 for \$1.50.

MAPLE—RED. Not so heavily branched. Favorite because of beautiful reddish-purple leaves in the spring.

6-8 ft.—Each \$1.75; 4 for \$6.50.

BIRCH—CUT LEAF WEEPING.

One of America's most beautiful trees with its flashing white bark and graceful, drooping branches. Usually, the bark on these small trees is not white but turns white in a couple of years. Perfectly hardy, but not recommended in hot, dry, climates. Not shipped after May 1.

5-6 ft.—Each \$2.55; 4 for \$9.50.

WILLOW—NIOBE WEEPING. A beautiful, hardy, weeping tree with yellow bark and graceful branchlets. Fast growing and thrives anywhere. Not shipped after May 1st.

6-8 ft.—Each 90c; 4 for \$3.25.

POPLAR—LOMBARDY. Stately sentinel trees from Italy. Upright growing branches start at ground. Very valuable for windbreak, or screen to hide un-

sightly buildings, or for accent trees in well designed plantings. Hardy and very fast growing.

5-6 ft.—Each 35c; 4 for \$1.25.

6-8 ft.—Each 45c; 4 for \$1.50.

8-10 ft.—Each 55c; 4 for \$1.85.

ORNAMENTAL TREES

CRAB—HOPA RED FLOWERING. 18-22 ft. America's hardiest and most beautiful flowering tree. A mass of bright rose colored bloom in Spring. Heavy crop of edible red crabs for good jelly. Extra good!

3-4 ft.—Each 80c; 4 for \$2.75.

CRAB—BECHTEL'S FLOWERING. A beautiful, double pink flowering crab with fragrant flowers.

2-3 ft.—Each 85c; 4 for \$2.95.

CATALPA BUNGEI. Grows naturally into a compact, round headed ornamental tree. Fine in limited spaces for parkings. Plant 10 ft. apart.

5 ft.—Each \$2.95; 2 for \$5.65.

LOMBARDY POPLAR. These tall, fast growing, slender trees with many upright branches growing right to the ground, are excellent for sentinel trees, tall screens, windbreaks, etc. Being very narrow with upstanding branches, they are ideal for planting along driveways or where there is not sufficient room for wide-spreading trees. Berry's prices are very low.

3-4 ft.—4 for 75c; 10 for \$1.50.

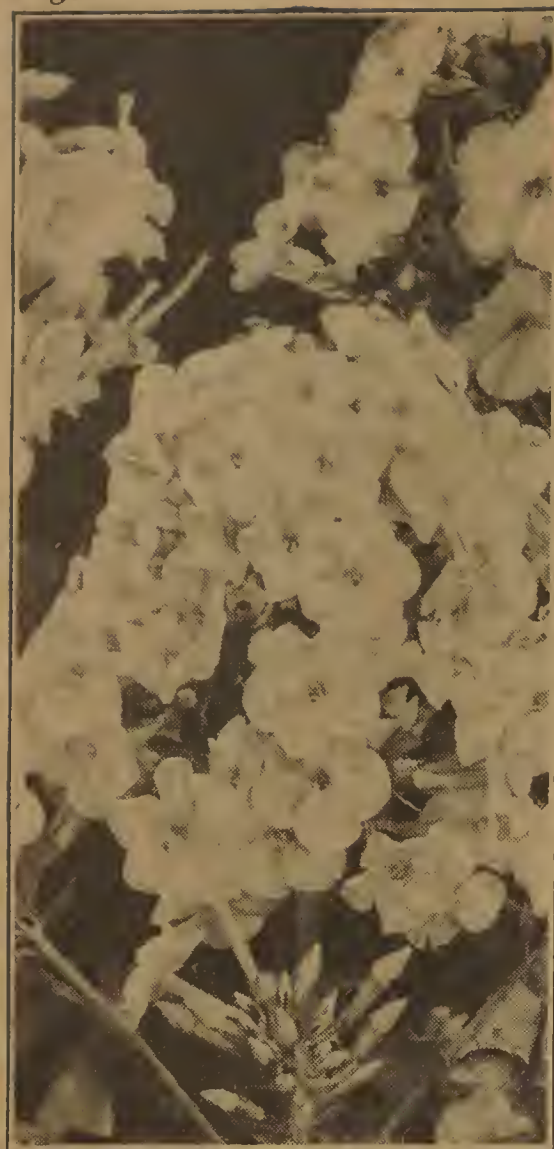

4-5 ft.—4 for \$1.10; 10 for \$2.20.

CHINESE ELM SPECIAL

CHINESE ELM. One of the fastest growing, longer lived trees. Absolutely hardy, drouth resistant, and desirable in every way. If not pruned, branches start from ground like a shrub making an extra tight windbreak. Keeps your buildings cooler in summer—warmer in winter. Take advantage of our new low prices—order now!

HOW WE SHIP

All Berry's nursery stock is shipped prepaid which saves you at least 20%. Kindly give us the name of your nearest shipping point for larger packages go by Express. We guarantee delivery in good condition at proper planting time in your locality.

Large 2/3 ft. . .	.45	1.25	2.25

Hydrangea—Pee Gee. Magnificent large conical shaped white bloom in summer, with pinkish cast in fall. Thrives anywhere—very popular.

Hydrangea—Hills of Snow. Best shrub for shade—thrives anywhere. Masses of large round white bloom in early summer. Very good!

SHRUBS-2 for 55¢ POSTPAID

All shrubs are Prepaid in either our regular size Medium Grade 18/24" or our extra heavy Large Grade 2 to 3 ft. Height at maturity is given after name, and if there is exception to above grades the size is marked. Order as many varieties as you want at our quantity prices of 2, 6 and 10.

REGULAR SHRUBS

Prepaid Prices:	2	6	10
Medium Grade 18/24"	\$0.55	\$1.35	\$2.15
Large Grade 2/3 ft.65	1.75	2.75

Barberry Japanese. (3-4 ft.) Very useful, hardy shrub for foundation, border or corner planting. Thrives anywhere. Hedging size page 71. Med.—15/18". Large—18/24".

Butterfly Bush. (3-4 ft.) Beautiful spikes of fragrant, lilac-purple flowers in late summer. Grows from roots each spring.

Coral Dogwood. (5-6 ft.) Hardy anywhere. Spreading habit. Brilliant red in winter.

Forsythia Golden Bell. (6-8 ft.) A very hardy upright grower with brilliant yellow flowers before the leaves.

Honeysuckle Bush. (12-15 ft.) Excellent for foundations if pruned severely. Pink. Hedging grade page 71.

Lilac Old Fashioned. (8-12 ft.) Loads of lovely, fragrant blooms. Very hardy.

Lilac Persian Purple. (6-8 ft.) Handsome foliage, striking reddish-purple bloom. Hardy, blooms young.

Quince Japanese Red Flowering. (3-4 ft.) Brilliant orange scarlet blooms with first leaves, glossy dark green foliage. Hardy, spreading. Fine for foundations.

Snowberry White. (3-5 ft.) Thrives anywhere without care, especially shade. Loaded with pretty berries in Fall.

Syringa Mock Orange. (6-8 ft.) Hardy favorite. Large, sweet scented white flowers in late spring.

Syringa Virginal. (4-6 ft.) Unusually large, double, very fragrant white flowers in June and all summer.

Weigela Pink. (5-7 ft.) Hardy, upright grower. Lovely pink bell-shaped flowers in May and June.

Tamarix Blue and Green. Graceful arching branches. Dainty pink flowers on rich green or blue foliage.

SPECIAL SHRUBS

Prepaid Prices:	Each	3	6
Med. Grade 18/24" . . .	\$0.39	\$1.00	\$1.80
Large Grade 2/3 ft.49	1.25	2.25

ALMOND—Double Pink Flowering. 4 ft. In early spring a mass of flowers. The beauty spot in any garden.

BARBERRY—Red Leaved. Like Japanese but with brilliant red foliage when planted in full sun. Medium—15/18". Large—18/24".

BUTTERFLY BUSH—Ile de France. 2 yr. Medium. Most beautiful late summer blooming. Perennial Shrub. Striking spikes of rich, fragrant, wine-red flowers from August until frost. Top branches kill back to ground each Fall, in severe climates, but root is hardy—strong new branches grow and bloom each year.

PLUM—Double Pink Flowering. (Rose Tree of China.) One of the most beautiful hardy Shrubs. Completely covered with rose like, double pink flowers in early Spring. Similar bloom to Almond but bush more vigorous and hardy.

SNOWBALL—Old fashioned. 6-10 ft. Another old favorite that thrives anywhere. Loaded with pure white flower balls in early summer.

HANSEN BUSH CHERRY

Bears fruit in one year. Dwarf Grower—Absolutely hardy. 2 ft. size—2 for 39c; 6 for 85c, Postpaid.

A dwarf growing, highly ornamental, hardy shrub. It is used widely for making jams and jellies. Fruit is good to eat and it will bear by second year. For a low bushy fruiting hedge plant 18 to 24 inches apart. In the garden or orchard plant 3 ft. apart. Try it this year at Berry's low prices.

SPIREA FAVORITES 2 for 45¢ 6 for 1.25 10 for 1.85

2 for 45c; 6 for \$1.25; 10 for \$1.85, Prepaid

Note: America's most popular family of Shrubs! Spireas succeed anywhere, are absolutely hardy, drought resistant and bloom freely, even under adverse conditions. Sizes indicated below.

BRIDAL WREATH. 5-6 ft. Our best seller. Graceful, arching branches loaded with dainty white flowers. Big 2-3 ft. size.

FROEBELLI. Semi-dwarf. 3-5 ft. Vigorous, spreading habit. Rose-pink bloom. Beautiful purplish red foliage in Fall. 18/24" size.

ANTHONY WATERER. Dwarf. 2-3 ft. Bright red flowers all summer. Very useful dwarf. 15/18".

BILLIARDI. 4-6 ft. One of the better flowering shrubs. Countless spikes of pink flowers all summer. 2-3 ft. size.

THUNBERGI. 3-5 ft. Countless white blossoms on graceful, arching branches with first leaves. 18/24" size.

ARGUTA—Snow Garland Spirea. Slender, upright growing shrub covered with snowy blossoms in Spring. Earliest blooming Spirea. 2/3 ft.

1 Yr. No. 1..	...	1.00	2.00	7.00

BETA. The hardiest of all grapes—consistent bearer of juicy black fruit for jelly, juice or wine. Rich, full flavored but rather tart for table use. Fine for Arbors.

DELAWARE. A red grape, very sweet and highest quality. Not quite as large size as Caco.

MOORE'S EARLY. Earlier than Concord. This large blue-black full flavored grape brings premium prices on any market.

NIAGARA. Enormous bunches of large greenish-white, sweetly flavored fruit. Best white for market—good shipper. Requires protection in severe climate.

WORDEN. Extra high quality blue grape of Concord type but clusters are often larger and the berries sweeter and of finer quality. Extremely hardy and productive.

CONCORD—AMERICA'S CHOICE

The best commercial grape for the Middle West. Vines vigorous, extremely hardy and dependable bearers of large crops of big, blue-black fruit.

2 Yr. No. 1 Prepaid: 2 for 30c; 5 for 60c; 10 for 95c; 25 for \$1.90; 100 for \$7.00.

2 Yr. No. 2 Prepaid: 2 for 20c; 5 for 45c; 10 for 70c; 25 for \$1.40; 100 for \$5.00.

1 Yr. No. 1 (except Portland). **FREDONIA. Black.** Destined to be America's favorite black Grape! Vigorous, productive and hardy. Large bunches of big juicy, deliciously flavored fruit—ripening 2 weeks earlier than Concord. **Prepaid: 2 for 50c; 5 for \$1.10; 10 for \$2.00; 25 for \$4.50.** **CACO. Red.** The hardiest red Grape. Vigorous grower, bearing young, heavily and regularly. Fruit is extra large, beautifully colored, extra sweet and juicy. The best table grape. **Prepaid: 2 for 60c; 5 for \$1.25; 10 for \$2.25; 25 for \$5.00.**

PORTLAND. White. Earliest of all Grapes! Large, white fruit with luscious, spicy flavor. Hardy and finest quality. Extra strong 2 year vines at these low prices. **Prepaid: 2 for 55c; 5 for \$1.15; 10 for \$2.10; 25 for \$4.75.**

GOLDEN MUSCAT. A new hardy Grape combining the extra high quality and distinctive flavor of the California Muscat Grape, with the hardiness of Concord. The bunches are large and well filled. Berries are large, sweet, meaty and juicy. Vines are vigorous, hardy, and heavy bearers after the second year. Recommended for home or commercial plants. **Prepaid: 2 for \$1.95; 5 for \$4.65; 10 for \$9.00.**

Berry's Give You the Biggest Nursery Values

We are fair to every customer regardless of the amount of order. 100% value in the best nursery stock America can grow. Accurate grades, true descriptions and a fair and square deal always is guaranteed you. If you want a premium see our offer pages 6 and 7 for a bigger value than any free gift offer ever made. Remember our Prepaid Prices save you 15-20% over other nurseries.

HIGHEST QUALITY-LOWEST PRICES

FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country, on this sound policy.

These same high standards maintain in our nursery department. Each and every item is carefully tested, before Berry's will put their name behind it. You can order our Nursery Stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices, the lowest.

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

LIBERAL GUARANTEE

Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 10 days after you receive it.

If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.

If any Berry's nursery stock fails to grow with proper care, we will replace it at half price IF you notify us within 90 days after you receive it.

BERRY'S PREPAY CHARGES

All orders are mailed, postpaid, except packages which are too large and must be sent Express prepaid. If your post office address is not your shipping point, please be sure to give name of nearest Express station.

FALL SHIPMENTS

In the spring of the year we ship orders at the earliest possible date or proper planting time, by postage or express prepaid. Detailed planting and pruning instructions for the care of each item ordered are enclosed with shipment.

With the main exception of Strawberries, Cannas, Dahlias and Gladiolus, we can ship all nursery stock in the fall for planting. Many items even in northern latitudes do just as well or better if planted in the fall than in the spring. They will be way ahead of the same stock planted in the spring. Our guarantee is behind every shipment, too, just as in the spring.

There are some fruits such as Peaches, Plums and Raspberries that should not be fall planted in north central states as Iowa. Otherwise we can make shipment of the best quality stock in the fall. If you order anything not suited for fall shipment we will refund your money or hold for spring shipment as you direct us.

SAVE WITH SAFETY AT BERRY'S NEW PREPAID PRICES

STRAWBERRIES

FOR EVERY HOME GARDEN

SURE CROP

BLAKEMORE

New, early market berry. Extra vigorous grower, heavy bearer, very drouth resistant, healthy and good plant maker. Recommended for Northern States. Mild flavor, beautiful color, early maturity. For market or home.

Boysenberry

BOYSENBERRY

Champion of All

The finest and most profitable fruit ever developed. After 4 years bringing still bigger premiums on all markets. The largest of all Bramble berries, with the most delicious juicy, richly flavored fruit yet known. The plant is a tremendous, vigorous grower, fruiting in early summer and bearing 8 to 10 weeks. Hardy anywhere but we recommend winter protection in severe climates.

The supply has never equalled the demand on any market. It sells on sight. Bears big cash crops the second year worth hundreds of dollars per acre.

Boysenberries are the finest fruit you ever tasted for eating fresh in pies or sauce and for canning or jam. Berry's 1940 prices are greatly reduced on No. 1 plants, vigorous, and well rooted. Plant a good patch this spring. Prepaid: 5 for 45c; 10 for 79c; 25 for \$1.75; 100 for \$6.25.

CHAMPION. Hardest Peach. Large, creamy white with red cheek. Freestone. Very high quality—juicy and sweet. Tree vigorous and thrifty.

ROCHESTER. Hardy, large, yellow, rich flavored freestone. Good shipper and keeper. 2 weeks earlier than Elberta.

J. H. HALE. Earlier and larger than Elberta. Unusually fine flavor. Good yellow with red blush. Good keeper. Plant with other varieties.

ELBERTA. Best known freestone, commercial variety. Yellow with reddish cheek. Excellent for eating or canning.

HALEHAVEN. Newest and best early freestone. Strong, thrifty grower, very hardy—heavy bearer of exceptionally fine flavored yellow peaches.

POLLY. Originated in Iowa and considered the hardest peach. Yellow freestone of good quality. Tree vigorous and hardy and productive. Midseason.

RED CHAMPION. A new yellow Peach with heavy red blush. Especially recommended for its extra hardness.

CARMAN. An excellent white, semi-cling peach. Extra hardy and very productive. Early.

GOLDEN JUBILEE. Yellow freestone, firm, juicy, full flavored. Ripens 15 to 20 days earlier than Elberta. New and very good.

PEARS 5 To 6 FOOT 40¢ EACH

IN LOTS OF 25

Pears are one of the easiest fruits to grow and thrive in any climates where other fruit grows. Plant at least 2 varieties for good cross-pollinization. All are good pollinators except Seckel which is blight resistant.

Prepaid Prices:	Each	4	10	25
Commercial $\frac{3}{4}$ '	\$0.40	\$1.45	\$3.15	\$7.25
Home Orchard $\frac{4}{6}$ '	.50	1.75	3.85	8.50
Giant $\frac{5}{8}$ '	.60	2.10	4.60	10.00

DOUGLAS. Best for Middle West. Vigorous and hardy. Often bears second year. Considered blight proof. Fruit large, golden yellow with blush. Fine texture and flavor for eating or canning.

SECKEL (Sugar Pear). Medium sized fruit. Very sweet and spicy. Hardy blight resistant. A young and heavy bearer.

BARTLETT. Favorite commercial variety. Heavy bearer of large, juicy, high flavored fruit. Strong growing tree—fairly hardy.

KIEFFER. Large, golden yellow, meaty pear for canning. Tree, extra hardy, blight resistant, and bears young.

LINCOLN. A large, late summer Pear of merit. Fruit is juicy and full flavored for eating or canning. Tree is vigorous, blight resistant, and starts bearing young.

HOME PEAR ORCHARD

A choice selection for all purposes—eating, canning or pickles. Our regular grade trees in both Commercial and Giant size as described on the right. 1 each of varieties listed above:
No. 526C— $\frac{3}{4}$ ft. $\frac{7}{16}$ - $\frac{9}{16}$ "—5 Trees, \$1.55
No. 527C— $\frac{4}{6}$ ft. $1\frac{1}{16}$ - 1"—5 Trees, \$2.35

$\frac{4}{6}$ ft. $\frac{9}{16}$ - $1\frac{1}{16}$ "	.55	2.00	4.65

CHINESE EARLY GOLDEN. Favorite commercial variety in many sections. Large, full flavored, heavy bearer.

SUPERB. Rich, juicy, medium size—excellent flavor. Best, most productive of hardy Russian Apriots.

MOORPARK. Larger, better flavored and better colored but not as hardy as Chinese Golden.

QUINCE

3 to 4½ ft. Each, 65c; 4 @ \$2.50; 10 @ \$6.00.

CHAMPION. Fruit large, attractive and delicate in taste and flavor. Trees strong growing, vigorous and productive. Bear very young.

ORANGE. An old favorite for jellies and preserves. Full flavored, orange yellow. Tree is vigorous and hardy. Bears young.

BERRY TREES of EXCEPTIONAL QUALITY

Berry's give you 100% value and you're the judge. Every grade is described just as we guarantee you will find it. Honest descriptions—honest values. Remember this in comparing our quality with more colorful layouts. You pay for all the pretty pictures you see and gifts for other customers. The money we save you enables us to prepay our nursery stock shipments and save you up to 40%.

GIANT SIZE. 5 to 6 ft. tall— $1\frac{1}{8}$ to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong $\frac{1}{16}$ to $1\frac{1}{8}$ inch diameter—4 to 5 ft. tall. Very well branched and well rooted.

COMMERCIAL SIZE. Being lower priced, usually preferred for large Orchard planting. 3 to 4 ft. tall, $\frac{1}{16}$ to $\frac{1}{8}$ inch diameter. Extra value at Berry's lowest prices in years.

ECONOMY GRADE. In Peach Trees, we offer this smaller size—2 to 3 ft. tall, $\frac{1}{16}$ inch caliper (diameter), lightly branched trees. Recommended for larger Orchards in warm climates.

EUROPEAN AND JAP PLUMS

These favorite varieties are not as hardy as American varieties so are especially suited for Central, Eastern and Southern states. They are exceptionally high in quality for eating or markets. Plant at least 2 of this group for proper cross-pollinization.

Grades Same as Apple.

Prepaid	Each	4	10
3/4 ft. 3/16-5/16" ..	\$0.50	\$1.80	\$3.85
4/5 ft. 9/16-1 1/16" ..	.60	2.15	4.90
5/7 ft. 1 1/16 to 1" ..	.70	2.60	5.95

BURBANK—JAPANESE

Tree strong and hardy. Fruit good size, bright cherry red, luscious flavored.

GERMAN PRUNE—EUROPEAN

A vigorous grower producing large crops. Large dark purple fruits, very juicy and sweet.

SHROPSHIRE DAMSON

Better than the old fashioned, favorite Blue Damson, known to housewives for generations for the fine jam they make. Fruit is medium to small, dark purple in color with a heavy blue bloom. Its deep yellow flesh is tart and very juicy. The tree produces enormous crops and is long lived.

HARDY AMERICAN VARIETIES

These vigorous varieties listed on the right are the hardiest of all fruits—will grow well and bear big crops anywhere. The best pollinators are marked "P." Plant at least 2 different varieties for cross pollinization.

HARDY AMERICAN PLUMS

Prepaid Prices	Each	4	10	25
Commercial 3/4'	\$0.40	\$1.35	\$2.85	\$6.25

Grades Same as Apple Page 80

APRICOT—HANSKA—P

Large bright red hardy Plum flavored like an Apricot when eaten fresh or cooked. Begins fruiting second year. One of the best pollinizers. August.

SAPA—P

Early, heavy bearer of rich purplish-black Plums of medium size. Extra hardy. Very juicy. Excellent for jelly or preserves.

UNDERWOOD

Heavy bearer of large, red, juicy, full flavored Plums of excellent quality. Early.

WANETA—P

The largest, most attractive and highest quality of the red Hardy American and Hybrid Plums. Vigorous, extra hardy and big cropper. Mid-season.

SUPERIOR. A new Minnesota plum introduction. A very large deep red plum, as large as the California plums and as good or better in flavor. Flesh is firm, fine grained and juicy and the fruit can be peeled as you do a peach. Very hardy, bears big crops and thrives even in the far north. Tree is very vigorous and upright spreading in habit.

RED WING. An unusually large, dull red Plum developed in Minnesota. Flesh is rich yellow, firm, juicy and sweet. The skin can be removed easily and the pit is so free that the plum may be sliced like a peach. A fine home orchard variety for dessert or home canning. The tree is hardy and vigorous.

PLANT PLUMS THIS YEAR! BIGGER TREES—LOWER PRICES

Plums are one of the easiest fruits to grow. Big crops of luscious fruit to eat or can the second year after planting. Plums are always in demand from local markets as the older Orchards have not been replaced fast enough.

We have just experienced one of the most favorable growing seasons in history. Our trees are bigger, heavier rooted and better branched than ever before. Our prices are very low, being prepaid on all orders shipped **saving you up to 40% on Postage or Express.**

"BEST 10" Home Orchard

Selected by our customers and recommended by State Experiment Stations as being the 10 best varieties for the Home Orchard. Plenty of Apples, Cherries and Plums for eating, canning or jelly all season. See also page 80 for description of varieties and sizes.

BERRY'S GIANT APPLES

AMERICA'S
FAVORITE FRUIT

5 to 6 FOOT
1 1/16 to 1 inch DIAMETER

Description of Sizes

GIANT SIZE. 5/7 ft. tall—11/16 to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong 9/16 to 11/16 inch diameter—4/5 ft. tall. Very well branched and well rooted.

COMMERCIAL SIZE. Being lower priced, usually preferred for large Orchard planting. 3/4 ft. tall, 7/16 to 9/16 inch diameter. Extra value at Berry's lowest prices in years.

A SURE MONEY CROP—WINTER APPLES

DELICIOUS YELLOW. Considered even better than Red Delicious. Superior in flavor, texture and keeping qualities. The very best golden apple.

DELICIOUS EXTRA RED. America's sweetheart! Supreme in flavor, texture and keeping qualities. Young bearing. Thrive anywhere.

McINTOSH. Red. Extra hardy, strong, long lived tree. Fruit uniformly well shaped and colored. Juicy, full flavored. Especially recommended for Northern States.

STAYMAN'S WINESAP. The extra large, hardy Winesap. Fine for eating or cooking. Good keeper.

ROME BEAUTY. New red. Favorite commercial apple in Michigan and New York. Excellent keeper. Fine flavor—eating or cooking.

NORTHWEST GREENING. Keeps until Spring. Excellent for eating or cooking after Xmas. Tree—hardy, bears young.

JONATHAN. Dark red. Most profitable apple for Middle West. Heavy, consistent bearer of rich, juicy, tart, good keeping apples.

NORTHERN SPY. Large, tender delicious fruits. Bright red color suffused with a delicate bloom. Very popular.

GRIMES GOLDEN. (Not recommended in severe climates.) Distinctive in flavor and texture. America's favorite yellow apple for home or orchard planting.

CORTLAND. Has the tang of Jonathan, the richness of Delicious, and the hardiness of McIntosh. Vigorous, young bearing. A superb apple.
